1. ORGANIZATION

This manifesto was organized with the help of people who belong to more than thirty worldwide scientific or skeptical associations from more than twenty countries. Between the organizations who help to coordinate the manifesto, we have:

- Association to Protect the Sick of Pseudoscientific Therapies: APETP – Spain
- Association of Pharmacists in Favor of Scientific Evidence – Spain
- Collectif Fakemed – France
- Comunidade Céptica Portuguesa: COMCEPT – Portugal
- Good Thinking Society – United Kingdom
- Red UNE – Spain
- Society for the Advancement of Critical Thinking: ARP-SAPC– Spain
- Skeptical Circle of Spain – Spain
- Healthwatch United – Kingdom
- Skeptica – Denmark
- Vetenskap och Folkbildning (VoF) - Sweden

For more information or to get in touch with some of the organizers worldwide, you can contact with Fernando Cervera Rodríguez at: fernando.cervera.87@gmail.com

The goals of this initiative are:

1. To gather a large number of scientists and health professionals who make it clear that neither the scientific nor health sector support the practices which are in contradiction to scientific evidence.
2. Raise awareness in the media about the problem of pseudotherapies and the position of the scientific community against them.
3. Bring the fight against these practices to a world-wide arena, since many of the laws and problems that affect patients due to pseudotherapies are larger in scope than the countries hosting the skeptics associations

The name and education of the signatories in this document will be transmitted to media, although to contact them, their agreement will be required.

2. MANIFESTO AGAINST PSEUDO-THERAPIES

Let's be clear: pseudoscience kills. And they are being used with total impunity thanks to European laws that protect them.

They kill thousands of people, with names and families. People such as Francesco Bonifaz, a 7-year-old boy whose doctor prescribed homeopathy instead of antibiotics. He died in Italy¹. People like Mario Rodríguez, who was 21 years old and was told to use vitamins to treat his cancer. He died in Spain². People like Jacqueline Alderslade, a 55-year-old woman whose homeopath told her to stop taking her asthma medication. She died in Ireland³. People like Cameron Ayres, a 6-month-old baby, whose parents did not want to give their child “scientific medicine”. He died in England⁴. People like Victoria Waymouth, a 57-year-old woman who was prescribed a homeopathic medication to treat her heart problem. She died in France⁵. People like Sofia Balyaykina, a 25-year-old woman, who had a cancer that was curable with chemotherapy but was recommended an “alternative treatment”, a mosquito bite treatment. She died in Russia⁶. People like Erling Møllehave, a 71-year-old man whose acupuncturist pierced and damaged his lung with a needle. He died in Denmark⁷. People like Michaela Jakubczyk-Eckert, a 40-year-old-woman whose therapist recommended the German New

Medicine to treat her breast cancer. She died in Germany⁸. People like Sylvia Millecam, a 45-year-old woman whose New Age healer promised to cure her cancer. She died in the Netherlands⁹.

European directive 2001/83/CE has made –and still makes– possible the daily deception of thousands of hundreds of European citizens¹⁰. Influential lobbyists have been given the opportunity to redefine what a medicine is, and now they are selling sugar to sick people and making them believe it can cure them or improve their health. This has caused deaths and will continue to do so until Europe admits an undeniable truth: scientific knowledge cannot yield to economic interests, especially when it means deceiving patients and violating their rights.

Europe is facing very serious problems regarding public health. Over-medication, multi-resistant bacteria and the financial issues of the public systems are already grave enough, without the additional problem of gurus, fake doctors or even qualified doctors claiming they can cure any disease by manipulating chakras, making people eat sugar or using “quantic frequencies”. Europe must not only stop the promotion of homeopathy but also actively fight to eradicate public health scams. More than 150 pseudo-therapies have been identified as being in use throughout Europe. Thousands of citizens lives depend on this being prevented. In fact, according to a recent research, 25.9 % of Europeans have used pseudo-therapies last year. In other words, 192 million patients have been deceived¹¹.

Some believe there is a conflict between freedom of choice for a treatment and the removal of pseudo-therapies, but this is not true. According to article 25 of the Universal Declaration of Human Rights, every person has a right to medical care. Lying to patients in order to sell them useless products that could kill them breaks their right to correct information about their health. This way, even if a citizen has a right to refuse medical treatment when he or she is properly informed, it is also true that nobody has the right to lie to obtain profit at the expense of someone else’s life. Only in a world in which lying to a sick

person would be considered ethical, could homeopathy —or any other pseudo-therapy— be allowed to continue to be sold to citizens.

Effective treatments being replaced by false ones is not the only danger of pseudo-therapies. Obvious delays in therapeutic care occur when a person gets false products instead of medication at the early stages of a disease. Many times, it is then too late by the time they get treated with proper medicine. Moreover, several of these practices have serious effects on their own and may cause damage or even death because of their side effects.

Many pseudo-therapists argue that “the other medicine” comes with side effects as well, which is indeed true. However, the difference resides in that pseudo-therapies cannot cure a disease or improve your health, and because of that patients assume risks in exchange of promises that are a scam, according to the full weight of the scientific evidence available. Lying to a sick person is not another type of medicine, it is simply lying to a sick person.

Every country has to face the pseudo-therapies issue in its own ways. Yet it is not acceptable that European laws protect the distortion of scientific facts so that thousands of citizens can be deceived or even lead to their deaths.

We, the signatories of this manifest, therefore declare that:

1. Scientific knowledge is incompatible with what pseudo-therapies postulate, as in the case of homeopathy.
2. European laws that protect homeopathy are not acceptable in a scientific and technological society that respects the right of the patients not to be deceived.
3. Homeopathy is the best known pseudo-therapy, but it is not the only one nor the most dangerous one. Others, such as acupuncture, reiki, German New Medicine, iridology, biomagnetism, orthomolecular therapy and many more, are gaining ground and causing victims.
4. Measures must be taken to stop pseudo-therapies, since they are harmful and result in thousands of people being adversely affected.
5. Europe needs to work towards creating legislation that will help stop this problem.

Europe being concerned about the misinformation phenomena but at the same time protecting one the most dangerous types of it, health misinformation, is just not coherent. This is why the people signing this manifesto urge the governments of European countries to end a problem in which the name of science is being used falsely and which has already cost too many lives.

3. FIRST SIGNATORIES

Between the **2750 signatories** who belong to **44 countries**, these first 30 are a good representation of the aim and capacitation of the signatories of the manifesto.

1

Ricardo Mexia
Physician, Portugal

President of the National Association of Public Health Doctors from Portugal. Professor at the Faculty of Medicine of the University of Lisbon and in the Department of Biomedical Sciences and Medicine of the University of Algarve.

2

Karmen Joller
Physician, Estonia

Advocate for evidence-based medicine in Estonia. Doctor of the Year (of Estonia) 2017. Board member of Estonian Society of Family Doctors. Board member of Estonian Doctors' Association.

3

Johannes Köbberling
Physician, Germany

Former President of the German Society of Internal Medicine and the European Congress of Internal Medicine. Member of the Drug Commission of the German Medical Association. He works in the Evidenzbasierte Medizin (EbM) network.

4

Bernhard-Michael Mayer
Pharmacist, Austria

Professor and Chair in Pharmacology and Toxicology at the Department of Pharmaceutical Sciences, University of Graz.

5

Louis Ide

Physician, Belgium

Former vice-president of the Belgian Senat. Secretary-general of N-VA (political group). Studied clinical pathology, tropical medicine and mycology. Elected member of the European Parliament in the 2014 elections.

6

Trine Maria Mejnert Jorgensen

Physician, Denmark

Specialist in vascular surgery. PhD in vascular surgery and still work with research within this field.

7

Arnold van Emmerik

Psychologist, Netherlands

President of the Dutch Association for Behavioural and Cognitive Therapies. Researcher and teacher in Clinical Psychology at the University of Amsterdam.

8

Tomasz Witkowski

Psychologist, Poland

PhD in psychology at the University of Wrocław. Former Research Associate at the Institute of Psychology at the University of Wrocław and the Wrocław Faculty of Social Sciences. He conducted research on social psychology and motivation at the universities of Bielefeld and Hildesheim.

9

Iria Uhía Castro

Pharmacist, Spain

PhD in Molecular Microbiology (Complutense University and CIB-CSIC, Madrid), postdoctoral positions at CIB-CSIC, Madrid and Imperial College London, London. Currently working at the Spanish Agency of Medicines and Medical Devices, AEMPS.

10

Pascal Diethelm

Economist, Switzerland

Former staff member of the World Health Organization, specialized in public health, notably in tobacco control. He has studied extensively the pseudo-science and fake-science produced by researchers paid by the tobacco industry to support its commercial interest.

11

Edzard Ernst

Physician, United Kingdom

Former researcher specialized in the study of complementary and alternative medicine. He was formerly Professor of Complementary Medicine at the University of Exeter, the first such academic position in the world.

12

François Leulier

Biologist, France

Currently Research Director at Centre National de la Recherche Scientifique (CNRS, France). Deputy director of the Institut de Génomique Fonctionnelle de Lyon at ENS de Lyon.

13

Francis Galaway
Biologist, United Kingdom

PhD in Biochemistry with six years of postdoctoral research at the Wellcome Trust Sanger Institute. His work includes projects on the origins of malaria in humans, how parasites invade our cells and how to block them with drugs, the communication between cells, and the role of mutations in disease.

14

Maurizio Dapor
Physicist, Italy

Head of the Interdisciplinary Laboratory for Computational Science (LISC) at the European Centre for Theoretical Studies in Nuclear Physics and Related Areas (ECT) (Trento). National Scientific Habilitation to Full Professor in Theoretical Physics of Matter and in Experimental Physics of Matter.

15

Jacques Milliez
Physician, France

Former Professor of the Universities of Paris VI, Head of the Obstetric Gynecology Department at Saint Antoine Paris Hospital, 2006-2009. President of the Ethics Committee of the International Federation of Obstetric Gynecology FIGO, member of the Royal College of Obstetricians and Gynecologists, RCOG, London. Member of the National Academy of Medicine, of the National Academy of Surgery.

16

Philippe Vandekerckhove
Physician, Belgium

CEO of the Belgian Red Cross, research on blood platelets and on evidence-based practice.

17

Francesco Pata
Physician, Italy

General surgery specialist involved in international research work on colorectal surgery and emergency surgery. Founder of the ItSurg, the first surgical research team for residents and students in Italy. Co-Coordinator of EuroSurg, the first pan-European research team in surgery for medical students.

18

Alan Tennyson
Psychologist, Ireland

Former secretary of the Division of Behaviour Analysis, of the Psychology Society of Ireland. His current work is to treat challenging behaviour in children diagnosed with intellectual disabilities, including autism.

19

Timothy Zammit
Mathematician, Malta

Deputy chairperson, treasurer and membership secretary of SICEC (Society for Investigating the Credibility of Extraordinary Claims) based in Malta.

20

William M. London
Biologist, United States

Professor in the Department of Public Health at California State University, Los Angeles. Editor of the Quackwatch's Consumer Health Digest. Writer on the Skeptical Inquirer. His main area of study is medical pseudoscience.

21

Natalia Pasternak
Biologist, Brazil

President of the first Brazilian institute for the promotion of public policies based on scientific evidence, the Instituto Questão de Ciencia. She writes about popular science and pseudosciences in the newspaper O Globo.

22

Olivier Bernard
Pharmacist, Canada

His main activity is science communication. He hosts a show in the Canadian television, Les aventures du pharmacien, denouncing ineffective or dangerous treatments.

23

María Paz Bertoglia Arredondo
Epidemiologist, Chile

Vice president of the Chilean Society of Epidemiology and member of the advisory committee on Immunizations of the Chilean Society of Infectology.

24

Sanal Edamaruku
Journalist, India

Indian television host and skeptic. He is the president and founder of the Rationalist International organization and is also the president of the Indian Rationalist Association. Fellow of Committee for Skeptical Inquiry (Center for Inquiry, USA), Honorary associate of Rationalist Association, UK, Honorary associate of New Zealand Association of Rationalists and Humanists. Political refugee in Finland persecuted for defending critical thinking.

25

El idrissi Slitine
Physician, Morocco

University professor at the Faculty of Medicine of Marrakech in Morocco. Teach pediatric cardiology and neonatology and practice medicine at the Mohammed VI University Hospital in Marrakesh.

26

Luis Beas
Physician, Mexico

Editor-in-Chief of the Mexican Urology Journal of the Mexican Society of Urology.

27

Evgeny Alexandrov
Physicist, Russia

Academician of the Russian Academy of Sciences. Head of the laboratory of the Physicotechnical Institute (St. Petersburg) and the Chairman of the Commission of the Russian Academy of Sciences to combat pseudoscience.

28

Giacomo Bertacchi
Physician, United Arab Emirates

Consultant General and Breast Radiologist at Sheikh Shakhbout Medical City (in partnership with Mayo Clinic), Abu Dhabi. Teacher at Abu Dhabi Radiology Residency Program.

29

Humberto López-Fernández
Physician, Venezuela

Exclusive dedication breast surgeon, specializing in breast cancer - President Venezuelan Institute of Mastology - Librarian Board of Directors of the Venezuelan Mastology Society.

30

Luis María Norberto Ferrucci
Physician, Argentina

Specialist in Pneumology, Former President of the Society of Pneumology of Córdoba, University Professor in Medicine.

5. OTHER LANGUAGES

MANIFESTO IN CATALAN

Siguem clars: les pseudociències maten. I no només això, sinó que són practicades amb impunitat gràcies a lleis europees que les protegeixen.

Maten a milers de persones, amb noms i cognoms. Com Francesco Bonifaz, de 7 anys, a qui el seu metge li va donar homeopatia en lloc d'antibiòtics. Va morir a Itàlia [1]. Com Mario Rodríguez, de 21 anys, que va ser tractat amb vitamines per al seu càncer. Va morir a Espanya [2]. Com Jacqueline Alderslade, de 55 anys, un homeòpata li va dir que deixara la seua medicació per l'asma. Va morir a Irlanda [3]. Com Cameron Ayres, de 6 mesos, els seus pares no van voler donar-li "medicina científica". Va morir a Anglaterra [4]. Com Victòria Waymouth, de 57 anys, a ella li van receptar un medicament homeopàtic per tractar els seus problemes cardíacs. Va morir a França [5]. Com Sofia Balyaykina, de 25 anys, que tenia un càncer curable amb quimioteràpia, però li van recomanar un "tractament alternatiu" de picades de mosquits. Va morir a Rússia [6]. Com Erling Møllehave, de 71 anys, en el seu cas un acupuntor li va travessar el pit amb una agulla i va danyar el seu pulmó. Va morir a Dinamarca [7]. Com Michaela Jakubczyk-Eckert, de 40 anys, un terapeuta li va recomanar la Nova Medicina Germànica per tractar el seu càncer de pit. Va morir a Alemanya [8]. Com Sylvia Millecam, de 45 anys, la seua guaridora de la Nova Era li va prometre curar el seu càncer. Va morir als Països Baixos [9].

