

Cutouts

Cutouts

This tutorial is for PSP7. So if something doesn't seem right email and I'll see what I can do to correct the problem that you're having.

All graphics are done with:

You will also need this plugin

And you will need this **FONT** or you can use your own.

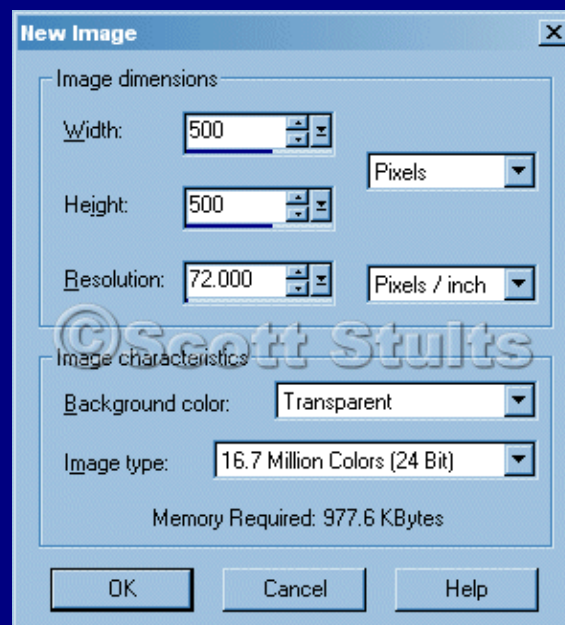

This tutorial is also available in [Adobe Acrobat Reader format](#)

Ok, here goes nothing.....

Open a new blank image

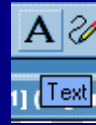

Use the settings below.

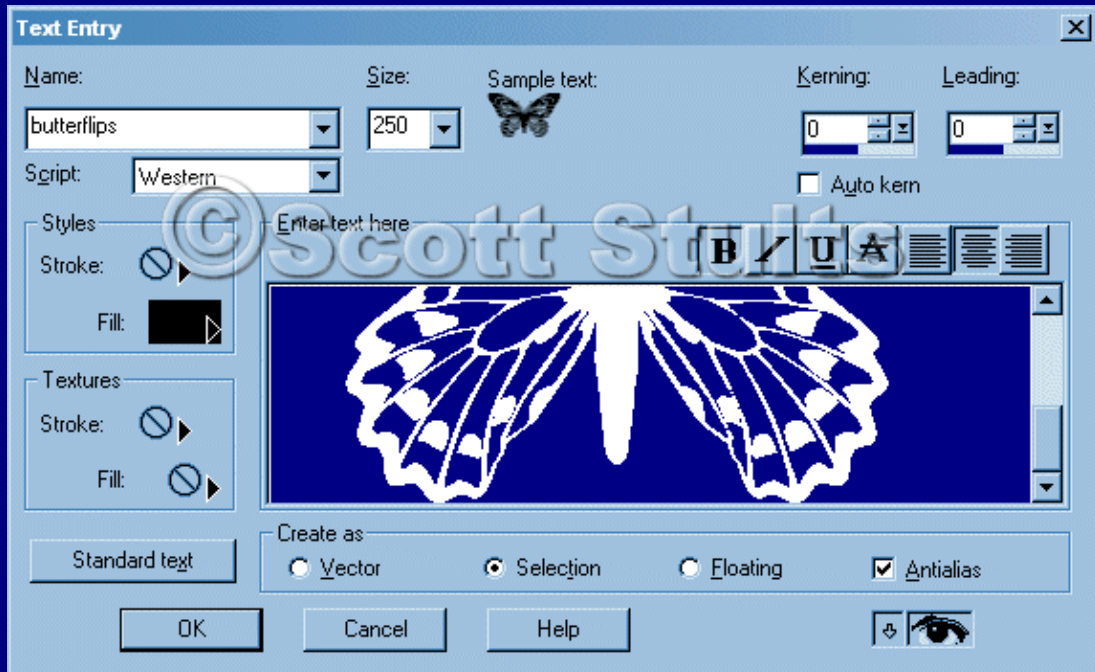

Cutouts

Now go to your text tool.

