These are just a few of the well known symbols that one can use. Many psychometrists and clairvoyants who start out using this system with their 'links' or 'controls' often discard this method as they develop, for they get clearer readings in graphic pictures far more specific than using this beginners' system.

One can learn to control their destiny through a study of the ancient sciences and this knowledge can guide one through the present age of anxiety and depression. The first step into the hidden pathways of God's mysteries is the face to face confrontation with a

starting fact. This fact is that all of one's preconceptions and education and all ones accumulated materialistic wisdom are unable to account for the simple phenomena which transpire and transcend the action and the interaction of the life forces on Earth.

As we explore the territory belonging to 'spirit' and 'matter', we will state that Spirit and Matter as we know them are the duality of expression of the one great deific principle. This duality is due to the difference in polarity. Spirit and Matter are a unity under two modes of action, and this duality can be comprehended in its true relationship when viewed from both planes and realised by the science of correspondence. Science is but a material thing or system of symbolism from which we regulate our conceptions of all things.

Just as symbols are the product of ideas, then ideas are the symbols of thought, and thought itself is but the symbolic response of the self to the pulsating throb of the radiant Soul. It is difficult to penetrate anything beyond this, even in our exalted conceptions. All serious study and meditation as to the nature and existence of God is unprofitable, for the infinite can never be comprehended by the finite.

One must exercise the intellect in the interpretation of the symbols that appear in the 'mind's eye' and in most cases a common sense explanation can be given to the sign. For example if one sees the Sun, then this indicates energy, growth, radiation, health, strength, power, much to give out, etc.. A judge could indicate legal matters pending, and so on.

One of the important factors of this work is that no alcohol should be taken on the day that you intend doing this work, and that one must try to remain as calm as possible for at least 15 hours prior to this work, making sure that there is a minimum of stress factors present in ones mind.