La directiva europea 2001/83 / CE ha permès —i encara permet— que centenars de milers de ciutadans europeus siguin enganyats diàriament. [10] Se'ls ha ofert a importants lobbies la possibilitat de redefinir què és un medicament, i ara venen sucre a persones malaltes i els fan creure que pot curar-los o millorar la seua salut. Això ha ocasionat morts, i ho seguirà fent, fins que Europa admeta una realitat indiscutible: el coneixement científic no pot doblegar-se davant els interessos econòmics d'uns quants, sobretot si això implica enganyar pacients i vulnerar els seus drets.

Europa s'enfronta a altres problemes de salut pública molt seriosos. La medicalització excessiva de la població, la generació de bacteris multiresistents o els problemes de finançament dels sistemes públics de sanitat ja són massa greus com per afegir, a més, la presència de gurus, falsos metges o fins i tot metges titulats que diuen poder curar el càncer (o qualsevol altra malaltia) manipulant *chakras*, menjant sucre o aplicant "freqüències quàntiques". Europa no només ha

d'aturar el foment de l'homeopatia, sinó que ha de lluitar de manera activa per eradicar les estafes de salut pública que impliquen les més de 150 pseudoteràpies presents al nostre territori. La vida de milers de ciutadans depèn d'això. De fet, segons estudis recents [11], el 25.9% dels europeus han utilitzat pseudoteràpies en l'últim any, és a dir, 192 milions de pacients enganyats.

Hi ha la creença que hi ha un conflicte entre la llibertat d'elecció d'un tractament mèdic i l'eliminació de pseudoteràpies, però no és cert. Segons l'article 25 de la Declaració Universal dels Drets Humans, tota persona té dret a l'assistència mèdica. Mentir als malalts per vendre'ls productes inservibles que poden matar-los incompleix el dret dels ciutadans a rebre informació veraç sobre la seua salut. Així que, encara que un ciutadà té dret a renunciar a un tractament mèdic estant correctament informat, també és cert que ningú té dret a dir-li mentides per obtenir lucre econòmic a costa de la seua vida. Només en un món on consideréssim que mentir a un malalt per obtenir els seus diners fora ètic, podríem permetre que es segueixi venent homeopatia —o qualsevol altra pseudoteràpia— als ciutadans.

El perill de les pseudociències no només està en la substitució de tractaments efectius per altres enganyosos. A més, hi ha un obvi retard en l'atenció terapèutica en tots aquells malalts que, davant els primers signes d'una malaltia, reben productes falsos en lloc de medicaments. Moltes vegades, quan arriben a la medicina, ja és massa tard. També, diverses d'aquestes pràctiques tenen efectes greus per si mateixes i poden produir danys, i fins i tot la mort, a causa dels seus efectes secundaris.

Molts pseudoterapeutes argumenten que les pràctiques de "l'altra medicina" també tenen efectes secundaris, i és veritat. Però la diferència és que les pseudoteràpies no poden curar o millorar una malaltia, assumint el pacient un risc a canvi de promeses que, amb tot el pes de l'evidència científica, són un engany. Mentir a un malalt no és un altre tipus de medicina, és mentir a un malalt.

Cada país ha d'enfrontar-se al problema de les pseudoteràpies a la seua manera. No obstant això, no és admissible que les lleis europees emparen la tergiversació de la realitat científica perquè milers de ciutadans siguin enganyats, i fins i tot morin.

Així doncs, els signants d'aquest manifest declaren que:

1. El coneixement científic és incompatible amb els postulats de les pseudoteràpies, com el cas de l'homeopatia.
2. Les lleis europees que protegeixen i emparen l'homeopatia són inadmissibles en una societat científicotecnològica que respecta el dret dels pacients a no ser enganyats.
3. L'homeopatia és la pseudoteràpia més coneguda, però no és l'única, ni tampoc la més perillosa. Altres com l'acupuntura, el *reiki*, la Nova Medicina Germànica, el biomagnetisme, la iridologia, la teràpia ortomolecular i un llarg etcètera, estan guanyant terreny i causant víctimes.
4. Cal prendre mesures per frenar les pseudoteràpies perquè no són innòcues i produeixen milers d'afectats.
5. Europa ha de treballar en la direcció de crear lleis que ajuden a aturar aquest problema.

No és coherent que des d'Europa s'elevi la preocupació pel fenomen de la desinformació i alhora s'empare un dels seus tipus més perillosos: la desinformació en temes de salut. Per tot això, les persones que signen aquest manifest animen els governs dels països als quals pertanyen a posar fi a un problema que utilitza falsament el nom de la ciència i que ja li ha costat la vida a massa gent.

MANIFESTO IN DEUTSCH

Um es deutlich zu sagen: Pseudomedizin tötet. Und sie kann völlig straffrei betrieben werden, dank der europäischen Gesetzgebung, die sie unter Schutz stellt.

Sie tötet Tausende von Menschen, die Namen und Familien haben. Menschen wie Francesco Bonifaz, ein siebenjähriger Junge, dessen Arzt Homöopathika statt Antibiotika verschrieben hatte. Er starb in Italien [1]. Menschen wie Mario Rodríguez; er war 21 Jahre alt, als ihm geraten wurde, seinen Krebs mit Vitaminen zu behandeln. Er starb in Spanien [2]. Menschen wie Jacqueline Alderslade, eine 55-jährige Frau, der ihr Homöopath riet, ihre Asthma-Medikamente nicht mehr zu nehmen. Sie starb in Irland [3]. Menschen wie Cameron Ayres, ein sechs Monate altes Baby, dem seine Eltern keine „wissenschaftliche Medizin“ geben wollten. Er starb in England [4]. Menschen wie Victoria Weymouth, eine 57-jährige Frau, der homöopathische Mittel für ihre Herzprobleme verordnet wurden. Sie starb in Frankreich [5]. Menschen wie Sofia Balyaykina, eine 25-jährige Frau, die an einem mit Chemotherapie heilbaren Krebs erkrankt war, der aber eine „alternative Therapie“ empfohlen wurde, eine Mückenstichtherapie. Sie starb in Russland [6]. Menschen wie Erling Møllehave, ein 71-jähriger Mann, dem sein Akupunkteur mit einer Nadel in die Lunge stach und sie verletzte. Er starb in Dänemark [7]. Menschen wie Michaela Jakubczyk-Eckert, eine 45-jährige Frau, deren Therapeut ihr zur Behandlung ihres Brustkrebses die Germanische Neue Medizin empfahl. Sie starb in Deutschland [8]. Menschen wie Sylvia Millemcam, eine 45-jährige Frau, deren New-Age-Heiler ihr versprach, ihren Krebs heilen zu können. Sie starb in den Niederlanden [9].

Die Europäische Direktive 2001/83/CE ermöglichte – und tut es bis heute -, dass jeden Tag Hunderte und Tausende europäischer Bürgern getäuscht werden können [10]. Einflussreiche Interessengruppen bekamen die Möglichkeit, neu zu definieren, was ein Arzneimittel ist, und jetzt verkaufen sie Zucker an kranke Menschen und vermitteln ihnen die Überzeugung, dass sie davon geheilt werden könnten oder einen gesundheitlichen Nutzen hätten. Dies hat zu Todesfällen geführt und wird es weiterhin tun, bis Europa die unwiderlegbare Tatsache zugibt: Wissenschaftliche Erkenntnis darf sich nicht ökonomischen Interessen unterordnen, besonders, wenn dies bedeutet, Patienten zu täuschen und ihre Rechte zu verletzen.

Europa hat derzeit viele ernsthafte Probleme im Gesundheitssystem. Übertherapien, multiresistente Keime oder die finanziellen Schwierigkeiten sind bereits schwerwiegend genug, und man braucht nicht zusätzlich noch Wunderheiler, Heilpraktiker und sogar approbierte Ärzte, die behaupten, sie könnten jede Krankheit durch Manipulation der Chakren heilen, die Menschen Zucker einnehmen lassen oder „Quantenfrequenzen“ anwenden. Europa muss nicht nur die Förderung der Homöopathie beenden, sondern muss auch aktiv den Patientenbetrug im öffentlichen Gesundheitswesen bekämpfen, der in unserem Gebiet mehr als 150 pseudomedizinische Therapien betrifft. Tausende von Menschenleben hängen davon ab. Tatsächlich haben nach aktuellen Untersuchungen 25,9 % der Europäer im letzten Jahr Therapien der Pseudomedizin genutzt. Mit anderen Worten: 192 Millionen Menschen wurden betrogen [11].

Manche Leute sind der Auffassung, dass die Therapiefreiheit im Widerspruch zu der Bekämpfung der Pseudomedizin stehe, aber dies trifft nicht zu. Nach Artikel 25 der UN-Deklaration der Menschenrechte hat jeder Mensch einen Anspruch auf medizinische Versorgung. Patienten zu belügen, um ihnen nutzlose Produkte zu verkaufen, was zum Tode führen kann, verletzt ihr Recht auf zutreffende Information zu ihrer Gesundheit. Daraus folgt, dass jeder Mensch das Recht hat, eine Therapie aufgrund zutreffender Information abzulehnen, aber ebenso, dass niemand das Recht hat, mittels Lügen Profit auf Kosten des Lebens anderer Menschen zu ziehen. Es ist unethisch, Homöopathie oder sonstige Pseudomedizin an kranke Menschen zu verkaufen, so als könnten damit ihre Gesundheitsprobleme wirksam behandelt werden.

Dass wirksame Therapien durch unwirksame ersetzt werden können, ist nicht die einzige Gefahr der Pseudomedizin. Ganz offensichtlich kommt es zu Therapieverzögerungen, wenn jemand in einem frühen Krankheitsstadium unwirksame Produkte anstelle von Arzneimitteln erhält. Oftmals ist es dann schon zu spät, wenn eine wirksame Therapie begonnen wird. Weiterhin haben einige dieser Praktiken eigene ernsthafte Nebenwirkungen, die zu Verletzungen oder gar zum Tod führen können.

Viele Pseudomediziner argumentieren, dass bei „der anderen Medizin“ ebenfalls Nebenwirkungen auftreten, was sicher zutreffend ist. Jedoch besteht der Unterschied darin, dass die Pseudomedizin keine Krankheit heilen oder die Gesundheit verbessern kann, und dass Patienten daher Risiken zugunsten von Heilsversprechen eingehen, die sich nach aller wissenschaftlichen Evidenz als Humbug erweisen. Kranke Menschen zu belügen ist keine andere Art von Medizin, sondern schlicht ein Belügen von kranken Menschen.

Jedes Land muss das Problem der Pseudomedizin auf seine eigene Weise angehen. Dennoch ist es nicht zu akzeptieren, dass die europäische Gesetzgebung das Verdrehen wissenschaftlicher Tatsachen schützt, wodurch Tausende ihrer Bürger getäuscht und sogar zu Tode gebracht werden können.

Wir, die Unterzeichner dieses Manifestes, erklären daher:

1. Die wissenschaftliche Erkenntnis ist unvereinbar mit den Postulaten der Pseudomedizin, wie im Fall der Homöopathie.
2. Europäische Gesetze, die die Homöopathie schützen, sind in einer auf Wissenschaft und Technik beruhenden Gesellschaft nicht akzeptabel, in der die Rechte der Patienten darauf, nicht betrogen zu werden, respektiert werden.
3. Homöopathie ist die bekannteste Pseudomedizin, aber nicht die einzige oder die gefährlichste. Andere, wie Akupunktur, Reiki, Germanische Neue Medizin, Irisdiagnostik,

Bioresonanz, orthomolekulare Therapie und viele andere breiten sich vermehrt aus und fordern ihre Opfer.

4. Es müssen Maßnahmen ergriffen werden, die Pseudomedizin zu stoppen, denn sie ist nicht harmlos und führt zur Schädigung von Tausenden von Patienten.
5. Europa muss daran arbeiten, eine Gesetzgebung aufzubauen, die hilft, dieses Problem zu beseitigen.

Dass Europa sich einerseits besorgt über das Phänomen der Falschnachrichten zeigt, gleichzeitig aber die gefährlichsten davon, gesundheitliche Fehlinformationen, schützt, passt nicht zusammen. Deshalb fordern die Unterzeichnenden dieses Manifests von den Regierungen der europäischen Länder, das Problem zu beenden, in dem man sich fälschlicherweise auf die Wissenschaft bezieht und das schon zu viele Menschen das Leben gekostet hat.

MANIFESTO IN DUTCH

Pseudowetenschappen zijn dodelijk, laat daar geen misverstand over bestaan. En ze worden volkomen straffeloos toegepast, dankzij beschermende wetten.

Ze doden duizenden mensen die met naam en toenaam bekend zijn. Mensen zoals Bonifaz, een jongetje van zeven. De dokter schreef homeopathie voor, in plaats van antibiotica. Hij stierf in Italië. [1] Mensen als Mario Rodríguez, 21 jaar oud. Hem werd gezegd vitamines te gebruiken om zijn kanker te genezen. Hij stierf in Spanje. [2] Mensen als Jacqueline Alderslade. Zij was 55 en haar homeopaat zei haar dat ze haar medicijn tegen astma niet meer moest gebruiken. Ze stierf in Ierland. [3] Mensen als baby Cameron Ayres (zes maanden). Zijn ouders wilden hun kind geen 'wetenschappelijke geneesmiddelen' geven. Hij stierf in Engeland. [4]. Mensen als Victoria Waymouth (57). Ze kreeg homeopathische medicatie voorgeschreven voor haar hartkwaal. Ze stierf in Frankrijk. [5] Mensen als Sofia Balyaykina (25). Ze had een vorm van kanker die goed met chemotherapie behandeld kan worden. Ze kreeg een 'alternatieve behandeling; bestaande uit muggenbeten. Ze stierf in Rusland. [6] Mensen als Erling Møllehave, een man van 71, wiens acupuncturist in zijn longen prikte. Hij stierf in Denemarken. [7] Mensen als Michaela Jakubczyk-Eckert, een vrouw van 40. Haar therapeut propageerde de Nieuw Duitse Geneeskunde voor haar borstkanker. Ze stierf in Duitsland. [8] Mensen als de actrice Sylvia Millecam, die onder leiding van een New Age genezeres genezing zocht voor borstkanker. Ze stierf in Nederland, op 45-jarige leeftijd [9].

De Europese richtlijn 2001/83/CE regelt de productie, controle en verkoop van geneesmiddelen, maar maakt uitzonderingen voor homeopathische middelen [10]. Machtige lobby's hebben inspraak gehad in de definitie wat een geneesmiddel is, en die verkopen nu suiker aan zieke mensen, en doen ze geloven dat ze daar beter van kunnen worden, of dat hun gezondheid erop vooruit gaat. Dit heeft doden veroorzaakt, en zal dat blijven doen totdat Europa de waarheid onder ogen ziet: wetenschappelijke kennis mag niet buigen voor economische belangen, zeker niet als dat betekent dat patiënten bedrogen worden en dat hun rechten geschonden worden.