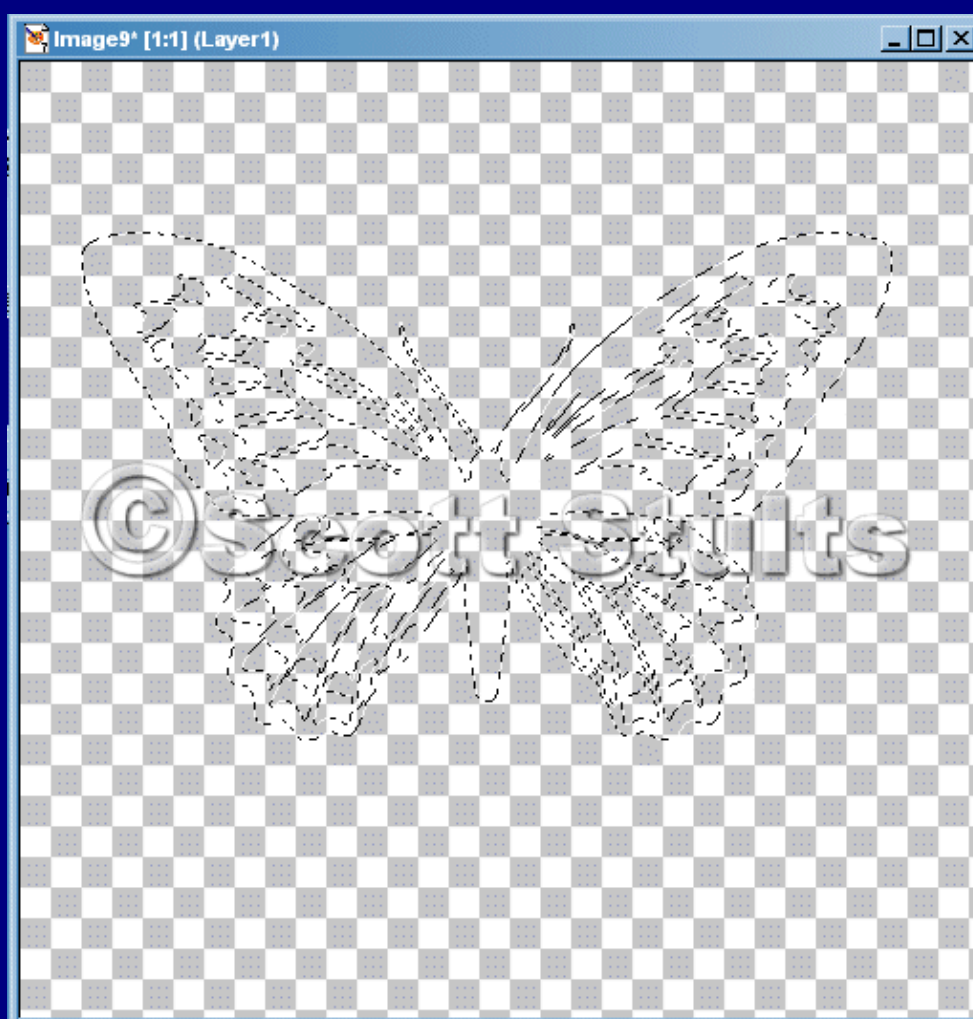

Use the setting I have below.

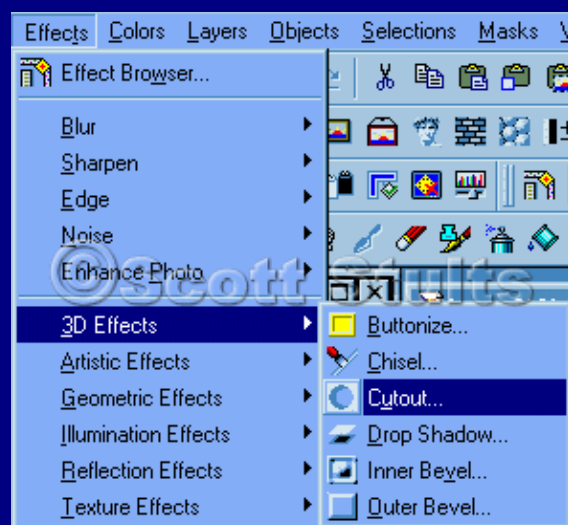

Below it what it should look like.

