

Hi,

Today (Sept. 22), I finally got my 1/5th Scale aircraft beside "Big Brother"! Took some pix by themselves with the airport as a background. Looks real doesn't it!!

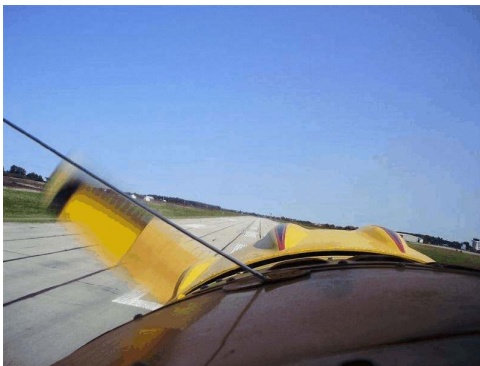

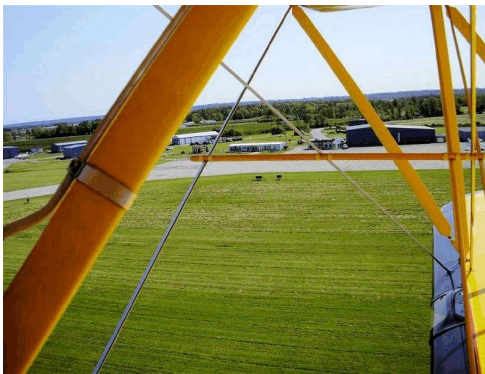

Here's some with Big Brother!!

Peter Ramm, owner of the full size, was very impressed with the model and examined it at length along with all the guys in the hanger. One of the controllers from the tower also came over to take a look. Probably though I might try to fly it!! Then Peter said - "Like to go for a short hop?" Of course I jumped at the chance, so he dressed me up ..stuck me in the front seat, showed me the controls ...then we taxied out. The tower asked if Peter had decided to trade his Waco in for something smaller!! Obviously they saw the model!!

...and took off!!

We flew along the lakeshore and then I was given control!!!! Flew up to the Niagara River. Did a turn around Fort George and then Peter flew back to the field.

...did a high speed pass down the runway ...then came around on final ...and touch down. The landing was sooo smooth! ..and then we taxied back to the hanger. WOW!! There's just nothing more I can say!! It was a dream come true!!

Jim