Europa heeft te maken met ernstige problemen in de gezondheidszorg. Zo heb je overmedicalisatie, multiresistente bacteria, en er zijn problemen met financiering. Die problemen zijn al ernstig genoeg, en daar kunnen we geen goeroes en nepdokters bij gebruiken. En trouwens ook geen echte dokters die beweren dat ze zieken kunnen genezen door chakra's te manipuleren, mensen suiker te laten innemen of door kwantumfrequenties toe te passen. Europa moet niet alleen stoppen met het bevorderen van homeopathie, maar moet ook actief optreden tegen bedrog in de gezondheidszorg, die op het ogenblik meer dan 150 pseudotherapieën omvat. Duizenden levens van burgers zijn daarvan afhankelijk. Recent onderzoek suggereert dat wel een kwart van de Europeanen vorig jaar pseudotherapieën heeft gebruikt. Dat zijn bijna 200 miljoen patiënten. [11]

Sommigen geloven dat afschaffen van pseudotherapieën conflicteert met de keuzevrijheid. Dat conflict is er niet. Volgens artikel 25 van de Universele Declaratie van de Rechten van de Mens heeft iedereen recht op medische zorg. Liegen tegen zieken om ze waardeloze producten te verkopen die zelfs dodelijk kunnen zijn, is een schending van het recht op goede informatie over je gezondheid.

Dus, hoewel een burger het recht heeft medische behandeling te weigeren na goede informatie gekregen te hebben, heeft niemand het recht te liegen om daarmee winst te maken ten koste van iemands leven. Alleen in een wereld waarin het ethisch geaccepteerd zou zijn om zieken voor te liegen, zouden we de verkoop van homeopathie of een andere pseudotherapie kunnen laten voortduren.

Het gevaar van een pseudotherapie zit 'm er niet alleen in dat die een effectieve behandeling vervangt. Als iemand in het eerste stadium van een ziekte onjuiste informatie krijgt, kan die daardoor te laat beginnen met een effectieve behandeling. Vaak is het dan al te laat. En bovendien hebben diverse van deze praktijken eigen ernstige bijwerkingen, die ernstige gezondheidsschade en zelfs de dood tot gevolg kunnen hebben.

Veel pseudotherapeuten beweren dat 'de andere geneeskunde' ook bijwerkingen heeft. Dat is correct. Maar het verschil is dat de pseudo's niet kunnen genezen of de gezondheid verbeteren. Patiënten accepteren risico's in ruil voor de belofte van een goede kans op herstel. Maar bij de pseudo's zijn dat loze beloften, te oordelen naar de beschikbare wetenschappelijke gegevens. Liegen tegen een zieke is niet een ander soort geneeskunde, het is gewoon liegen tegen een zieke.

Elk land moet op zijn eigen manier omgaan met het probleem van pseudotherapieën. Het is echter onacceptabel dat Europese wetten bescherming bieden aan de verdraaiing van wetenschappelijke feiten, met als gevolg dat duizenden burgers mogen worden bedrogen en daardoor zelfs sterven.

Wij, de ondertekenaars van dit manifest, verklaren daarom dat

1. De wetenschap is in strijd met wat de pseudotherapieën beweren, zoals in het geval van homeopathie.
2. Europese wetten die homeopathie beschermen zijn ontoelaatbaar in een wetenschappelijke en technologische maatschappij die het recht van patiënten om niet te worden bedrogen, respecteert.
3. Homeopathie is de best bekende pseudotherapie, maar niet de enige en ook niet de gevaarlijkste. Andere, zoals acupunctuur, reiki, Nieuwe Germaanse Geneeskunde, iridologie, biomagnetisme, orthomoleculaire therapie en vele andere zijn in opkomst en veroorzaken slachtoffers.

4. Maatregelen moeten genomen worden om pseudotherapieën te stoppen. Ze zijn niet onschadelijk en duizenden mensen ondervinden er schade van.
5. Europa moet zich inspannen om wetgeving te ontwikkelen die een halt toeroept aan dit probleem.

Europa maakt zich zorgen over het voorkomen van misinformatie, maar het is dan onlogisch om een van de gevaarlijkste vormen van misinformatie, namelijk misinformatie over gezondheid, te beschermen. Dit is de reden dat de ondertekenaars van dit manifest de regeringen van de Europese landen oproepen om aan dit probleem een eind te maken. De naam van de wetenschap wordt misbruikt, en dat heeft al aan te velen het leven gekost.

MANIFESTO IN ESTONIAN

Ütleme otse välja: ebaravi tapab. Euroopa riikide seadused kaitsevad ebaravi, seetõttu saab sel alal tegutseda karistamatult.

Ebaravi tapab tuhandeid inimesi – ja igal ohvril on nimi ning perekond. Näiteks Francesco Bonifaz, 7-aastane poiss, kellele „arst“ kirjutas antibiootikumide asemel homöopaatilist ravimit. Ta suri Itaalias [1]. Näiteks 21-aastane Mario Rodríguez, kellele soovitati vähiraviks vitamiine. Ta suri Hispaanias [2]. Näiteks Jacqueline Alderslade, 55-aastane naine, kellel homöopaat soovitas loobuda astmaravimitest. Ta suri Iirimaa [3]. Näiteks Cameron Ayres, kuuekuune imik, kelle vanemad ei tahtnud oma last usaldada tõenduspõhise meditsiini hoolde. Ta suri Inglismaal [4]. Näiteks Victoria Waymouth, 57-aastane naine, kellele kirjutati homöopaatilisi ravimeid südamehaiguse raviks. Ta suri Prantsusmaal [5]. Näiteks Sofia Balyaykina, 25-aastane naine, kellel oli keemiaravile alluv vähk, kuid talle soovitati alternatiivina nn sääseravi. Ta suri Venemaal [6]. Näiteks Erling Møllehave, 71-aastane mees, kellele nõelravispetsialist surus nõela kopsu. Ta suri Taanis [7]. Näiteks Michaela Jakubczyk-Eckert, 40-aastane naine, kellele ravitseja soovitas rinnavähi raviks nn Saksa uut meditsiini (Germanische Neue Medizin). Ta suri Saksamaal [8]. Näiteks Sylvia Millicam, 45-aastane naine, kelle new age'i ravitseja lubas vähist terveks ravida. Ta suri Hollandis [9].

Euroopa direktiiv 2001/83/CE võimaldas – ja võimaldab siiani! – petta Euroopa riikide sadu tuhandeid kodanikke [10]. Mõjukatele lobistidele on antud võimalus ümber sõnastada meditsiini olemus, mis lubab haigele inimesele müüa suhkrut ja panna ta uskuma, et sellest tema tervis paraneb. Selline teguviis on põhjustanud inimeste surma ja see jätkub, kuni Euroopa tunnistab kibedat tõde: teadus jääb alla majandushuvidele, mis omakorda võib tähendada patsientide petmist ja nende õiguste rikkumist [11].

Euroopa tervishoiu ees seisavad väga tõsised probleemid. Üleravimine, multiresistentsed bakterid ja tervishoiusüsteemide rahastusprobleemid mõjuvad niigi rängalt. Meile pole vaja lisamuresid, mida tekitavad gurud, võltsarstid ja isegi klassikalise haridusega arstid, kes väidavad, et suudavad ravida kõiki haigusi tšakrate mõjutamise, suhkrupillide või „kvantsagedustega“. Peale homöopaatia peab Euroopa aktiivselt võitlema ka rahva tervist kahjustavate pettuste vastu. Kogu Euroopas on praegu kasutusel rohkem kui 150 ebaravimeetodit. Nende lubamine võib kaasa tuua tuhandete

inimeste surma. Tegelikult on näidatud, et viimase aasta jooksul on ebaravi kasutanud 25,9% eurooplastest. Täpsemalt: petta on saanud 192 miljonit patsienti.

Valitseb uskumus, et ebaravi kõrvaldamine piirab inimese valikuvabadust ravimeetodi valikul. Kuid see pole nii! Inimõiguste ülddeklaratsiooni 25. artikkel ütleb, et igal inimesel on õigus arstiabile. Kasutute preparaatide müümiseks valetamine võib inimese tappa ja rikub tema õigust saada tõepärasest terviseinfot. Isegi kui inimesel on õigus arstibist keelduda eeldusel, et teda on sellega kaasnevast korrektselt teavitatud, ei ole mitte kellelgi õigust kellegi teise elu hinnaga kasumit teenida. Homöopaatilisi preparaate müüa või ükskõik millist ebaravimeetodit viljeleda lubatakse vaid maailmas, kus haigele inimesele valetamist peetakse eetiliseks.

Tõhusate ravimeetodite asendamine kasutute ravimitega ei ole ainus ebaraviga kaasnev oht. Kui inimene saab haiguse varajases staadiumis mitte ravimeid, vaid „ravi“ kasutute meetoditega, lükkub efektiivse arstiabi saamine edasi. Liiga sageli juhtub, et õige ja toimiv ravi jääb hiljaks. Veelgi enam, paljudel ebaravimeetoditel on rasked kõrvaltoimed, mis võivad põhjustada tervisekahjustusi ja isegi surma.

Paljud ebaravi viljelejad ütlevad, et ka tavameditsiinis kasutatavatel meetoditel on kõrvaltoimed – ja see on tõsi. Erinevus seisnebki selles, et ebaravimeetoditega ei ole võimalik haigust välja ravida ega tervist parandada, ning ka selles, et patsient võtab endale riski lubaduste alusel, mis kõiki olemasolevaid teaduslikke tõendeid arvestades on valelikud. Haigele inimesele valetamine ei ole ravimeetod, vaid lihtsalt haigele inimesele valetamine.

Iga riik peab ebaraviga ise hakkama saama. Siiski ei või aktsepteerida seda, et Euroopa seadused lubavad teaduslikke fakte moonutada ja tuhanded inimesed saavad petta või isegi surevad.

Manifestile alla kirjutanud deklareerivad

1. Ebaravi, näiteks homöopaatia, ei ole kooskõlas tänapäevaste teaduslike arusaamadega.
2. Tänapäevases, teadusel ja tehnoloogial põhinevas ühiskonnas tuleb austada patsientide õigust saada tõepärasest infot ja tõenduspõhist ravi. Seetõttu ei saa aktsepteerida Euroopa seadusi, mis kaitsevad homöopaatiat.
3. Homöopaatia on kõige laiemalt levinud ebaravi, kuid see pole kõige ohtlikum. Ka teised, näiteks akupunktuur, reiki, nn Saksa uus meditsiin, iridoloogia, biomagnetism, ortomolekulaarne teraapia ja paljud muud ebaravimeetodid leiavad üha suuremat kõlapinda ja toovad kaasa inimohvreid.
4. Ebaravi pidurdamiseks tuleb tarvitusele võtta abinõud, sest see kahjustab tuhandete inimeste tervist.
5. Euroopa peab seadma eesmärgi pidurdada ebaravi levikut õigusaktidega. Euroopa on mures väärinfo leviku pärast, kuid samal ajal kaitseb kõige ohtlikumaid väärinfo vorme – siin on suur vastuolu! Seetõttu soovivad manifestile alla kirjutanud inimesed teha lõpp teaduse väärkasutusel rajanevatele ravimeetoditele, mis on kaasa toonud liiga palju inimohvreid.

MANIFESTO IN FRENCH

Ce n'est plus à prouver: les pseudosciences tuent. Pourtant leur pratique se fait en toute impunité grâce aux lois européennes qui les protègent.

Elles tuent des milliers de personnes, des personnes que nous pouvons nommer. Francesco Bonifazi, âgé de 7 ans, auquel son médecin a administré de l'homéopathie plutôt que des antibiotiques. Il est mort en Italie [1]. Mario Rodriguez, âgé de 21 ans, traité avec des vitamines pour son cancer. Il est mort en Espagne [2]. Jacqueline Alderslade, âgée de 55 ans, à laquelle l'homéopathe a dit d'arrêter ses traitements pour l'asthme. Elle est morte en Irlande [3]. Cameron Ayres, âgé de 6 mois, auquel ses parents ne voulaient pas donner de « médecine scientifique ». Il est mort en Angleterre [4]. Victoria Waymouth, âgée de 57 ans, qui s'est vu prescrire de l'homéopathie pour traiter des problèmes cardiaques. Elle est morte en France [5]. Sophia Balyaikina, âgée de 25 ans, qui avait un cancer curable par chimiothérapie, mais à laquelle a été recommandé un « traitement alternatif » fait de piqûres de moustiques. Elle est morte en Russie [6]. Erling Møllehave, 71 ans, son acupuncteur lui a percé le torse et le poumon avec une aiguille. Il est mort au Danemark [7]. Michaela Jakubczyk-Eckert, âgée de 40 ans, dont le thérapeute a recommandé la *nouvelle médecine germanique* pour traiter un cancer du sein. Elle est morte en Allemagne [8]. Sylvia Millecam, âgée de 45 ans, que sa guérisseuse *New Age* avait promis de guérir du cancer. Elle est morte en Hollande [9].

La directive européenne 2001/83/CE a permis –et permet toujours– de tromper quotidiennement des centaines de milliers de citoyens européens [10]. Il a été offert à de puissants *lobbies* de redéfinir ce qu'est un médicament, leur permettant de vendre du sucre à des personnes malades en leur faisant croire qu'il peut les guérir ou améliorer leur santé. Des malades en sont morts, et cela continuera jusqu'à ce que l'Europe admette une réalité indiscutable : les connaissances scientifiques ne peuvent se plier aux intérêts économiques de quelques-uns, surtout si cela implique de tromper les patients et de violer leurs droits.

L'Europe affronte d'autres problèmes de santé publique complexes. La médicalisation excessive de la population, l'apparition de bactéries multirésistantes ou les difficultés de financement des systèmes de santé publique sont déjà trop graves pour y ajouter des gourous, des faux médecins ou même des diplômés en médecine qui prétendent guérir le cancer (ou toute autre maladie) en

manipulant des *chakras*, en avalant du sucre ou en appliquant des « fréquences quantiques ». L'Europe doit non seulement mettre fin à la promotion de l'homéopathie, mais aussi lutter activement contre les escroqueries sanitaires, qui impliquent plus de 150 pseudo-thérapies sévissant sur notre territoire. La vie de milliers de citoyens en dépend : selon des études récentes [11], 25,9 % des Européens ont eu recours à des pseudo-thérapies au cours de la dernière année, soit 192 millions de patients trompés.

Il se dit que l'éviction des pseudo-thérapies s'oppose à la liberté de chacun de choisir ses traitements médicaux, mais il n'en est rien. Selon l'article 25 de la Déclaration universelle des droits de l'homme, l'accès aux soins médicaux est un droit. Mentir aux malades pour leur vendre des produits inutiles et pouvant les tuer est une violation du droit des individus à recevoir des informations loyales sur leur santé. Ainsi, tout citoyen peut renoncer à un traitement médical à la condition qu'il ait été correctement informé, mais personne n'a le droit de lui mentir pour le détourner de soins efficaces et obtenir un gain financier aux dépens de sa vie. Autoriser le commerce de l'homéopathie – ou de toute autre pseudo-thérapie – n'est possible qu'en considérant qu'il est éthique de mentir à une personne malade aux seules fins de lui soutirer son argent.

