Evanescence – Where did they go?

Evanescence, a popular up and coming goth band, featured on the DAREDEVIL soundtrack, recently made comments (including cursing in an interview and making Jesus jokes) that has forced their record label, Wind-Up Records, to **recall** all Evanescence products. Despite having

roots in the Christian community prior to their first album, they have made it abundantly clear that they are a secular band.

Please keep Evanescence and Wind-up Records in your prayers.