Cutouts

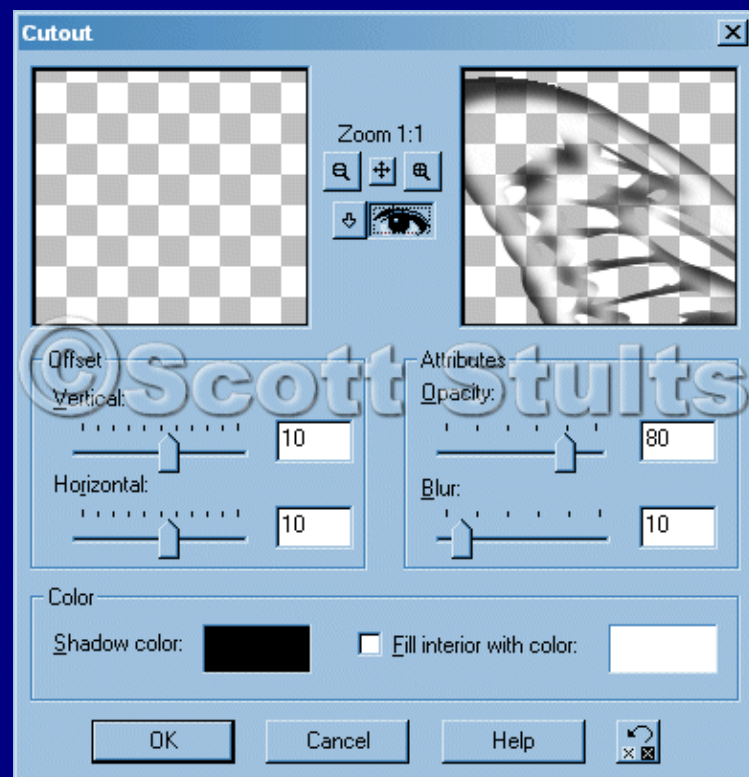

Now go to your 3D Effects / Cutout

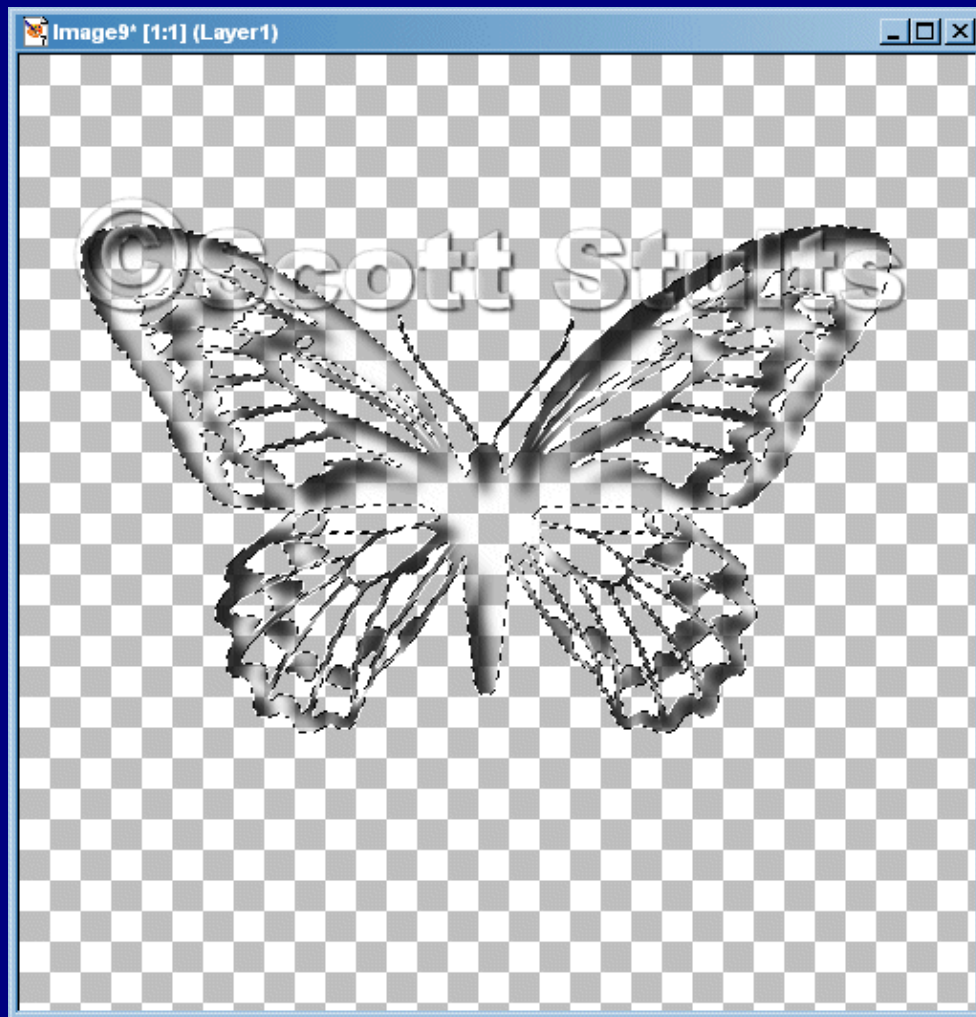

And use the settings I have in the picture below and hit OK.