Le danger des pseudosciences ne réside pas seulement dans le remplacement des traitements utiles par des traitements trompeurs. Il existe aussi un retard évident dans les soins efficaces chez tous les patients qui, à la phase initiale d'une maladie, reçoivent des produits frauduleux au lieu de médicaments. Quand ils finissent par recourir à la médecine, il est souvent trop tard. De surcroît, plusieurs de ces pratiques ont par elles-mêmes des effets indésirables graves, et peuvent blesser voire tuer.

De nombreux pseudo-thérapeutes soutiennent que les pratiques de « l'autre médecine », comme ils dénomment la médecine conventionnelle, ont également des effets secondaires, ce qui est vrai. Mais la nuance réside dans le fait que les pseudo-thérapies ne peuvent pas guérir ou améliorer une maladie, donc exposent le patient à un risque pour des promesses qui se révèlent trompeuses, comme le démontrent avec force les preuves scientifiques. Mentir à une personne malade n'est pas un autre type de médecine, c'est simplement mentir à une personne malade.

Chaque pays doit faire face au problème des pseudo-thérapies à sa manière. Cependant, il est inadmissible que les lois européennes protègent ce travestissement de la réalité scientifique, de sorte que des milliers de citoyens soient trompés, ou en meurent.

Ainsi, les signataires de ce manifeste affirment que :

1. Les connaissances scientifiques discréditent les postulats des pseudo-thérapies, dont l'homéopathie.
2. Les lois européennes qui protègent l'homéopathie sont inadmissibles dans une société scientifique et technologique qui promeut le droit des patients à ne pas être trompés.
3. L'homéopathie est la pseudo-thérapie la plus connue, mais elle n'est ni la seule ni la plus dangereuse. D'autres, telles que l'acupuncture, le *reiki*, la *nouvelle médecine germanique*, le biomagnétisme, l'iridologie, la thérapie orthomoléculaire, et bien d'autres encore, gagnent du terrain et ont aussi leurs victimes.
4. Il faut agir pour faire obstacle aux pseudo-thérapies, car elles ne sont pas fiables et attentent à l'intégrité de milliers de personnes.

5. L'Europe doit œuvrer à une législation pour mettre fin à ce problème.

Il n'est pas cohérent qu'en Europe, le phénomène de la désinformation suscite de plus en plus d'inquiétude, et qu'une de ses représentations les plus dangereuses soit protégée : la désinformation en matière de santé.

Pour toutes ces raisons, les personnes qui signent ce manifeste appellent aux gouvernements des pays dont elles sont membres pour mettre fin à un problème qui contrefait le nom de la science et a déjà coûté la vie à trop de personnes.

MANIFESTO IN GALICIAN

Sexamos claros: as pseudociencias matan. E non só iso, senón que son practicadas con impiedade grazas ás leis europeas que as protexen.

Matan miles de persoas, con nomes e apelidos. Como Francesco Bonifaz, de 7 anos, a quen o seu médico lle deu homeopatía en lugar de antibióticos. Morreu en Italia [1]. Como Mario Rodríguez, de 21 anos, que foi tratado con vitaminas para o seu cancro. Morreu en España [2]. Como Jacqueline Alderslade, de 55 anos, cuxo homeópata díxolle que deixase a súa medicación para a asma. Morreu en Irlanda [3]. Como Cameron Ayres, de 6 meses, cuxos pais non quixeron darlle «medicina científica». Morreu en Inglaterra [4]. Como Victoria Waymouth, de 57 anos, a ela receitáronlle un medicamento homeopático para tratar os seus problemas cardíacos. Morreu en Francia [5]. Como Sofia Balyaykina, de 25 anos, que tiña un cancro curable con quimioterapia, pero lle recomendaron un «tratamento alternativo» de picadelas de mosquitos. Morreu en Rusia [6]. Como Erling Møllehave, de 71 anos, no seu caso un acupuntor atravesou o seu peito cunha agulla e danou o seu pulmón. Morreu en Dinamarca [7]. Como Michaela Jakubczyk-Eckert, de 40 anos, cuxo terapeuta recomendoulle a Nova Medicina Xermánica para o seu cancro de peito. Morreu en Alemaña [8]. Como Sylvia Millicam, de 45 anos, a súa curandeira da Nova Era prometeulle curar o seu cancro. Morreu nos Países Baixos [9].

A Directiva Europea 2001/83/CE permitiu —e aínda permite— que centos de miles de cidadáns europeos sexan enganados a diario [10]. Ofreceuse a *lobbies* importantes a posibilidade de redefinir o que é un medicamento, e agora venden azucre a persoas doentes e fanlles crer que lles poden curar ou mellorar a súa saúde. Isto causou mortes, e seguirá a facelo, ata que Europa admita unha realidade indiscutible: o coñecemento científico non pode dobergarse ante os intereses económicos duns poucos, máxime se iso implica enganar pacientes e vulnerar os seus dereitos.

Europa enfróntase a outros problemas de saúde pública moi serios. A medicalización excesiva da poboación, a xeración de bacterias multirresistentes ou os problemas de financiamento dos sistemas públicos de sanidade son xa graves de máis como para engadir, tamén, a presenza de gurús, falsos médicos ou mesmo médicos titulados que din poder curar o cancro (ou calquera outra doenza) manipulando *chakras*, comendo azucre ou aplicando «frecuencias cuánticas». Europa non

só debe parar o fomento da homeopatía, senón que debe loitar de modo activo por erradicar as estafas de saúde pública que implican as máis de 150 pseudoterapias presentes no noso territorio. A vida de miles de cidadáns depende disto. De feito, segundo estudos recentes [11], o 25,9% dos europeos utilizaron pseudoterapias no último ano, é dicir, 192 millóns de pacientes enganados.

Existe a crenza de que hai un conflito entre a liberdade de elección dun tratamento médico e a eliminación de pseudoterapias, pero non é certo. Segundo o artigo 25 da Declaración Universal dos Dereitos Humanos, toda persoa ten dereito á asistencia médica. Mentir aos doentes para lles vender produtos inservibles que poden matalos incumpre o seu dereito a recibir información veraz sobre a súa saúde. Así que, aínda que un cidadán ten dereito a renunciar a un tratamento médico se está correctamente informado, tamén é certo que ninguén ten dereito a mentirlle para obter un lucro económico á costa da súa vida. Só nun mundo onde considerásemos que mentir a un doente para obter os seus cartos fose ético, poderíamos permitir que se seguise a vender homeopatía —ou calquera outra pseudoterapia— aos cidadáns.

O perigo das pseudoterapias non está só na substitución de tratamentos efectivos por outros enganosos. Ademais, existe un obvio retraso na atención terapéutica en todos aqueles doentes que, ante os primeiros signos dunha enfermidade, reciben produtos falsos no lugar de medicamentos. Moitas veces, cando chegan á medicina, xa é tarde dabondo. Tamén, varias destas prácticas teñen efectos graves por si mesmas e poden producir danos, e mesmo a morte, debido aos seus efectos secundarios.

Moitos pseudoterapeutas argumentan que as prácticas da «outra medicina» tamén teñen efectos secundarios, e iso é certo. Pero a diferenza é que as pseudoterapias non poder curar ou mellorar unha doenza, asumindo o paciente un risco a cambio de promesas que, con todo o peso da evidencia científica, son un engano. Mentir a un enfermo non é outro tipo de medicina, é mentir a un enfermo.

Cada país ten que afrontar o problema das pseudoterapias do seu xeito. Porén, non é admisible que as leis europeas amparen a terxiversación da realidade científica para que miles de cidadáns sexan enganados, e mesmo morran.

Así, os asinantes deste manifesto declaran que:

1. O coñecemento científico é incompatible cos postulados das pseudoterapias, como o caso da homeopatía.
2. As leis europeas que protexen e amparan a homeopatía son inadmisíbeis nunha sociedade científico-tecnolóxica que respecta o dereito dos pacientes a non ser enganados.
3. A homeopatía é a pseudoterapia máis coñecida, pero non é a única, nin tampouco a máis perigosa. Outras, como a acupuntura, o *reiki*, a Nova Medicina Xermánica, o biomagnetismo, o iridoloxía, a terapia ortomolecular e un longo etcétera están a gañar terreo e a causar vítimas.
4. Hai que tomar medidas para frear as pseudoterapias porque non son inocuas e producen miles de afectados.
5. Europa debe traballar na dirección de crear leis que axuden a deter este problema.

Non é coherente que dende Europa se eleve a preocupación polo fenómeno da desinformación e á vez se ampare un dos tipos máis perigosos: a desinformación en temas de saúde. Por todo isto, as

persoas que asinan este manifesto animan os gobernos dos países ós que pertencen a pór fin a un problema que utiliza falsamente o nome da ciencia, e que xa custou a vida a demasiada xente.

MANIFESTO IN ITALIAN

Non sussistono dubbi: le pseudoscienze uccidono. Nonostante ciò vengono praticate con totale impunità grazie a leggi europee che le proteggono.

Uccidono migliaia di persone, persone di cui possiamo fare il nome, come Francesco Bonifazi, un bambino di 7 curato con l'omeopatia anziché con antibiotici. Morì in Italia [1]. Persone come Mario Rodríguez, che aveva 21 anni e al quale furono prescritte vitamine per curare il suo cancro. È morto in Spagna [2]. Persone come Jacqueline Alderslade, una donna di 55 anni cui un omeopata consigliò di smettere di prendere i farmaci per l'asma. È morta in Irlanda [3]. Persone come Cameron Ayres, una bambina di 6 mesi, i cui genitori non hanno voluto curare il loro bambino con una "medicina scientifica". È morto in Inghilterra.[4] Persone come Victoria Waymouth, una donna di 57 anni a cui è stato prescritto un farmaco omeopatico per curare dei problemi cardiaci. È morta in Francia [5]. Persone come Sofia Balyaikina, una donna di 25 anni, che aveva un tumore curabile con la chemioterapia, ma cui fu raccomandato un "trattamento alternativo", un trattamento di cura attraverso punture di zanzara. È morta in Russia [6]. Persone come Erling Møllehave, un uomo di 71 anni il cui agopuntore gli ha perforato e danneggiato il polmone con un ago. Morto in Danimarca [7]. Persone come Michaela Jakubczyk-Eckert, una donna di 40 anni cui il terapeuta ha raccomandato la nuova medicina germanica per curare il suo tumore al seno. È morta in Germania [8]. Persone come Sylvia Millecam, una donna di 45 anni la cui guaritrice New Age ha promesso di curare il suo cancro. Morta in Olanda [9].

La direttiva europea 2001/83 / CE ha reso – e rende ancora possibile – l'inganno quotidiano di migliaia di centinaia di cittadini europei [10]. Un profondo lavoro di lobby ha reso possibile ridefinire cosa sia un farmaco, e ora si vende zucchero ai malati facendo credere loro che esso possa curarli o migliorare la loro salute. Ciò ha causato morti e continuerà a farlo fino a quando l'Europa non ammette una verità innegabile: la conoscenza scientifica non può piegarsi a interessi economici, soprattutto quando questo significa ingannare i pazienti e violare i loro diritti

L'Europa sta affrontando problemi di salute pubblica complessi: la medicalizzazione eccessiva della popolazione, l'apparizione di batteri multiresistenti o le difficoltà di finanziamento dei sistemi sanitari degli stati membri sono problemi già fin troppo gravosi perché vi sia necessità di aggiungerli

guru, falsi medici, o anche dei diplomati in medicina, che pretendono di guarire il cancro (o qualsiasi altra malattia) manipolando ei chakras, ingerendo dello zucchero o applicando «frequenze quantiche».

L'Europa deve non solo porre fine alla promozione dell'omeopatia, ma anche lottare attivamente contro le frodi sanitarie, che poggiano su più di 150 pseudo-terapie imperversanti sul nostro territorio. La vita di migliaia di cittadini ne dipende: secondo studi recenti [11], il 25,9% degli Europei hanno fatto ricorso a pseudo-terapie nel corso dell'ultimo anno, ossia 192 milioni di pazienti ingannati.

Qualcuno sostiene che l'eliminazione delle pseudo-terapie s'opponesse alla libertà di scelta tra i trattamenti terapeutici, ma ciò è falso. In base all'articolo 25 della Dichiarazione Universale dei diritti dell'Uomo, l'accesso alle cure mediche è un diritto. Mentire ai malati per vender loro prodotti inutili e potenzialmente in grado di ucciderli rappresenta una violazione del diritto di ogni individuo a ricevere delle informazioni corrette e veritiere sulla propria salute. Allo stesso modo ciascun individuo ha diritto a rinunciare ad un trattamento di cura a patto che ciò avvenga dopo che è stato correttamente informato, ma nessuno ha il diritto di mentirgli e distoglierlo da cure efficaci per ottenere un vantaggio economico a spese della sua vita. Autorizzare il commercio dell'omeopatia – o di tutte le altre pseudo-terapie – non è possibile se non ammettendo che sia etico mentire a una persona malata al solo scopo di sottrargli denaro.

Il rischio rappresentato dalle pseudoscienze non consiste soltanto nella sostituzione di trattamenti efficaci con trattamenti fasulli: esiste anche un evidente ritardo nell'inizio di cure efficaci da parte di tutti i pazienti che, nella fase iniziale di una malattia, hanno ricevuto farmaci fittizi al posto di medicinali. Quando costoro giungono finalmente a far ricorso a medicine efficaci è spesso troppo tardi. In sovrappiù, la maggior parte di queste pratiche producono già di per se stesse effetti indesiderabili gravi, e possono danneggiare la salute, quando non uccidere.

Molti pseudo-terapeuti argomentano che anche la medicina ufficiale, quella che loro definiscono "l'altra medicina", produce effetti collaterali, il che è vero. Tuttavia, la differenza fondamentale risiede nel fatto che le pseudo-terapie non possono curare una malattia o migliorare la salute del paziente; e per questo motivo i pazienti assumono rischi in cambio di promesse prive di alcun fondamento scientifico o prove di efficacia. Mentire a una persona malata non è proporre un altro tipo di medicina, è semplicemente mentire a una persona malata.

Ogni paese europeo si trova a dover affrontare la questione delle pseudo-terapie (pseudo scienze) all'interno del proprio quadro normativo. Tuttavia, non è accettabile che le leggi europee proteggano la distorsione dei fatti scientifici in modo da indurre in errore migliaia di cittadini portandoli a scelte che li possono danneggiare, e nella peggiore delle ipotesi condurre a morte.

Noi, i firmatari di questo manifesto, dichiariamo quindi che:

1. La conoscenza scientifica è incompatibile con ciò che postulano le pseudo-terapie (pseudo scienze) come ad esempio l'omeopatia.
2. Le leggi europee che proteggono l'omeopatia sono inammissibili in una società scientifica e tecnologica che rispetta il diritto dei pazienti di non essere ingannati.

3. Pur essendo l'omeopatia la pseudo-terapia (pseudo-scienza) più conosciuta non è né l'unica né la più pericolosa; l'agopuntura, il reiki, la nuova medicina germanica, l'iridologia, il biomagnetismo, la terapia ortomolecolare e molte altre, stanno guadagnando terreno e causando vittime
4. Devono essere prese misure per fermare le pseudo-terapie (pseudo-scienze), poiché esse non sono innocue ma provocano seri problemi a migliaia di persone
5. L'Europa deve lavorare per creare una legislazione che aiuti a fermare questa deriva che si configura come un grosso problema sanitario.

