

CSS Flex Nested Examples:-

```
<html>
<head>
<style>
.container {
  border: 1px solid pink;
}
div {
  padding: 10px;
}
.height {
  min-height: 500px;
}

.flex {
  box-sizing: border-box;
  display: flex;
}
```

```
.flex-columns {  
  display: flex;  
  flex-direction: column;  
}  
  
.row {  
  flex: 1;  
}  
  
.red {  
  background-color: red;  
}  
  
.orange {  
  background-color: orange;  
}  
  
.yellow {  
  background-color: yellow;  
  flex-grow: 2;  
}  
  
.green {  
  background-color: green;  
  flex-grow: 3;  
}  
  
.blue {  
  background-color: blue;  
  flex-grow: 3;
```

```
}  
  
.indigo {  
  background-color: indigo;  
  flex-grow: 2;  
}  
  
.violet {  
  background-color: violet;  
}  
  
.black {  
  background-color: black;  
}  
  
.white {  
  background-color: pink;  
}  
  
</style>  
  
</head>  
  
<body>  
  
<div class="container">  
  <div class="row flex height">  
    <div class=" red row"></div>  
    <div class=" orange row flex flex-columns">  
      <div class="row black flex">  
        <div class=" yellow row"></div>  
        <div class=" green row"></div>  
      </div>  
    </div>  
  </div>  
</body>  
</html>
```

```
<div class="row white flex">
```

```
<div class=" blue row"></div>
```

```
<div class=" indigo row"></div>
```

```
</div>
```

```
</div>
```

```
</div>
```

```
</div>
```

```
</body>
```

```
</html>
