

**RSI-based swing trading beginners** ke liye achhi ho sakti hai, lekin **RSI ko akela use na karein**. Trend ke saath combine karne par better results milte hain.

## **RSI Pullback Strategy (Beginner Friendly)**

### **Indicators**

- RSI (14)
- 50 EMA

### **Buy Setup**

1. Stock **50 EMA ke upar** ho (uptrend).
2. RSI 40–50 zone tak gir jaye (pullback).
3. RSI wapas upar mudna shuru kare aur 50 ke upar cross kare.
4. Price support ke paas ho.

### **Entry**

- RSI 50 ke upar cross kare aur bullish candle bane.

### **Stop-Loss**

- Recent swing low ke niche.

### **Target**

- Risk:Reward = 1:2 ya 1:3.

### **Example**

- Entry: ₹100
- Stop-loss: ₹95
- Risk: ₹5
- Target: ₹110–115

## RSI Oversold Bounce Strategy

Ye thodi aggressive strategy hai.

### Buy Setup

1. RSI 30 ke niche chala jaye (oversold).
2. RSI wapas 30 ke upar aaye.
3. Price kisi strong support ke paas ho.

### Entry

- RSI 30 ke upar close kare.

### Caution

Har RSI 30 buy signal kaam nahi karta. Downtrend me stock aur gir sakta hai. Isliye trend check karna zaroori hai.

## RSI Levels Jo Beginners Yaad Rakhen

- $RSI > 60$  → Strong bullish momentum
- $RSI 40-60$  → Neutral zone
- $RSI < 30$  → Oversold
- $RSI > 70$  → Overbought

## Meri Recommendation

Swing trading ke liye:

- **50 EMA + RSI Pullback** strategy use karo.
- RSI 30/70 oversold-overbought strategy se shuruaat mat karo.
- **Large-cap stocks par practice karo, jaise:**
  - Reliance Industries
  - HDFC Bank
  - ICICI Bank
  - State Bank of India

Sabse pehle 20–30 paper trades karke dekho. Agar win rate 45–50% bhi ho aur average profit average loss se 2 guna ho, to strategy profitable ho sakti hai.