Non è coerente che in Europa vi sia una crescente preoccupazione per il fenomeno della disinformazione e allo stesso tempo ne sia protetto uno dei suoi tipi più pericolosi: la disinformazione su problemi di salute. A causa di tutto questo, le persone che firmano questo manifesto esortano i governi dei paesi europei a porre fine a un problema che usa falsamente il nome della scienza con la conseguenza di danneggiare la salute di moltissime persone e causarne la morte di un numero fin troppo rilevante.

MANIFESTO IN PORTUGUESE

Sejamos claros: as pseudoterapias matam. E não apenas isso: também são praticadas com impunidade graças às leis europeias que as protegem.

Matam milhares de pessoas, com nomes e apelidos. Como Francesco Bonifaz, de 7 anos, a quem o médico prescreveu homeopatia em vez de antibióticos. Morreu em Itália [1]. Como Mario Rodríguez, de 21 anos, cujo cancro foi tratado com vitaminas. Morreu em Espanha [2]. Como Jacqueline Alderslade, de 55 anos, a quem o homeopata disse que deixasse de tomar a medicação para a asma. Morreu em Irlanda [3]. Como Cameron Ayres, de 6 meses, a quem os pais não quiseram dar “medicamentos científicos”. Morreu em Inglaterra [4]. Como Victoria Waymouth, de 57 anos, a quem receitaram um preparado homeopático para tratar os problemas cardíacos de que sofria. Morreu em França [5]. Como Sofia Balyaykina, de 25 anos, que tinha um cancro curável com quimioterapia, mas a quem recomendaram um “tratamento alternativo” à base de picadas de mosquitos. Morreu na Rússia [6]. Como Erling Møllehave, de 71 anos, a quem um acupunctur perfurou o peito com uma agulha e danificou o pulmão. Morreu na Dinamarca [7]. Como Michaela Jakubczyk-Eckert, de 40 anos, cujo terapeuta recomendou a Nova Medicina Germânica para tratar o cancro. Morreu na Alemanha [8]. Como Sylvia Millecam, de 45 anos, a quem uma curandeira da Nova Era prometeu curar o cancro. Morreu nos Países Baixos [9].

A Directiva Europeia 2001/83/CE permitiu — e ainda permite — que centenas de milhares de cidadãos e cidadãs europeias sejam enganados diariamente [10]. Importantes *lobbies* tiveram, assim, a oportunidade de redefinir o que é um medicamento e agora vendem açúcar a pessoas doentes, fazendo-as crer que se podem curar ou melhorar o estado de saúde. Isto resultou em mortes, que continuarão a ocorrer até que a Europa admita uma realidade indiscutível: o conhecimento científico não se pode vergar aos interesses económicos de uns poucos, muito menos se isso implicar enganar pacientes e violar os seus direitos.

A Europa está perante outros problemas de saúde pública muito graves. A medicalização excessiva da população, o surgimento de bactérias multi-resistentes ou os problemas de financiamento dos sistemas públicos de saúde já são suficientemente sérios como para ainda acrescentar a presença

de gurus, falsos médicos ou até médicos formados que dizem poder curar cancros (ou qualquer outra doença) através da manipulação de chakras, da ingestão de açúcar ou da aplicação de “frequências quânticas”. A Europa deve não só travar a promoção da homeopatia, como também deve lutar de forma activa para a erradicação de fraudes de saúde pública envolvidas em mais de 150 pseudoterapias presentes no nosso território. A vida de milhares de cidadãos e cidadãs disso depende. De facto, segundo estudos recentes [11], 25,9% dos europeus recorreram a pseudoterapias no último ano, ou seja, 192 milhões de pacientes enganados.

Subsiste a crença de que existe um conflito entre a liberdade de escolha de um tratamento médico e a eliminação das pseudoterapias, mas tal não é verdade. Segundo o Artigo 25 da Declaração Universal dos Direitos Humanos, todas as pessoas têm direito a assistência médica. Mentir aos doentes para lhes vender produtos inúteis, que os podem matar, viola o direito da cidadania receber informação verídica sobre a sua saúde. Por isso, embora um cidadão ou cidadã tenha o direito a renunciar um tratamento médico estando correctamente informado, também é certo que ninguém tem o direito de lhe mentir para obter um ganho económico à custa da sua vida. Só num mundo onde considerássemos que mentir a um doente para lhe extrair dinheiro é ético, é que poderíamos permitir que se continue a vender homeopatia — ou qualquer outra pseudoterapia.

O perigo das pseudoterapias não se restringe apenas à substituição de tratamentos eficazes por outros enganosos. Para além disso, verifica-se um óbvio atraso na atenção terapêutica dada aos pacientes que, perante os primeiros sintomas de doença, recebem produtos falsos em vez de medicamentos. Muitas vezes, quando chegam à medicina, já é demasiado tarde. Igualmente, várias destas práticas têm efeitos graves por si só e podem levar à morte devido aos seus efeitos secundários.

Muitos pseudoterapêutas argumentam que as práticas da “outra medicina” também têm efeitos secundários — e isso é verdade. Mas, a diferença está no facto das pseudoterapias não poderem curar ou trazer melhorias a uma doença, levando a que o paciente assuma um risco em troca de promessas que, com todo o peso das provas científicas, são um engano. Mentir a um doente não é outro tipo de medicina, é mentir a um doente.

Cada país tem que enfrentar o problema das pseudoterapias com acções próprias. Não obstante, não se pode admitir que as leis europeias amparem a deturpação da realidade científica para que milhares de cidadãs e cidadãos sejam enganados e, inclusivamente, morram.

Assim, os subscritores e subscritoras deste manifesto declaram que:

1. Conhecimento científico é incompatível com os postulados das pseudoterapias, como a homeopatia;
2. As leis europeias que protegem e amparam a homeopatia são inadmissíveis numa sociedade científico-tecnológica que respeita os direitos dos pacientes a não serem enganados;
3. A homeopatia é a pseudoterapia mais conhecida, mas não é a única, nem a mais perigosa. Outras, como a acupunctura, o reiki, a Nova Medicina Germânica, o biomagnetismo, a iridologia, a terapia ortomolecular e muitas outras, estão a ganhar terreno e a causar vítimas;

4. Há que tomar medidas para travar as pseudoterapias porque não são inócuas e dão origem a milhares de afectados;
5. A Europa deve trabalhar no sentido de criar leis que ajudem a parar este problema.

Não é coerente que a partir da Europa se chame à atenção para o fenómeno da desinformação e, ao mesmo tempo, se dê apoio a um dos seus tipos mais perigosos: a desinformação na saúde. Por tudo isso, os subscritores e subscritoras deste manifesto pedem aos governos dos seus países que acabem com um problema que usa o nome da ciência de forma fraudulenta e que já custou a vida a demasiadas pessoas.

MANIFESTO IN RUSSIAN

Скажем прямо: псевдомедицина убивает. При этом, различные виды псевдомедицины практикуются безнаказанно благодаря европейским законам, которые ее защищают.

Они убивают тысячи людей, имена и семьи которых известны. Такие люди, как Франческо Бонифас – 7-летний мальчик, врач которого назначил ему гомеопатию вместо антибиотиков. Умер в Италии [1]. Такие люди, как Марио Родригес, которому был 21 год и которому назначили витамины для лечения рака. Умер в Испании [2]. Такие люди, как Жаклин Олдерслейд – 55-летняя женщина, чей гомеопат сказал ей прекратить принимать лекарства от астмы. Она умерла в Ирландии [3]. Такие люди, как Кэмерон Эйрес – 6-месячный ребенок, чьи родители не хотели давать ей «научную медицину» [4]. Он умер в Англии. Такие люди, как Виктория Уэймут – 57-летняя женщина, которой был назначен гомеопатический препарат для лечения ее проблем с сердцем. Она умерла во Франции [5]. Такие люди, как София Баляйкина – 25-летняя девушка, у которой был рак, излечимый химиотерапией, однако, ей посоветовали «альтернативное лечение» укусами комаров. Она умерла в России [6]. Такие люди, как Эрлинг Меллехаве – 71-летний мужчина, чей иглотерапевт проколол и повредил его легкое иглой. Умер в Дании [7]. Такие люди, как Микаэла Якубчик-Экерт – 40-летняя женщина, чей терапевт рекомендовал альтернативную «Новую Германскую Медицину», для лечения рака молочной железы. Она умерла в Германии [8]. Такие люди, как Сильвия Миллкам – 45-летняя женщина, чей новый целитель обещал исцелить ее от рака. Она умерла в Нидерландах [9].

Европейская директива 2001/83 / CE сделала и до сих пор делает возможным ежедневный обман тысяч сотен европейских граждан [10]. Влиятельным лоббистам была предоставлена возможность заново определить значение понятия лекарства, и теперь они продают сахар больным людям и заставляют их поверить, что это может вылечить их или улучшить их состояние. Это ведет к смертям и будет продолжаться до тех пор, пока Европа не признает неоспоримую истину: научные знания не могут подчиняться экономическим интересам, особенно когда речь идет об обмане пациентов и нарушении их прав.

Страны Европы и без того сталкиваются со множеством очень серьезных проблем в области общественного здравоохранения. Чрезмерная медикализация, мультирезистентные бактерии и недостаток финансирования общественных систем здравоохранения – ситуация уже сложна в достаточной степени и без шаманов, фальшивых врачей, а в некоторых случаях и врачей квалифицированных, которые утверждают, что они могут вылечить любую болезнь, манипулируя чакрами, заставляя людей есть сахар или используя “квантовые частоты”. Европа должна не только прекратить пропаганду гомеопатии, но и активно бороться с искоренением мошенничества в сфере здравоохранения, в которое на европейской территории вовлечено более 150 видов псевдомедицины. От этого зависят жизни тысяч граждан. К слову, согласно последним исследованиям, 25,9% европейцев прибегали к использованию той или иной псевдомедицины в прошлом году. Другими словами, 192 миллиона пациентов были обмануты [11].

Существует мнение, что присутствует конфликт между свободой выбора лечения и запретом псевдомедицины, однако это не так. Согласно статье 25 Всеобщей Декларации прав человека, каждый человек имеет право на медицинское обслуживание. Но ложь пациентам с целью продать им терпевтически бесполезные продукты, которые могут их убить, нарушает их право на получение правдивой информации об их здоровье. Тот факт, что любой гражданин вправе отказаться от лечения, будучи при этом надлежащим образом проинформированным, не обеспечивает третьих лиц правом лгать, чтобы получить прибыль за счет чужой жизни. Только в том мире, где ложь больному считалась бы этичной, мы могли бы позволить гомеопатии или любой другой псевдонауке продолжать продаваться гражданам.

Непосредственная замена эффективных методов лечения ложными – не единственная опасность псевдомедицины. Ко всему прочему, очевидно возникновение задержек в эффективном лечении у тех пациентов, которые на ранних стадиях заболевания получают ложные продукты вместо лекарства. Зачастую, такие пациенты обращаются к научной медицине тогда, когда уже поздно. Кроме того, некоторые из этих методов сами по себе имеют серьезные последствия и могут привести к травмам или даже смерти из-за их побочных эффектов.

Многие псевдотерапевты апеллируют, что «обычная медицина» также имеет побочные эффекты, и это действительно так. Тем не менее, разница заключается в том, что псевдомедицина в принципе не может вылечить болезнь или улучшить состояние, а пациент лишь рискует ухудшить его, действуя под воздействием обещаний, которые, как очевидно свидетельствует доказательная медицина, являются ложью. А ложь больному человеку – это не альтернативный вид медицины, это просто ложь больному человеку.

Каждая страна должна противостоять проблеме псевдомедицины по-своему. Тем не менее, неприемлемо, чтобы европейские законы защищали искажение научных фактов, из-за чего тысячи граждан становятся обманутыми или даже обреченными на смерть.

Поэтому мы, подписавшие этот манифест, заявляем, что:

1. Научное знание несовместимо с тем, что постулируют различные типы псевдомедицины, как в случае гомеопатии.

2. Европейские законы, защищающие гомеопатию и покровительствующие ей, недопустимы в научно-техническом обществе, уважающем право пациентов не быть обманутыми.
3. Гомеопатия – самая известная псевдонаука, но не единственная и не самая опасная. Другие, такие, как иглоукалывание, целительство «рейки», Новая Германская Медицина, иридодиагностика, биомагнетизм, ортомолекулярная терапия и многие другие, набирают силу и приводят к жертвам.
4. Необходимо принять меры по противодействию псевдомедицине, поскольку она не безвредна и наносит ущерб тысячам людей.
5. Европа должна работать над созданием законодательства, которое поможет остановить эту проблему.

Не обнаруживается согласования в том, что, с одной стороны, Европа обеспокоена феноменом распространения дезинформации, но в то же время защищает один из самых опасных ее видов – дезинформацию в темах здравоохранения. Вот почему люди, подписывающие этот манифест, призывают правительства стран, представителями которых являются, положить конец проблеме, в которой имя науки используется ложно и уже стоило жизни слишком многим.

MANIFESTO IN SPANISH

Seamos claros: las pseudociencias matan. Y no solo eso, sino que son practicadas con impunidad gracias a leyes europeas que las protegen.

Matan a miles de personas, con nombres y apellidos. Como Francesco Bonifaz, de 7 años, a quien su médico le dio homeopatía en lugar de antibióticos. Murió en Italia [1]. Como Mario Rodríguez, de 21 años, que fue tratado con vitaminas para su cáncer. Murió en España [2]. Como Jacqueline Alderslade, de 55 años, cuyo homeópata le dijo que dejara su medicación para el asma. Murió en Irlanda [3]. Como Cameron Ayres, de 6 meses, cuyos padres no quisieron darle “medicina científica”. Murió en Inglaterra [4]. Como Victoria Waymouth, de 57 años, a ella le recetaron un medicamento homeopático para tratar sus problemas cardíacos. Murió en Francia [5]. Como Sofía Balyaykina, de 25 años, que tenía un cáncer curable con quimioterapia, pero le recomendaron un “tratamiento alternativo” de picaduras de mosquitos. Murió en Rusia [6]. Como Erling Møllehave, de 71 años, en su caso un acupuntor le atravesó su pecho con una aguja y dañó su pulmón. Murió en Dinamarca [7]. Como Michaela Jakubczyk-Eckert, de 40 años, cuyo terapeuta le recomendó la Nueva Medicina Germánica para tratar su cáncer de pecho. Murió en Alemania [8]. Como Sylvia Millecam, de 45 años, su sanadora de la Nueva Era le prometió curar su cáncer. Murió en los Países Bajos [9].

La directiva europea 2001/83/CE ha permitido —y aún permite— que cientos de miles de ciudadanos europeos sean engañados a diario [10]. Se les ha ofrecido a importantes *lobbies* la posibilidad de redefinir qué es un medicamento, y ahora venden azúcar a personas enfermas y les hacen creer que puede curarles o mejorar su salud. Esto ha ocasionado muertes, y lo seguirá haciendo, hasta que Europa admita una realidad indiscutible: el conocimiento científico no puede doblegarse ante los intereses económicos de unos cuantos, máxime si eso implica engañar a pacientes y vulnerar sus derechos.