Cutouts

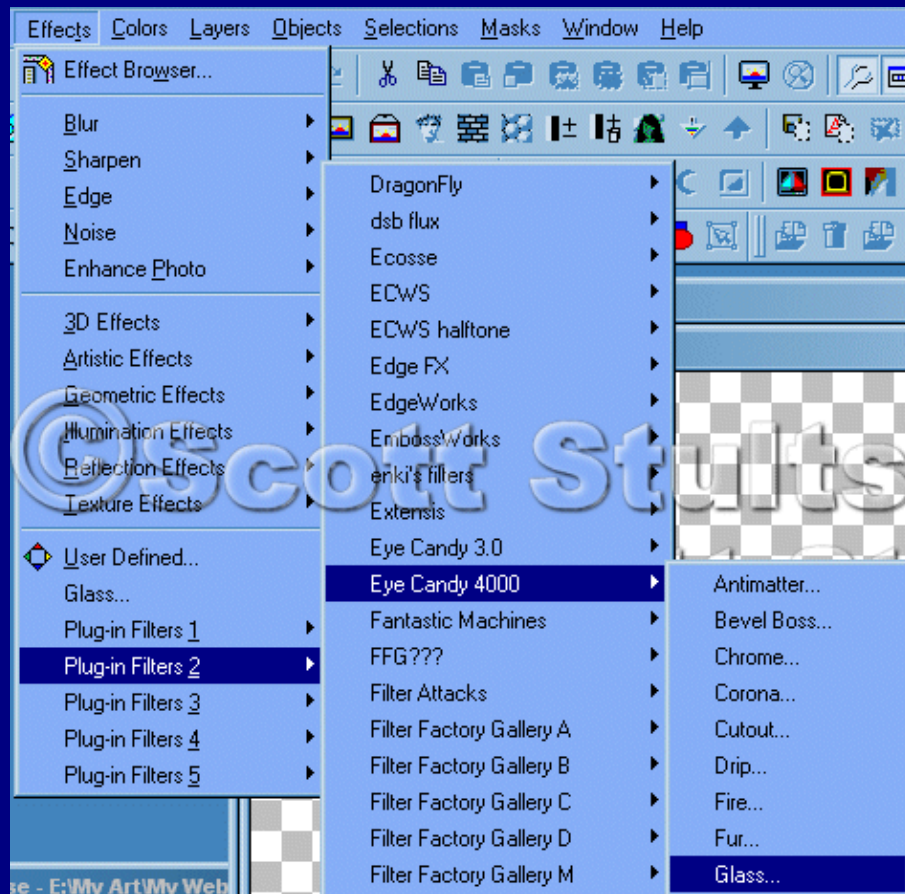

Now it should look like the picture below.

