

SWING TRADING STRATEGIES :-

Swing trading is a way to invest in stocks where you make a profit over a few days or weeks.

Swing traders do this by looking at the patterns in stock prices, trying to predict when the price will go up so they can buy low and when it will go down so they can sell high.

The goal of swing trading is to make money by buying a stock or option at a low price and selling it later at a higher price.

Note:- Always buy stocks in delivery and use time frame of 15minute, 1 hour, 1 day , 4 Hours .

Buy At Support And Book Profit At Resistance

2) Moving average:-

Use 50 Days moving average as support buy at support at moving average and book profit at resistance level.

3) Find out bullish reversal candlesticks like hammer, bullish engulfing, morning star, and dragon fly doji in downtrend and use w pattern to make buy entry.