Europa se enfrenta a otros problemas de salud pública muy serios. La medicalización excesiva de la población, la generación de bacterias multirresistentes o los problemas de financiación de los sistemas públicos de sanidad ya son demasiado graves como para añadir, además, la presencia de gurús, falsos médicos o incluso médicos titulados que dicen poder curar el cáncer (o cualquier otra enfermedad) manipulando *chakras*, comiendo azúcar o aplicando “frecuencias cuánticas”. Europa

no solo debe detener el fomento de la homeopatía, sino que debe luchar de forma activa por erradicar las estafas de salud pública que implican las más de 150 pseudoterapias presentes en nuestro territorio. La vida de miles de ciudadanos depende de ello. De hecho, según estudios recientes [11], el 25.9% de los europeos han utilizado pseudoterapias en el último año, es decir, 192 millones de pacientes engañados.

Existe la creencia de que hay un conflicto entre la libertad de elección de un tratamiento médico y la eliminación de pseudoterapias, pero no es cierto. Según el artículo 25 de la Declaración Universal de los Derechos Humanos, toda persona tiene derecho a la asistencia médica. Mentir a los enfermos para venderles productos inservibles que pueden matarlos incumple el derecho de los ciudadanos a recibir información veraz sobre su salud. Así que, aunque un ciudadano tiene derecho a renunciar a un tratamiento médico estando correctamente informado, también es cierto que nadie tiene derecho a mentirle para obtener lucro económico a costa de su vida. Solo en un mundo donde consideráramos que mentir a un enfermo para obtener su dinero fuera ético, podríamos permitir que se siguiera vendiendo homeopatía —o cualquier otra pseudoterapia— a los ciudadanos.

El peligro de las pseudociencias no solo está en la sustitución de tratamientos efectivos por otros engañosos. Además, existe un obvio retraso en la atención terapéutica en todos aquellos enfermos que, ante los primeros signos de una enfermedad, reciben productos falsos en lugar de medicamentos. Muchas veces, cuando llegan a la medicina, ya es demasiado tarde. También, varias de estas prácticas tienen efectos graves por sí mismas y pueden producir daños, e incluso la muerte, debido a sus efectos secundarios.

Muchos pseudoterapeutas argumentan que las prácticas de “la otra medicina” también tienen efectos secundarios, y es verdad. Pero la diferencia es que las pseudoterapias no pueden curar o mejorar una enfermedad, asumiendo el paciente un riesgo a cambio de promesas que, con todo el peso de la evidencia científica, son un engaño. Mentir a un enfermo no es otro tipo de medicina, es mentir a un enfermo.

Cada país tiene que enfrentarse al problema de las pseudoterapias a su modo. Sin embargo, no es admisible que las leyes europeas amparen la tergiversación de la realidad científica para que miles de ciudadanos sean engañados, e incluso mueran.

Así pues, los firmantes de este manifiesto declaran que:

1. El conocimiento científico es incompatible con los postulados de las pseudoterapias, como el caso de la homeopatía.
2. Las leyes europeas que protegen y amparan la homeopatía son inadmisibles en una sociedad científico-tecnológica que respeta el derecho de los pacientes a no ser engañados.
3. La homeopatía es la pseudoterapia más conocida, pero no es la única, ni tampoco la más peligrosa. Otras como la acupuntura, el *reiki*, la Nueva Medicina Germánica, el biomagnetismo, la iridología, la terapia ortomolecular y un largo etcétera, están ganando terreno y causando víctimas.
4. Hay que tomar medidas para frenar las pseudoterapias porque no son inocuas y producen miles de afectados.
5. Europa debe trabajar en la dirección de crear leyes que ayuden a detener este problema.

No es coherente que desde Europa se eleve la preocupación por el fenómeno de la desinformación y a la vez se ampare uno de sus tipos más peligrosos: la desinformación en temas de salud. Por todo ello, las personas que firman este manifiesto animan a los gobiernos de los países a los que pertenecen a poner fin a un problema que utiliza falsamente el nombre de la ciencia y que ya le ha costado la vida a demasiada gente.

MANIFESTO IN SWEDISH

Låt oss vara på det klara med en sak: pseudovetenskap dödar. Och denna humbug tillåts att vara verksam med total straffrihet tack vare EU-lagar som skyddar dem.

Pseudovetenskap dödar tusentals människor, människor med namn och familjer. Människor som Francesco Bonifaz, en sjuårig pojke vars läkare ordinerade homeopati istället för antibiotika. Han dog i Italien. Människor som Mario Rodríguez, som var 21 år gammal och blev tillsagd att ta vitaminer för att bota sin cancer. Han dog i Spanien. Människor som Jacqueline Alderslade, en 55-årig kvinna vars homeopat sade till henne att sluta ta sina astmamediciner. Hon dog på Irland. Människor som Cameron Ayres, en sex månader gammal bebis vars föräldrar inte ville ge barnet "vetenskaplig medicin". Han dog i England. Människor som Victoria Waymouth, en 57-årig kvinna som blev ordinerad homeopatisk medicin för att behandla sitt hjärtproblem. Hon dog i Frankrike. Människor som Sofia Balyaykina, en 25-årig kvinna, vars cancer var behandlingsbar med klassisk kemoterapi, men som istället blev rekommenderad en "alternativ behandling" i form av en behandling mot myggbett. Hon dog i Ryssland. Människor som Erling Møllehave, en 71-årig man vars akupunktör genomborrade och skadade hans lunga med en akupunktur nål. Han dog i Danmark. Människor som Michaela Jakubczyk-Eckert, en 40-årig kvinna vars terapeut rekommenderade "German New Medicine" för att behandla hennes bröstcancer. Hon dog i Tyskland. Människor som Sylvia Millicam, en 45-årig kvinna vars new age-healer lovade att bota hennes cancer. Hon dog i Nederländerna.

EU-direktivet 2001/83/CE har möjliggjort – och fortsätter att möjliggöra – ett dagligt bedrägeri gentemot hundratusentals EU-medborgare. Inflytelserika lobbyister har givits möjligheten att omdefiniera vad medicin är, och nu säljer de socker till sjuka människor och får dem att tro att det kan bota dem eller förbättra deras hälsa. Detta har orsakat dödsfall och kommer att fortsätta göra så till dess att EU medger en sanning som inte går att förneka: vetenskaplig kunskap kan inte underställas ekonomiska intressen, speciellt inte när det innebär att patienter blir förlorade och deras rättigheter kränkta.

EU står inför ett ytterst allvarligt problem när det gäller folkhälsan. Övermedicinering, multiresistenta bakterier och offentliga sektorers ekonomiska problem är allvarliga nog utan guruer,

kvacksalvare och till och med legitimerade läkare som påstår att de kan bota vilken sjukdom som helst genom att manipulera chakran, få folk att äta socker eller genom att använda "kvantmekaniska frekvenser". EU behöver inte bara sätta stopp för marknadsföring av homeopatiska produkter utan också föra en aktiv kamp för att omintetgöra bedrägerier kring folkhälsan. Mer än 150 olika pseudovetenskapliga behandlingsformer har visat sig vara i aktivt bruk inom EU. Tusentals medborgares liv hänger på att detta förhindras. Faktum är, enligt nya rön, att 25,9 % av européerna har använt sig av pseudovetenskapliga behandlingsformer under förra året. Med andra ord har 192 miljoner patienter blivit vilseledda.

Vissa tror att det finns en konflikt mellan friheten att välja behandlingsmetoder å ena sidan och avskaffandet av kvacksalveri å den andra, men det är inte sant. Enligt artikel 25 i FN:s deklaration om människors universella rättigheter så har alla rätt till sjukvård. Att ljuga för patienter i syfte att sälja verkningslösa produkter som kan döda dem, bryter mot deras grundläggande rättighet att få korrekt medicinsk information om sin hälsa. Även om en medborgare har rätt att vägra medicinsk behandling när hen är ordentligt informerad, är det även sant att man inte har rätt att ljuga för att vinna fördelar på bekostnad av någon annans liv. Endast i en värld där det anses etiskt att ljuga för en sjuk människa kan homeopati – eller andra former av kvacksalveri – tillåtas att fortsatt säljas till medborgare.

Att effektiva behandlingar ersätts av falska är inte den enda faran med pseudovetenskapliga behandlingar. När en människa får falska produkter istället för verksam medicin i ett tidigt stadium av sin sjukdom, leder det till en uppenbar fördröjning av medicinska behandlingar. Många gånger är det sedan för sent när hon väl får behandling med regelrätt medicin. Därutöver har flera av dessa verksamheter allvarliga konsekvenser i sig, samt kan orsaka skada och även dödsfall på grund av sina biverkningar.

Många kvacksalvare hävdar att "skolmedicinen" också har biverkningar, vilket sannerligen stämmer. Skillnaden är dock att kvacksalveri varken kan bota sjukdomar eller förbättra hälsan, och därmed tar patienter risker i utbyte mot löften som är rent lurendrejeri, enligt den samlade tyngden av den tillgängliga vetenskapen. Att ljuga för en sjuk människa är inte en alternativ behandling, det är helt enkelt att ljuga för en sjuk människa.

Varje land måste bemöta problemet med kvacksalveri och pseudovetenskap på sitt sätt. Det är dock inte acceptabelt att EU:s lagar skyddar förvrängning av vetenskapliga fakta som leder till att tusentals medborgare luras, eller än värre leds mot sin död.

Vi, manifestets undertecknare, förklarar härmed följande:

1. Pseudovetenskapliga påståenden, såsom homeopati kan inte jämföras med vetenskap.
2. EU-lagar som försvarar homeopati är inte acceptabla i ett vetenskapligt och teknologiskt samhälle som respekterar patienters rättighet att inte bli vilseledda.
3. Homeopati är den mest kända pseudovetenskapliga behandlingsformen, men den är inte den enda eller den farligaste. Andra, såsom akupunktur, reiki, "German New Medicine", iridologi, magnetterapi, ortomolekylär medicin och många fler, vinner mark och skördar offer.
4. Åtgärder måste komma på plats för att stoppa pseudovetenskapliga behandlingsformer då de är skadliga och orsakar att tusentals människor blir negativt påverkade.

5. EU måste arbeta för att skapa en lagstiftning som kan sätta stopp för det här problemet.

Att EU är bekymrade över desinformationsfenomenet men samtidigt försvarar en av de farligaste varianterna, desinformation gällande folkhälsa, är helt enkelt inte konsekvent. Det är därför de personer som skriver under detta manifest uppmanar EU:s samtliga regeringar att få slut på det här problemet. Allt för många liv har redan gått till spillo.

FRANCE

Gimel	AgroParisTech
Malavielle	Anesthésiste Réanimateur
Larcher Claire	Anesthésiste Réanimateur
Fournet Benoit	Assistant hospitalier
Ferreras Carlos	Audioprothésiste

Morisset	Biométrie appliquée, épidémiologie
	Cardiologue
Descoux JérémY	
Guillaume Bec	Chercheur biochimie
Tony Ducrocq	Chercheur en informatique
Azzedine Lakhlifi	Chercheur en physique
Romain Cochard	Chirurgie dentaire
Cyril Vidal	Chirurgien dentiste
Luca Paolino	Chirurgien digestif
François Morel	Chirurgien maxillo faciale et stomatologue
Elise Meret	Chirurgien ORL
Alexandre Yver	DES Médecine générale
Salley	Desc chirurgie vasculaire, Desc chirurgie cardio vasculaire et thoracique, DES de chirurgie generale
Edgar Parnaudeau	DESS Psychologie
Serge Christin	DESS PSYCHOLOGIE CLINIQUE ET PSYCHOPATHOLOGIE
Karine Creyx	Diététique
Vausselein	Diplôme d'état de docteur en pharmacie
Nicolas Zawadka	Diplôme d'état de docteur en médecine générale
Aflalo Joanna	Diplôme d'état de psychomotricien
Contal	Docteur
Filipe De Vadder	Docteur en biologie
David Provost	Docteur en chimie organique
Courant	Docteur en chirurgie dentaire
Romain Durand	Docteur en chirurgie dentaire
Yann Duroc	Docteur en genetique
Laterre	Docteur en medecine
David Gaetan	Docteur en médecine
Jean-Francois Grenier	Docteur en Médecine
Beausire David	Docteur en Médecine
Abela Romain	Docteur en Médecine
Viault	Docteur en Médecine
Antoine Ospital	Docteur en Médecine
Oviedo	docteur en médecine
Roux Philippe	Docteur en médecine
Laurent Brindel	Docteur en médecine
Serge Zakine	Docteur en Médecine
Pascal Gaby	docteur en médecine , médecine d'urgence, médecine générale
Chabardès Arnaud	Docteur en médecine, spécialisé en médecine générale
Rémi Mariey	Docteur en médecine. Chirurgien orthopédiste
Maud Beaudoin	Docteur en Neurosciences
Bontemps Florence	Docteur en pharmacie

Quentin Lehoux	Docteur en pharmacie
Bisson	Docteur en pharmacie
Bergeaud	Docteur en pharmacie
Véronique Laborde	Docteur en Pharmacie
Bourlioux Marc	Docteur en Pharmacie
Colliat	Docteur en sciences
Frédéric Debaste	Docteur en sciences de l'Ingénieur
Stoclet	Docteur es Sciences, Pharmacien
Leclaire Anthony	Docteur Vétérinaire
Jarnoux Annic	Docteure en médecine
Jennifer Renoux	Doctor in Artificial Intelligence
Deniel	Doctorant
Jérémy Barbier	Doctorant
Adrien Boniface	Doctorant en biologie
Paul Mangel	Doctorant physique
Guimpel	Doctorat
Simon Emeline	Doctorat
Dacheux Estelle	Doctorat
Virgile ADAM	Doctorat
Donnart Tifenn	Doctorat
Julien Gaillard	Doctorat
Alexis QUENTIN	Doctorat
Thomas Fromenteze	Doctorat - Électromagnétisme Électronique
Joseph Garnier	Doctorat (PhD)
Emmanuel Roquette	Doctorat (PhD)
Jacques Malavieille	Doctorat 3ème Cycle et Thèse d'état Géosciences
De Lamotte Frédéric	Doctorat biologie
Laurent Vanoye	Doctorat catalyse
Laetitia Bigot	Doctorat de sciences de la vie
Benoit Pierre	Doctorat d'Université (Pharmacie)
Gambari	Doctorat en biologie
Aurélié Quinard	Doctorat en Biologie de l'évolution / Ecologie comportementale
Marine Cadiou	Doctorat en Biophysique
Remy ROBINOT	Doctorat en Immunologie/Cancérologie
Jean-François Dufayard	Doctorat en informatique, systèmes et communication
Marsan	Doctorat en médecine générale
Damien Vansteene	Doctorat en médecine, DES d'oncologie médicale, DIU de nutrition
Bernard GIUSIANO	Doctorat en Médecine, Doctorat d'Etat en Biologie Humaine
Antoine Van Vooren	Doctorat en sciences, Master en Chimie
Lafranque	Double diplôme ingénieur chimie et procédés - M2 chimie du cycle du combustible nucléaire

