

Raised Affect

This tutorial is for PSP7 and is my first tutorial. So if something doesn't seem right email and I'll see what I can do to correct the problem that you're having.

All graphics are done with:

Ok, here goes nothing.....

1st. you will need this image [HERE](#)

Open the Finished_Image.jpg in PSP.

Select the whole image...
Selections / Select All
or Ctrl+A

Raised Affect

After you've done that, now go to the Inner Bevel effect.
(Effects / 3D Effects / Inner Bevel)

Raised Affect

And use these settings as you see in the above image then click ok

what it looks like so far...
(keep the whole image selected)

Raised Affect

Now got to
Selection / Modify / Contract

and use this setting

what it looks like so far
(keep it selected)

Raised Effect

Now go to the Inner Bevel again.....

and use the settings from the above image.

Raised Affect

What it should look like so far.

Now go to
(Effects / 3D Effects / Drop Shadow)

Raised Affect

Use the setting in the above image.

Now unselect it all and you're done.

If you want to see my finished Sigtag [click here](#).