Cutouts

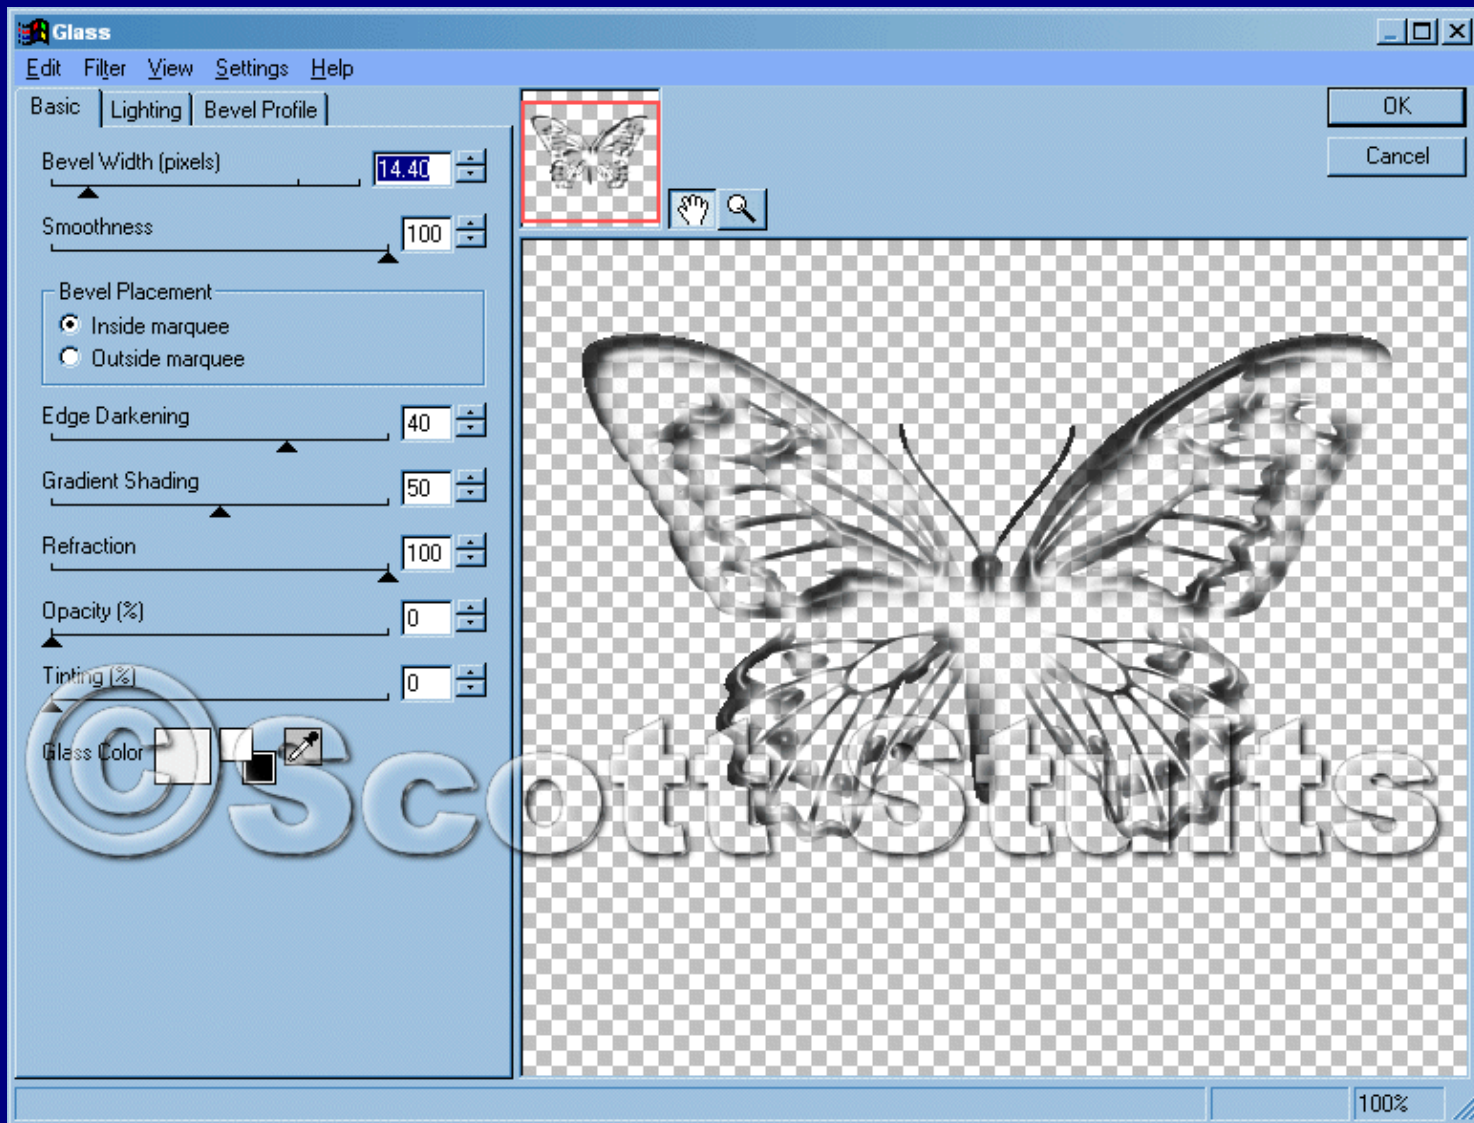

Go to Effects and find the Eye Candy 4000 then go to the Glass Effect.
NOTE: *This part you don't have to do, I just did glass effect to make my cutouts different for all the rest.*

