Example data to graph in the Computer Lab

A person was enrolled in a double blind antidepressant drug study. They volunteered to take a pill every day intended to potentially produce a decrease in their depressive thoughts. These are the results.

Day checked	Depression based on 100 point scale as described by subject	Hours of sleep previous night
1 (baseline)	90	7
4	85	6.5
9	80	6
14	80	7
18	90	6
22	75	8
28	65	8.5
32	55	8
38	60	8.5
43	60	8

3/26/07			
Occurrence:	3rd period seems to be very in control as far as discipline.	Suggestion/ criticism/praise:	The combination of a couple of referrals, removal of cell phones, moving seats, etc. has worked well in achieving this.
Occurrence:	Some minor technology issues with remotes, schoolisland. Good job covering by temporarily going to another activity…	Suggestion/ criticism/praise:	I would never suggest that you use any technology items that you don't feel totally comfortable with- especially ones that are slated to take large chunks of class time.
4/13/07			
Occurrence:	Going to the CPU Lab today for SAS Photosynth. And introducing activity	Suggestion/ criticism/praise:	Very thorough in your instruction, preparing the students for exactly what they will see. Good job.
Occurrence:	Decided to skip monster Cladogram with general class.	Suggestion/ criticism/praise:	Also a good idea based on the fact that Colleen thought that their time could be better used reviewing other topics and ideas rather than working on a potentially confusing Cladogram activity.
4/19/07			
Occurrence:	Went out on plant excursion.	Suggestion/ criticism/praise:	Very informative, interesting for the kids (and myself) and an overall great learning experience. This activity was very positive and well executed.
Occurrence:	Students continued to talk before plant excursion 4th Per..	Suggestion/ criticism/praise:	Very stern,

			committed response. Staying serious and waiting for silence worked well. Almost a shame that just as you gain control of the classrooms and their discipline issues that your last day is upon us.
