

Here are **website design prompts** specifically crafted for **Bootstrap 5**. These prompts will help you learn and master Bootstrap's responsive grid system, components, and utilities — and are perfect for both practice and portfolio projects.

---

## □ **Beginner Prompts**

### **1. Personal Portfolio Website**

Design a single-page portfolio for a web developer or designer.

- Use a **navbar**, **hero section**, **about section**, **project cards**, and a **contact form**.
  - Layout: Bootstrap Grid with `container`, `row`, and `col`.
  - Add **scrollspy navigation**.
- 

### **2. Landing Page for a Mobile App**

Create a landing page to promote a new mobile app.

- Hero with app screenshots in a **carousel**.
  - Use **buttons**, **badges**, and **cards** to highlight features.
  - Include **download buttons** (iOS & Android) and testimonials.
- 

### **3. Simple Blog Layout**

Build a blog homepage layout.

- Two-column layout: posts on the left, sidebar on the right.
  - Use **cards**, **list groups**, **pagination**, and a **navbar**.
  - Add **Bootstrap Icons** for category labels.
- 

## □ **Intermediate Prompts**

### **4. E-commerce Product Grid**

Design a product listing page for an online clothing store.

- Grid layout using Bootstrap's `row` and `col-md-4`.

- Use **cards** for product thumbnails, titles, and prices.
  - Add **modals** to view product details.
  - Include a **navbar**, **dropdown filters**, and **breadcrumb navigation**.
- 

## 5. Multi-Section Business Website

Create a professional homepage for a consulting company.

- Sections: Hero, Services, Team, Testimonials, Contact.
  - Use **accordion** for FAQs, **carousel** for testimonials, and **cards** for team members.
  - Footer with **social icons** and contact info.
- 

## 6. Restaurant Menu Website

Design a restaurant website with a dynamic menu.

- Hero section with image and reservation call-to-action.
  - **Nav-pills** or **tabs** for switching between menu types (breakfast/lunch/dinner).
  - Use **cards** for individual dishes.
  - Include a **booking form** with validation.
- 

## Advanced Prompts

### 7. Admin Dashboard

Build a responsive dashboard UI for a content management system.

- Sidebar with **collapse** or **offcanvas** navigation.
  - Use **cards**, **tables**, **progress bars**, and **badges**.
  - Integrate **Bootstrap 5 form validation** and **toasts** for notifications.
- 

### 8. Job Board Interface

Design a homepage for a job listing website.

- Navbar with filters and category dropdowns.
- Use **cards**, **badges**, and **accordion** for job details.

- Include a **modal** for job applications.
- 

## 9. Event or Conference Website

Create a site for a tech conference or event.

- Sections: Hero, Speakers, Schedule, Tickets, Contact.
  - Use **carousel** for sponsors or highlights, **cards** for speaker bios, and **accordion** for event schedule.
  - Include a **responsive navbar** with scrollspy.
- 

## 10. Educational Course Platform

Design a homepage for an online learning platform.

- Use **cards** to show course previews.
  - Add **progress bars** for course completion.
  - Include **forms** for login/signup, and a **modal** for course previews.
- 

## □ Bonus Mini Challenges

- **404 Error Page** – A creative error page using Bootstrap utilities and animations.
- **Login/Register Page** – Use tabs or a modal to switch between login and signup forms.
- **Newsletter Signup Section** – With validation and success message using Bootstrap alerts.