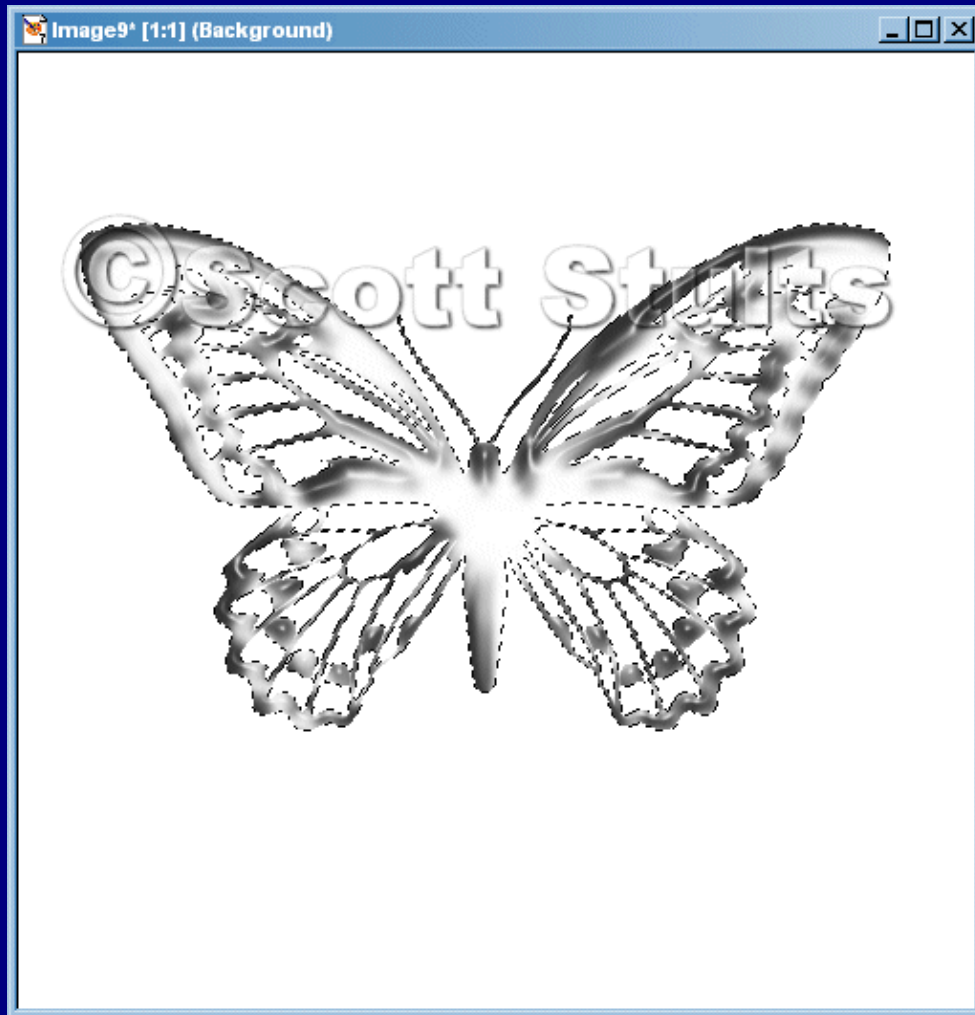

And use the settings I have here or play with the settings to fit your needs.

Cutouts

Now it should look like the one below.

