

## Epic Duels Paper Minis

Here are some cut, paste, and fold miniatures for some more alternate characters with decks here on the site. They were based partly on popular request from the discussion group and partly on what decks I play personally. Hope others find them of use.

To assemble, cut the various minis apart. Each mini consists of a front, a back, and little tabs on the bottom of each end. You'll notice one tab is longer than the other; this is intentional. Cut them apart, then fold along the middle, and fold each tab. Glue the small tab to the inside of the large tab, then tape or glue a penny into the base to help it stand up.

Included in this set are:

- The Bounty Hunters. 4-LOM, Bossk, IG-88, and Zuccus are the original works of Bill Cable. He sells sketches individually and does commission work. These sketches are included with his gracious permission. His website can be found at <http://www.creaturecantina.com/cable/>. Dengar was rendered in Bryce using a model I found at the Star Wars Modeling Alliance site and then further manipulated in Photoshop. The creator of the model is not listed and the model is assumed to be in the public domain (less the obvious © and such held by Lucas et al).
- Mara Jade and Lando. The Mara Jade artwork was done by an unknown artist and found via a Google image search and lightly manipulated in Photoshop to fit the rectangular format of these minis better. The Lando image was graciously provided by Bill Cable.
- The Jawa Clan. All Jawa images are based on a Poser Jawa I found on the web, rendered in Poser 4 and further manipulated in Photoshop (we sensing a theme yet? ;).

As always, layout was done in Pagemaker 7 on a PowerMac G4.
