This was a tough tough race. We thought all the daybirds need to be mentioned after racing over 900 KM to find their way home. My pet peeve still stands.

My 6-7-8 and 9 birds clocked on the day, will not be shown on the UNC results because even for the longest distance we have the 5 bird rule. We already have a 20 bird clocking limit and then a further restriction with only 5 birds counting.

We have tried to change the constitution but this is very difficult too. You can start a Union in Canada with a majority of 50 % plus 1. But to change the

constitution

in a pigeon combine you need 66 or 67 %. If you have 24 delegates then 8 members can

hold up a change forever. I think we should at least change this for the long distance races. If you want to keep the 5 bird rule for the loft championships that would be fine with me. If you want to lower the bird limit, again no complain from this side. How low: I don't care. But let us give credit to birds who busted their pigeon butts trying to get home on the day. (They flew to my loft 911 KM)
