

## **Nuclear Damage to Astral and Etheric Levels**

Morris Bradley

For centuries men have waged war against one another and our spirit people and friends in outer space have gazed down upon us with dismay and horror at our disregard for human life, animal life and property. No doubt during these periods they would have liked to have interfered and stopped this carnage, and could have too, but because of certain universal laws they have to sit back and watch, and try to incline us to peace through inspiring some specific individual to bring us the “message.”

However the time has come when these “beings” can no longer stand by and let rampaging of humans to continue, for our World has reached a technological stage where our weapons of destruction not only affect the physical world, but are starting to encroach and unbalance the other dimensions around us such action, if allowed to continue can bring serious imbalance to our Galaxy and indeed the universe itself thereby limiting the progression of the soul, and thwarting God’s plan of eternal progression of the Spirit.

Our planet Earth is composed of three outer layers that are a part of its function, we have first the physical layer, then the Etheric layer, or Etheric Cloak, as some term it, then the Spiritual layer. Each of these layers run into one another and are all inter-connected and within each layer exist its own particular “creations.” These levels contain God’s Army of a Host of Spirits plus the souls of the departed, plus a whole myriad of other ethereal, and spirit entities needed to govern and watch over the Earth people and the natural functions, such as Nature spirits, Elemental beings. Kings and Kingdoms, powers and principalities, says the Bible, that exist in these invisible realms, yes invisible to most humans in the physical but real and solid when viewed through the eye of God (Clairvoyance.)

The World’s etheric cloak is a huge grid system that is tied down to the Earth’s surface in thousands of places throughout the globe and these are called “light centres,” and it is down these vortices that much of our energy flows sustaining our natural balance and giving us an electromagnetic energy field which is a part of the life force of all living matter (organic) and the guide to the production of all inorganic material.

Large scale nuclear explosions and radiation is causing serious breaks in this etheric cloak and the “light centres” are being disturbed, and the energy fields distorted and this action can gravely affect all life forms on our planet. The break down of this energy grid system could cause a “Polar Flip,” that means the axis of the World could shift, tipping our planet

over and such an action could submerge whole continents and wipe out most of our present civilisation, so it is no wonder that “others” out there are worried about our present warlike course we are following. If this is to happen then we would certainly get a “new Heaven and a new Earth” as the Bible says, for whole continents would sink, while other land masses would arise, and with a shift of the poles, then at night one would be looking upwards to the heavens and viewing Stars that were not visible before the catastrophe.

This would indeed be the “wrath of God visited upon us” because of our wickedness as the scriptures suggest is possible. Things, people and ideas, are only manifested in the physical world because of the other two layers, all things are designed first in the Spirit realms, then these are transmitted to the etheric levels, (the reflecting ethers,) and then once the format has been completed, the pattern is reflected to the physical level where it becomes a tangible reality. This is why many psychics can see inventions long before they exist in the physical planes.

During his lifetime the author himself has had many such visions of “things to come” and to bring a few of these to mind, there were such things as, hovercraft, electronic organs, Univox, electric guitar, computers, miniature television sets, jet boats and jet engines, and many other innovations that he described, to friends and associates who duly noted this information at the time, then reminded the author of this years later “visions became real.”

This sort of thing is not unusual for people all over the world even in ancient times saw such “future images” in their minds and some even wrote stories about such possible new inventions. Writers like Robert Louis Stevenson and Jules Verne wrote about Mars, time machines and things to come as well as this many scientists saw the end image of their potential creations or discoveries in their own minds eye, so we can see here how the “spirit” or friends from outer space” have endeavoured to help and inspire man,” for in reality they have also been helping themselves, so it is no wonder they are at present so perturbed by what is going on in our physical environs for it is placing them in jeopardy as well, so for the sake of all of the Universe, they will not stand by and allow us to, “be as naughty little children” destroying our own and their creation.

Man through his own ingenuity and inspired by the “negative forces of darkness” has at last found a way to totally annihilate himself in his present and possible future existences, halting his own soul progression and keeping him at the same level as the “disobedient ones” that

were cast down by God. Rather than allow this holocaust to take place, “the powers of Light” under these conditions, have the sanction to intervene because we have moved beyond that which is reasonable, so this could be represented by the second “advent of Christ” accompanied by the “Host of Heavens” as prophesied in Revelations in the Bible, and though God gives Man free agency, there must come a time when even God says, “enough is enough you have had your chance, and muffed it, so now we will sort things out for you.

How much is enough? Is there still time for Earth people to save themselves from the “wrath of God?” I think there is because, though they don’t realise it, the people have the “power” and if they rise up collectively all over the World, they could stop wars, and nuclear explosions thereby siding with God’s “peace plan” and thwarting the “dark powers” that manipulate the fallen and preach humanism. Those who are interested in working on this plan would help by using the number 12 Talisman, and number 11 Talisman, which are contained in our works titled Psionic Talismans, and may assist in defusing nuclear weapons, or psychically persuade others not to make or use them, and also prevent mental domination from negative orientated extra-terrestrial forces.