Tania Louis	Dr en Biologie-Santé
Yann Hodé	Dr en med, Dr es Sciencs en neuroscience, Dr es Science en Informatique
Édouard Douriez	Dr en Pharmacie, Dr en Sciences, DES Pharmacie Industrielle et Biomédicale, DEA Toxicologie Fondamentale et Appliquée
Féger	Dr ès Sciences en Neurophysiologie/ Pr de Pharmacologie
Anthony Fleury	Dr. et HDR en informatique appliqué à la santé
Nataf	Ergothérapeute
Thomire	Faculté de médecine
Gaelle Geron	Gynécologie Obstétrique
François Leulier	Habilitation à diriger des recherches - Doctorat en biologie
Matthieu Clerget-Gurnaud	IDE
Thibault Piet	IDE
Julien Genty	IDE
Denis Faustin	IDE
Xavier Veron	IDE
Meziane	IFSI CASH de NANTERRE
Echene	Infirmier
Callede	Infirmier + étudiant en Master de Santé Publique
Florent Avry	Infirmier anesthésiste
Gaydon Cyril	Infirmier anesthésiste
Martinez Julien	Infirmier diplômé d'état
Fernandez Gwenaelle	Infirmiere
Sandrine Margueron	Infirmière Educatio Nationale
Frédéric Le Gac	Informaticien
Delaveau	Ingenieur
Jean-Michel Perque	Ingénieur
Alexandre Lacroix	Ingénieur
Quentin Lavaud	Ingénieur biomédical
Quentin Rousset	Ingénieur biotechnologiste
Aude Sirven	INgenieur de l'ecole polytechnique +Doctorat de biologie
Cyrille Jeancolas	Ingénieur de l'Institut des Sciences et Industries du Vivant et de l'Environnement (AgroParisTech) spécialisé en bioingénierie cellulaire et moléculaire.
Jordan Belisard	Ingénieur diplômé et doctorant en mathématiques appliquées
Charles-Antoine Truchon	Ingénieur en Agriculture
Julien Renou	Ingénieur Génie biologique
Armand Lattes	ingénieur, Dr ès sciences physiques, Dr en pharmacie
Roxane Varengue	Interne de pédiatrie
Veil	Interne de santé publique, Msc epidemiologie
Alexandre Behouche	Interne en anesthésie réanimation, Docteur en pharmacie, Master en sciences

Henri Wohrer	Interne en Gynécologie Obstétrique
Vianney Tuloup	Interne en pharmacie
Jordan Bouter	Interne Oncologie
Desjardins	Kiné
Antoine Quintard	Kinésithérapeute
Guy Marin	Kinésithérapeute
Bastien Roche	Kinésithérapeute ; Master 2 Recherche en réadaptation.
Victor LEBRAULT	Kinésithérapeute DE
Theo-Piwowarczyk	Kinésithérapie
Ruben Blaize	Kinésithérapie
Lacoste Gaëtan	Kinésithérapie
Raphael Dubois	kinésithérapie
Florian Damas	Licence Physique - Master Physique Fondamentale - Doctorat Physique Subatomique
Hugo Thomas	Masseur Kinesitherapeute
Cabot	Masseur kinésithérapeute
Hugo Compagnon	Masseur Kinésithérapeute
Jaouen Romain	Masseur Kinésithérapeute diplôme d'Etat
Grégoire Maire	Masseur Kinésithérapeute diplôme d'Etat
Mickaël Duveau	Masseur Kinésithérapeute diplôme d'Etat
Maxime Kosmala	Masseur Kinésithérapeute diplôme d'Etat
Palomares Samuel	Masseur Kinésithérapeute diplôme d'Etat
Marie Miller	Masseur-kinésithérapeute
Nadir Laïd	Masseur-kinésithérapeute diplômé d'état
Corentin Guigot	Master : Recherche en Physique Subatomique
Dechaud Corentin	Master bioinformatique moléculaire : methodes et analyses, actuellement en 3ème année de thèse
Guillaume Petiot	Master droit de la santé
Alexandre Tetard	Master en cancérologie Doctorant bactériologie
Girod	Master en kinésithérapie
Nicolas Minier	Master ingénierie biomédicale - biomatériaux ("BioMedical Engineering in Paris" master program, subtrack "Biomaterials")
Maillefert	Master MEEF S2IME
Omar El Hamoui	Master Sciences de la Vie parcours Ingénierie et Chimie des Biomolécules
Montès	MCF Écologie et enseignement esprit critique
Paquet	MD
Pradel Vincent	MD Ph D
Andrea Lazzati	MD PhD
Thomas GILLE	MD, PhD
Xavier Laberrenne	Medecin
Vincent Ropars	Médecin

Céline Berthié	Médecin
Georges Delamare	Médecin
Corinne Hamel	Médecin
Julien Sandjivy	Médecin
Sandrine Manière	Médecin
Mahefa Mara	Médecin
Olivier Ladon	Médecin
Mathieu Pizon	Médecin
Mathieu Van Dessel	Médecin
Nicole Vimont	Médecin
Anne Dambor	Médecin
Maeva Hegron	Médecin
Guillaume David	Médecin
Emilie Pinon	Médecin
Jean-Jacques Fraslin	Médecin
Sébastien Pouzoulet	Médecin
Erwan Zidi	Médecin
Matthieu Casanova	Médecin
Jean Patrick Maillard	Médecin
Anne Visdominé	Médecin
Pierre Marc Lallemand	Médecin
Caroline Chalvignac	Médecin
Claire Pluchart	Médecin
Moreau	médecin
Jean-Christophe Nogrette	MÉDECIN
Esfandi David	Médecin
Bernard Wattrelot	Médecin
Ivan Lerner	Médecin
Cécile Toper	Médecin
Alban Giguët	Médecin
Isabelle Tassin	Médecin
Dardenne	Médecin
Peris	Médecin
Louis Champetier De Ribes	Médecin
Wautier Anne	Médecin - gynécologue médicale
Schneider	Médecin Biologiste
Abittan	médecin gastro enterologue
Calafiore Matthieu	Médecin généraliste
De Bremond D'ars Pierre	Médecin généraliste
Mazan	médecin généraliste
Mathieu Piccoli	Médecin gériatre

Vercueil Laurent	Médecin hospitalier en centre hospitalier universitaire
Pascale Brichon	Médecin pédiatre
Véronique Christine Tissier	Médecin pédiatre
Le Coustumier	Médecin pneumologue infectiologue
Pascal Christine	Médecin spécialiste en radiodiagnostic
Thomas LE BERRE	Médecine générale
Anne Marie Panet	Médecine générale
Bonnet	Médecine générale
Jean Christophe Breton	Médecine générale
Baptiste Vachon	Médecine, internat et clinicat de MG
Nicolas Cornière	Néphrologie
Julien Gere	Neurologue
Tarroux	Odontologie
Kania	orthopediste podologue
Marion Cyprien Patry	Orthophonie
Aurélien Carli	Orthophoniste
Perine Balbiani	Orthophoniste
Anne Charbonneau	Pédiatrie médicale
Benoit Guillot	Pharmacie
Roger Ducouso	Pharmacie
Govin	Pharmacien
Alain Groulard	Pharmacien
Pierre Bourlioux	Pharmacien
Frédéric Lagarce	Pharmacien
Pierre Filhine Tresarrieu	Pharmacien
Hichem Bouchenaki	Pharmacien - Phd student
Camille Paradis	Pharmacien adjoint d'officine
Laganier	Pharmacien Biologiste Médical
Antoine Le Joubioux	Pharmacien hospitalier
Jérôme Grosjean	PharmD, MsC, medical biologist
Coquelle Nicolas	Phd
Pierre Mengal	Phd
Thomas Durand	Phd
Camille Morel	PhD
Georges Steven	Phd Biologie-santé
Laurent Decret	PhD Chimie
Frédéric Mazoit	Phd en informatique
Simon Thierry	Phd informatique
Marc Landry	PhD Neurosciences
Rosa Ramirez	PhD Physique
Théo Accogli	Phd student

Corentin Lefebvre	Phd student
Sébastien Delhaye	Phd student
Yoann Montigaud	Phd student
Phlippe Audion	Physiothérapie
Corinne Perdrix	Pr associée de médecine
Jacques Milliez	Pr de médecine
Guy Devaux	Pr de pharmacie
Guillaume Le Baut	Pr de pharmacie
Cyril Domptail	Professeur agrégé de génie mécanique
Laurence Compagnon	Professeur de médecine générale
Durando	Professeur des université Praticien hospitalier
Pr Jacques Hm Cohen	Professeur des Universités / Praticien Hospitalier
Charlotte Richoux	Psychologue
Christelle Ledour	Psychologue
Jean Louis Adrien	Psychologue
Eugénie Launay	Psychologue
Dr Christian Lehmann	spécialiste en médecine générale
Sylvain Routhiau	Technicien de laboratoire médical
Cécilia Illie	Université de médecine
Fastier Antony	Vétérinaire
Laurène Anne	Vétérinaire
Auréli Le Brettevillois	Vétérinaire
Pierre-Louis Malaize	Vétérinaire
Alain Braillon	Physician, PhD
Noel Urosa Cruz	Physiotherapy, BC
Amélie Beagrand	Physician, MD
Alejandro Manzano	Genomic Sciences, PhD
Anouk Willemsen	Biologist, PhD
Susana Quijano Roy	Physician, MD
Ismael Kenneth Ortega Colomer	Chemist, PhD
Cyrille Monin	Physician, MD
Daniel Ruiz Vallejo	Physiotherapy, MS
Point Sébastien	Physicist, PhD, Psychologist, MS
Jose Maria Montoya Teran	Biologist, PhD
Olga Pacios Santamaria	Biotechnologist, MS
Maria Benavente Diaz	Biologist, MS
Ferdinand Roesch	Biologist, PhD
Marie Cachera	Biologist, MS
Sergey Kolchenko	Biologist, MS
Laura Barrio Cano	Biologist, PhD
Matthias Wagner	Biochemist, MS

Ana Llopis Moreno	Physiotherapy, Dipl
Mathieu Bohm	Biologist, PhD
Yamini Ravichandran	Biotechnologist, MS
Kartik Soni	Biologist, PhD
Roberto Palacios Ramirez	Biologist, PhD
Andrés Trujillo León	Engineer, PhD
Lamia Slitine	Docteur en Médecine
Frank Ramus	Docteur en Science Cognitive
Eric Postaire	Docteur es sciences pharmaceutiques
Jean Roger Claude	Dr en pharmacie, Pr de toxicologie
Kevin Moris	Ingénieur chimiste, professeur agrégé
Mickael Bettoun	Interne en Médecine générale
Clémence Ponsin	Orthophoniste
Noémie Perez	Pédiatre
Kevin Réby	Pedicure-podologue /// Bioinformatique
Olivier Dodier	PhD psychologie
Henri Broch	Professeur de Physique et de Zététique, Université Nice Sophia Antipolis
Jerome Chantreau	Vétérinaire
Van Dessel	Medecin
Cassoret Bertrand	Ingénieur, doctorat en génie électrique
Gilles Geirnaert	Docteur-ingénieur
Melanie Martínez	Master psychologie
Antony Fastier	Vétérinaire
Jacques Levy	Médecin
Emilie Raigue	Psychologue
Milena Kostova	Psychologue
Theisseire	infirmière
Jean Fluchere	ingénieur en électricité et génie atomique
Maëlle Gervais	orthophoniste
Hague Sebastien	Psychologue
Morehead Juliette	Psychologue
Charles Lourioux	infirmière
Christophe D'hulst	Docteur en Biologie et HDR
Pedro Reis	Physician, MD
Myriam Heuertz	Biologist, PhD
Ana Rivero	Biologist, PhD
Marie Mélissa Jasmin	Biologist, PhD

António Magalhães	Licenciatura em Medicina
Catarina Pechincha	Mestrado em Biologia Celular e Molecular
Rafael Galupa	Doutoramento em Genética e Biologia do Desenvolvimento
Ricardo Mexia	MD, MPH, EPIET
António Machiavelo	Doutoramento em Matemática
Sérgio Pita Antão	Licenciatura em Ciências da Nutrição
Hugo Paiva	Mestrado em Medicina
Miguel Marta	Licenciatura em Medicina
Daniel Ribeiro	Mestrado em Comunicação de Ciência
Leandro Ribeiro	Mestrado em Medicina
Sérgio Neto	Mestrado em Fisioterapia
Flávio Simões	Licenciatura em Medicina, formação específica Medicina Geral e Familiar
António Maria Trigueiros de Sousa Alvim	Licenciatura em Medicina
Cláudia Leite	Mestrado Integrado em Medicina
Hugo Rodrigues	Licenciatura em Fisioterapia
João F. Lourenço Monteiro	Licenciatura em Biologia / Mestrado em Biologia do Desenvolvimento
Carlos Luís Lousada	Licenciatura em Medicina
Joana Santos	Licenciatura em Medicina
Luís Rosário	Mestrado em Medicina
João Leite da Silva	Mestrado Integrado em Medicina
Susana Ramalhete	Doutoramento em Ciências Farmacêuticas
Maria Margarida Vieira	Doutoramento em Estudos da Criança
Rita Martins	Mestrado em Geologia Dinâmica
Ana da Cunha Pimentel Pereira Barbosa	Licenciatura em Biologia Celular e Biotecnologia, com especialização em Genética Molecular
Luís Quintela	Licenciatura em Fisioterapia

Isabel Ventura	Licenciatura em Medicina
Marlene Calisto	Licenciatura em Medicina
Filipa Senos Moutinho	Mestrado Integrado em Medicina
Joana Lobo Antunes	Doutoramento em Química Organica
João Carlos Gonçalves	Mestrado
Filipe Ramos	Mestrado Integrado em Engenharia Electrotécnica e de Computadores
Filipe Pacheco	Licenciatura em Medicina
Ana Nugal	Doutoramento em Ciências Biomédicas
Nuno Madeira	Licenciatura em Medicina
Catarina Espírito Santo	Licenciatura em Medicina
Maria João Moura Paes	Licenciatura em Medicina
Marina Pimentel	Licenciatura em Enfermagem
Paulo Guerreiro	Doutoramento em Ciências Biomédicas
Sara Brandão Machado	Mestrado em Medicina, especialista em Medicina Interna
Susana Lérias	Licenciatura em Medicina Dentária
Helena Teixeira	Mestrado em Ensino da Matemática
Luis Gargate	Doutoramento em Física
Hugo Cadavez	Licenciatura em Medicina
Tiago Nunes	Mestrado Integrado em Medicina Veterinária
Tiago Beites	Doutoramento em Biologia
João Cerqueira	Licenciatura em Medicina
João Pereira	Mestrado Integrado em Medicina Veterinária
Camila Ramos Nóbrega	Licenciatura em Medicina
Catarina Martins	Licenciatura em Ciências Farmacêuticas
Diogo Leitão	Mestrado em Ciências Farmacêuticas
Sérgio Caldeira	Licenciatura em Antropologia
Mariana Fernandes Alves Pereira	Mestrado em Neurociências
Luís Azevedo Rodrigues	Doutoramento
Igor Glória	Mestrado em Medicina
André Moura	Mestrado em Medicina
João Gaspar	Licenciatura em Engenharia Química
Ana Martins	Licenciatura em Química
Marta Simões	Mestrado em Ciências Farmacêuticas
Miguel M. Gonçalves	Doutoramento em Psicologia Clínica
João Aveiro Freitas	Mestrado em Medicina
Mário Certo	Engenheiro de Máquinas Marítimas
Diogo Resende	Licenciatura em Engenharia de Computadores e Telemática
Filipe Araújo	Licenciatura em Medicina
Tânia Sequeira	Licenciatura em Medicina