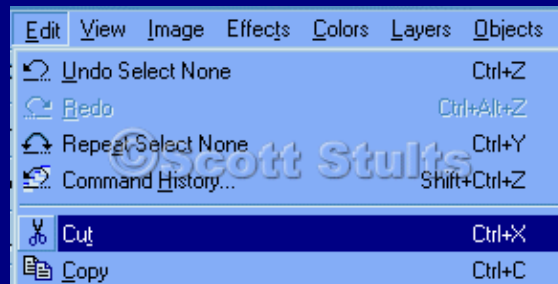

Cutouts

Now Select NONE

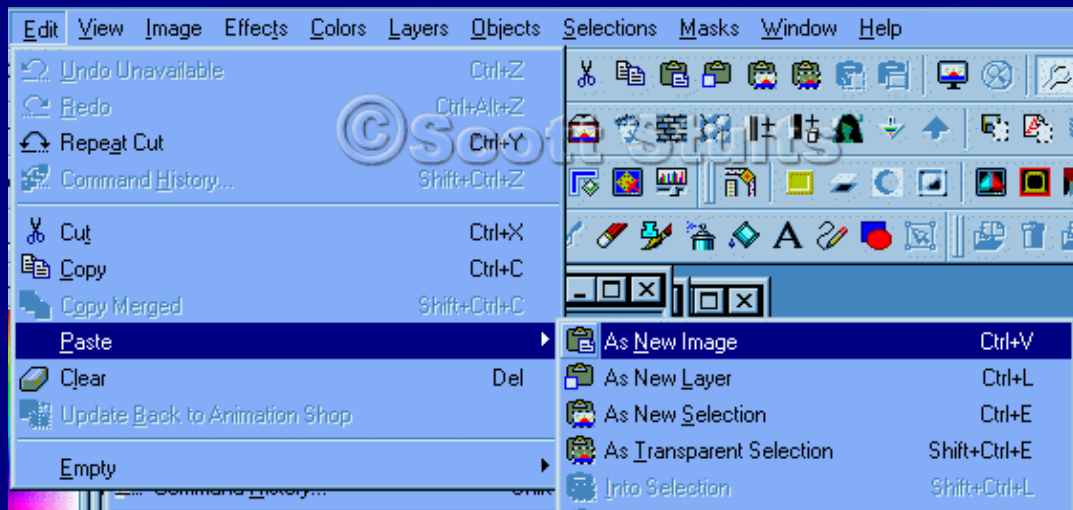

Cut or Copy the image

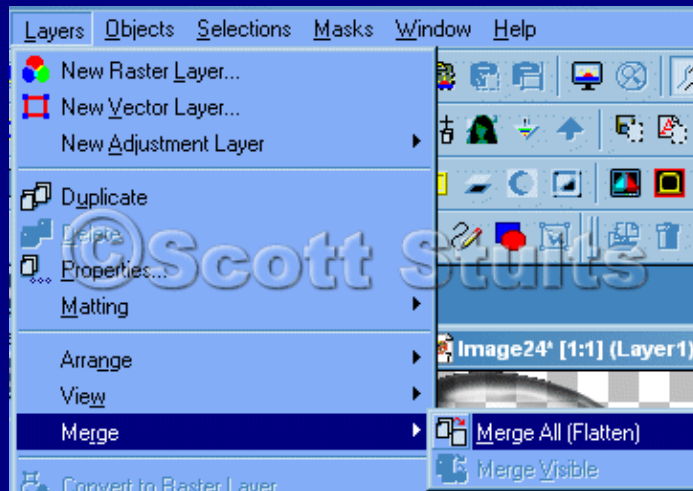

and past it a new image.

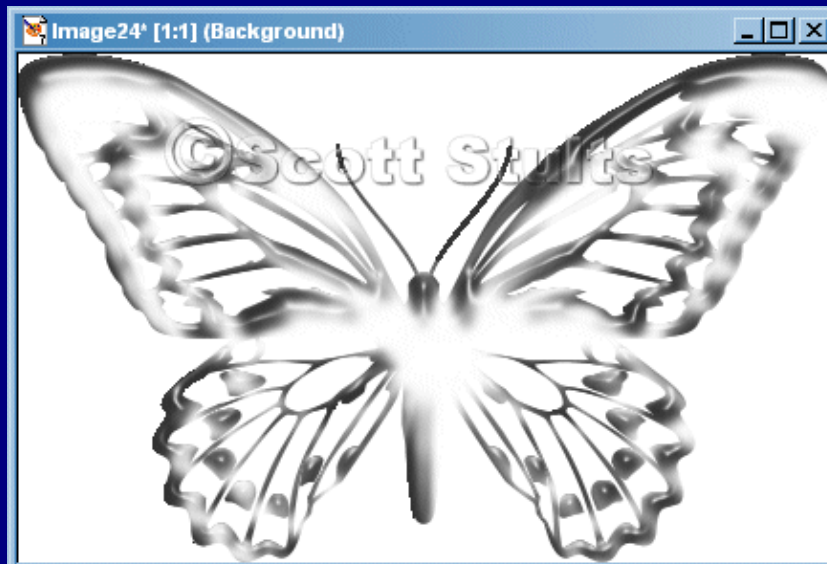

Cutouts

and then flatten it or you can keep it transparent to use a Picture Tube.

And you are all done!

Cutouts

Hope you enjoyed this tutorial!

Here's a finished one. [Click here](#)
