===== Valuation Methodology =====

The Commercial + Recreational Vehicle Division of CCC Information Services, Inc., prepared this CCC Valuescope Market Report for David Morse + Associates. CCC has been preparing market value reports for the insurance industry since 1981.

Valuations performed by CCC's Commercial + Recreational Vehicle Division require individual market searches to identify and locate supporting market Valuation Request: 31898001 (Continued) 1990 ACUR LEGEND L information. Due to the unique nature of the loss units valued in the Commercial + Recreational Vehicle Division, a valuation expert handles each request individually.

When David Morse + Associates requests a valuation report, they provide CCC with the configuration of the loss unit, including model, hours or mileage, optional features, any accessories, the condition of the loss unit as well as the VIN/HIN/PIN (vehicle/hull/product identification number) of the loss unit. That identification number is analyzed to verify basic information provided on the loss unit.

David Morse + Associates also provides CCC with the loss unit owner's ZIP code, which identifies the local market used to determine the market value.

The local market area, however, may vary by vehicle or unit type. Where the vehicle or loss unit is readily available in a given location, the search area can be within the same city or state as the loss unit. If the loss unit or vehicle is very specialized, the search may expand to locate comparable support to document the loss unit's value.

Significant differences between the loss unit and any comparable units are documented and are used to define a verifiable market value for the loss unit. If no comparable units are located, the valuation expert will conduct a local market survey to gather the expert opinion of knowledgeable retailers in order to determine the local market value.

===== Comparable Units =====

The following Dealer Interview supports the local market value of the loss unit. The complete configuration of the loss unit is used to determine the Market Value.
