

Medical Equipment Refinishing Systems, Inc.

“Restore your Image”

**Modernize your equipment with
convenient ON-SITE restoration**

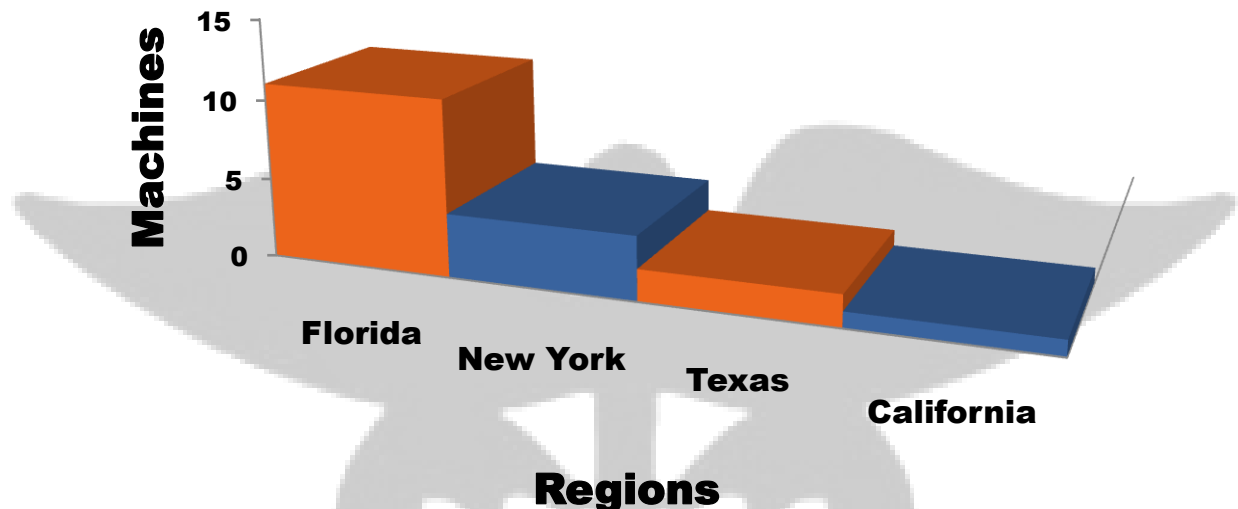

Making a great first impression to your patients is the key to promoting a professional image of your hospital or office equipment. We specialize in refinishing linear accelerators, MRI and CT equipment. There is a wide variety of custom colors selections to match your interior design and to maintain your investment. Medical Equipment Refinishing Systems, Inc. offers a flexible schedule that allows for a weekend work option that will allow a minimal impact on your patients and staff.

Nationwide Service in 2007

Florida Region	New York Region	Texas Region	California Region	Total Machines
11	4	2	1	18

When comparing the price of a new linear accelerator at 1.5 million dollars, the average 10,000 dollars refinishing service is worth the investment. With over 40 plus years of service the Medical Equipment Refinishing Systems, Inc. personnel will use portable clean room technology for cleanliness and use high-quality, state-of-the-art urethane finishes. That will result providing low maintenance, which will save time and money in the future.

Service's provided in 2007

Reference

"Your service is well worth the price and I would recommend you highly to anyone who asks... I am particularly impressed with your method of setting up a paint booth within the room and thus contained the paint odor, dust, ect."

David P. Miller, MS., DABR Director Medical Physics
Walt Disney Memorial Cancer Institute Florida Hospital,
Orlando, Florida