Pedro Lopes	Licenciatura em Medicina e Licenciatura em Enfermagem
Diogo Caldeira	Mestrado em Medicina
Andreia de Carvalho Dickinson	Licenciatura em Psicologia Clínica
Teresa Pinto	Mestrado Integrado em Medicina
Cláudia Braia	Licenciatura em Ciências Farmacêuticas
Bruno Pepe	Mestrado em Medicina
Paulo Jorge Saraiva dos Santos Luís	Mestrado Integrado em Medicina
Ana Raposo	Licenciatura em Medicina
Sandra Almeida	Licenciatura em Medicina
Joaquim José Tato Fidalgo de Freitas	Licenciatura em Medicina
David Justino	Licenciatura em Ciências Biomédicas
Marta Ilharco	Mestrado integrado em Medicina
Vera Amaral	Mestrado integrado em Medicina
João Pedro Barreiros	Doutoramento em Biologia e Agregação em Etologia
Leonardo Ferreira	Mestrado em Medicina
Soraia Pires	Licenciatura em Fisioterapia
Raquel Costa	Licenciatura em Bioquímica
Sara Paulino Contente	Licenciatura em Medicina
Tiago Jesus	Mestrado em Medicina
João Vasconcelos-Costa	Doutor, Agregado
Neusa Cunha	Licenciatura em Biologia, Mestrado em Criminologia
Diogo Medina	MD MPH MBA
Inês Tello Rodrigues	Doutoramento em Neurociências Cognitivas
Carlos Casado	Licenciatura em Medicina
Carmen Garcia	Licenciatura em Enfermagem
Armando Cavaleiro	Licenciatura em Engenharia Electrónica e de Telecomunicações
Lígia Ribeiro	Licenciatura em Medicina
José Rui Simões	Licenciatura em Engenharia Electrotécnica
Lídia Vieira	Mestrado em Saúde Pública
Ana Vasconcelos	Licenciatura em Medicina Veterinária
Vitor Jesus Marques	Licenciatura em Enfermagem
Sara Rocha	Licenciatura em Análises Clínicas e Saúde Pública
Hugo Ribeiro	Licenciatura em Medicina, Mestrado em Geriatria
Catarina Silva	Licenciada em Medicina
Albino Martins	Mestrado em Medicina
Pedro Machado	Licenciatura em Fisioterapia
Tânia Rita Ferreira da Silva	Licenciatura em Dietética e Nutrição
Maria Margarida Santos Feteira	Licenciatura em Medicina

Francisco Sande Nogueira	Licenciatura em Bioquímica, Mestrado Integrado em Medicina
Jorge Almeida	Mestrado Integrado em Engenharia Electrotécnica e Computadores - ramo Telecomunicações; Licenciatura Pré-Bolonha em Biologia/Geologia
Ana Castanho	Licenciatura em Arquitetura e Produção Alimentar em Restauração, Mestrado em Inovação em Artes Culinárias
Luis Meirinhos Soares	Licenciatura em Bioquímica
João Satiro	Mestrado Integrado em Engenharia Electrotécnica e de Computadores
António Amaral	Licenciatura em Medicina Dentária
Pedro Rebelo	Licenciatura em Medicina
Ana Reis Ferreira	Licenciatura em Medicina
Ana Pintão	Mestre em Biologia Vegetal, Licenciatura em Engenharia Agrónoma
Tiago Castro da Cunha	Mestrado em Medicina
Rui Guerreiro	Licenciatura em Medicina
Pedro Santos	Doutoramento
Daniel Lucas Brink Carvalho	Licenciatura em Fisioterapia
André Laiginhas Silva	Mestrado Integrado em Medicina
Maria João Lobato Cortesão Nobre	Mestrado Integrado em Medicina
Margarida Madaleno	Mestrado Integrado em Medicina
Sara Ferreira	Licenciatura em Medicina
Luís Filipe Ribeiro de Almeida Gomes	Licenciatura em Medicina
João Manuel Martins Alves da Silva	Licenciatura em Medicina
Leonardo Vinagre	Licenciatura em Medicina
João Nunes	Licenciatura em Medicina
Eduardo Santos Ribeiro	Licenciatura em Medicina
João Beirão	Doutoramento em Ciências Médicas
Filipe Manuel L. S. Monteiro	Licenciatura em Química Analítica (1988)
João Massano	Licenciatura em Medicina
Miriam Castro	Licenciatura em Medicina
Maria Marques	Licenciatura em Medicina
Francisca Lourenço	Ciências Biomédicas / Biomedicina Farmacêutica
Rodrigo Pires	Licenciatura em Psicologia
Ana Isabel Lucas	Licenciatura em Medicina Dentária, Licenciatura em Ciências do Desporto
Gustavo Queirós	Licenciatura em Medicina
Pedro Baptista	Licenciatura em Enfermagem
Maria Guiomar Sarmiento Dantas Guimarães da Costa	Licenciatura em Medicina (pré-Bolonha)
Hugo Lindborg	Doutoramento em Astrofísica
Pedro Vieira	Mestrado em Engenharia biomédica - Ramo de Eletrónica Médica

Bernardo Caria	Mestrado em Medicina Dentária
Paulo Fernandes	Licenciatura, mestrado e doutoramento em Engenharia Florestal
Marta Lopes	Mestrado em Engenharia Informática e Computação
João Cruz	Licenciatura em Engenharia Física e de Materiais
Luis Mendonça Galaio	Licenciatura em Medicina
Rita Costa França	MD, PhD
Sara Miranda	Mestrado em Fisioterapia
Miguel Furtado	Licenciatura em Medicina
Beatriz Andrade	Licenciatura em Bioquímica
Victor Joaquim Pereira Monteiro	Bacharelato em Engenharia Biológica
Joana Vieira	Licenciatura em Ciências da Nutrição
Catarina Feliciano	Licenciatura em Enfermagem
Vera Bártolo	Licenciada em Cardiopneumologia
Sílvia Afonso	Licenciatura em Medicina
Ana Isabel Homem de Gouveia Franco	Mestrado Integrado em Medicina (2019) e Licenciatura em Anatomia Patológica, citológica e Tanatológica (2007)
André Maia	Licenciatura em Física
João Almeida Fonseca	MD, PhD
António Pires	Licenciatura em Medicina
Ana Pereira	Licenciatura em Medicina
Mário J. Santos	Mestrado Integrado em Medicina
Tiago Jacinto	Doutoramento em Investigação Clínica e em Serviços de Saúde
Lúcia Leal de Matos	Licenciatura em Ciências Farmacêuticas
Henrique Carvalho	Mestrado em Medicina
Jorge Ascensão	Licenciatura em Psicologia Clínica e da Saúde
Nélio Filipe Santos	Licenciatura em Medicina
João Gaspar	Licenciatura em Biologia
Joana Reis	Licenciatura em Enfermagem
Rafael Luís Pereira Santos	Licenciatura em Bioquímica
Nuno Saraiva	Licenciatura em Medicina
João Correia	Licenciatura em Matemática
Inês Machado Loureiro	Mestrado em Medicina
Ricardo Jorge Pimentel Soares dos Reis	Mestrado em Medicina
Vera Alves	Licenciatura em Bioquímica, Mestrado em Medicina Legal e Ciências Forenses
Maria Ilídia Mendes Faria	Licenciatura em Medicina Veterinária
Margarida Mateus	Licenciatura em Ciências Farmacêuticas
Bruno Pinto	Doutoramento

Ana Nunes de Almeida	Doutoramento / Habilitação
Maria do Carmo Roque Lino Felgueiras Barreto	Licenciatura em Biologia, Mestrado em Biotecnologia, Doutoramento em Bioquímica
Joana Barata Tavares Medeiros de Almeida	Licenciatura em Medicina
Gilberto Pires da Rosa	Mestrado Integrado em Medicina
Diogo F. Ferreira	Mestrado
José Luís Cabral	Doutoramento
Sara Vasco	Licenciatura
José Mendes	Licenciatura em Medicina
Lúisa Magalhães	Licenciatura em Medicina
Joaquim António Peres Gago	Licenciatura em Medicina
Raquel Ferrão Andrade	Mestrado Integrado em Medicina
Bernardo Pinto	Licenciatura em Fisioterapia
Ana Ferreira	Licenciatura em Medicina
Filipa Ribeiro	Licenciatura em Medicina
José António Cunha Coutinho	Mestrado Integrado em Medicina
Bernardo Sousa-Pinto	Mestrado Integrado em Medicina
Ana Cristina Esteves	Doutoramento
Ricardo Reis	Licenciado em Medicina
Guadalupe Jácome	Licenciatura em Biologia
Inácio Reis	Mestrado integrado em Medicina
António Piedade	Licenciado em Bioquímica
Jorge Velez	Licenciado em Medicina
Fernando António Pinheiro Calejo Pires	Licenciatura em Medicina
Tiago Ramos	Mestrado Integrado em Medicina
Armando Brito de Sá	Doutoramento em Medicina
Ana Luisa Soares Pereira Fernandes	Licenciatura em Medicina e Especialidade em Psiquiatria da Infância e Adolescência
Fabiola Gil	Mestrado em Gestão e Conservação da Natureza
Maria Manuel Valente Correia da Silva Moreira	Mestrado integrado em Medicina, Mestrado em Medicina Legal
Bruno Maurício	Mestrado integrado em Medicina
Ana Filipa Santos	Mestrado integrado em Medicina
Sara Cunha	Mestrado Integrado em Medicina
João Pedro Soares	Mestrado em Medicina
José Marinho	Licenciatura em Medicina
Marco Lopes Ferreira	Mestrado em Medicina
Joana Campins	Licenciatura em Medicina
Helena Beça	Licenciatura em Medicina, Mestrado em Cuidados Paliativos
Rita Amaral	Mestrado em Medicina

Luís Filipe Vicente Saraiva	Mestrado integrado em Medicina
Francisco Ferreira e Silva	Licenciatura em Medicina
Ivo Manuel Teixeira Alves	Licenciatura em Medicina Veterinária
Isabel Gonçalves	Licenciatura em Medicina Veterinária
Inês Ribeiro	Licenciatura em Psicologia Clínica
João Pedro Calafate	PEB de Matemática e Ciências da Natureza
Jorge Dickson Leal	Licenciatura em Medicina
Maria João Bigode	Licenciatura em Fisioterapia
Fátima Tavares	Mestrado em Medicina
Afonso Moreira	Mestrado Integrado em Medicina
Rui Guerreiro	Licenciatura em Medicina
António Castanhola Batista	Doutoramento
José do Egito Antunes	Doutoramento em Engenharia Química e Biológica
João Avó	Doutoramento em Química Física
Diogo Queirós	Doutoramento
António Pires	Doutoramento
João Paulo Pedroso	Licenciatura em Sociologia
Daniel Pereira da Silva	Licenciatura em Medicina
Miguel Pais	Doutoramento em Biologia Marinha
Nuno Paulo Rocha Almeida	Licenciatura em Medicina
Ana Bonito	Licenciatura em Biologia e Mestrado em Evolução e Biologia Humanas
Jorge Alves	Licenciatura em Educação Física e Desporto
Fernando Magalhães	Licenciatura em Psicologia
Paula Alves	Doutoramento em Medicina
António Vaz	Licenciatura em Biologia
Maria da Conceição Lobato Barroso	Licenciatura em Medicina
Maria Teresa Capela	Licenciatura em Medicina
Bernardo Costa Neves	Mestrado em Medicina
Pedro Maciel Barbosa	Licenciatura em Fisioterapia
Teresa Pestana Gonçalves	Licenciatura em Medicina
Sofia Brissos	Licenciatura em Medicina
Diana Pereira	Licenciatura em Medicina
Diogo Almeida	Mestrado em Medicina
Joana Paula	Mestrado Integrado em Medicina
Francisco Gonçalves	Licenciatura em Educação Física e Desporto
Maria Antunes	Licenciatura em Nutrição
Carla Borges	Mestrado Enfermagem, Saúde Materna e Obstétrica
Patrícia Silva	Mestrado em Biofísica e Bionossistemas
Silvia Castro	Doutoramento

David Marçal	Doutoramento em Bioquímica
Gonçalo Contente	Licenciatura em Ciências da Nutrição
Ana Matias	Doutoramento
Pedro Freitas	Licenciatura em Biologia
Duarte Olim	Licenciatura em Engenharia Florestal
Maria Teresa Fernandes Ventura	Doutoramento em Medicina
Helder Araújo	Doutoramento
Ricardo Ferreira	Mestrado em Ciências Farmacêuticas
Bruno Salgueiro	Licenciatura em Enfermagem
Telma Soares	Mestrado em Biofísica e Bionanossistemas
Daniel Rodrigues	Licenciatura em Enfermagem, Mestrado em Saúde Pública
Estela Caçador	Mestrado Integrado em Psicologia
Rúben Jesus	Licenciatura em Enfermagem
Ana Luísa Moreira de Carvalho	Doutoramento em Bioquímica
Marinho Lopes	Doutoramento em Física Aplicada às Neurociências
Vasco Bonifácio	Doutoramento em Química
Rui Soares	Doutoramento
Jose Luís Fogo	Licenciado em Medicina, Mestre em Oncologia, Doutor em Ciências Médicas
Silvia Fernandes	Mestrado Integrado em Medicina
Tiago Dias	Doutoramento em Biotecnologia e Biociências
Vitor Paixão Dias	Licenciatura em Medicina
Jorge Polónia	Doutoramento
Celso Pontes	Licenciatura em Medicina
Paulo Ramos	Licenciatura em Informática
Andreia Pereira	Licenciatura em Bioquímica / Mestrado em Biotecnologia
Adriana Carapucinha	Mestrado Integrado em Medicina
Nelson Descalço	Licenciatura em Medicina
Filipa Duarte Figueiredo	Mestrado Integrado em Medicina
Maria João Baptista Freire Baião	Mestrado em Medicina
Rui Manuel Trabucho Caeiro	Licenciatura em Medicina
Ana Lopes	Licenciatura em Enfermagem
Hugo Couto	Mestrado em Gestão de Unidades de Saúde
Vasco Ricoca Peixoto	Licenciatura em Medicina
Tânia Santos	Licenciatura
Carlos S. Neri	Licenciatura em Medicina
Mauro Guerra	Doutoramento em Física
João Arménio Lamego Lopes	Doutoramento em Psicologia
João von Gilsa Lopes	Mestrado
Hernani Baptista	Doutoramento em Física
