

Computer Applications

Chris Hannigan

1. I hope to learn to become comfortable using a computer and be able to confidently fix most problems with my computer.
2. I already know the basics but wish to become more knowledgeable with computers.
3. I want to learn to better organize items on my desktop and arrange them in folders according to their content

I hope to achieve at least a C in Office Applications despite it not being my favorite course I must pass to graduate high school.
