## 6. styles.css (CSS File)

You can create a simple CSS file to style the website.

Copy code

```
body {
  font-family: Arial, sans-serif;
  margin: 0;
  padding: 0;
  line-height: 1.6;
}

header {
  background: #333;
  color: #fff;
  padding: 10px 0;
  text-align: center;
}

nav ul {
  list-style: none;
  padding: 0;
}

nav ul li {
  display: inline;
  margin: 0 15px;
}

nav ul li a {
  color: #fff;
  text-decoration: none;
}

main {
  padding: 20px;
}

footer {
  text-align: center;
  padding: 10px 0;
  background: #333;
  color: #fff;
}
```

## Usage

1. Create a folder for your website.
2. Inside that folder, create the five HTML files (`index.html`, `about.html`, `services.html`, `portfolio.html`, `contact.html`) and the CSS file (`styles.css`).
3. Open `index.html` in a web browser to view your website.

Feel free to customize the content, styles, and structure according to your needs!
