

1) The Reading Assignments are kinda very very basic. Just make sure you know enough so that your group could present it to others. It is the responsibility of the Group reps to make sure that the whole group gets to know the topic they have been assigned. The Group reps can call meetings etc ..(thats purely on your discretion guys..that much liberty you have).

2) The idea is to bring everybody to a common platform (The skill set is kind of very very diverse...from what i have gathered from the mails...so You may find the reading assignment nowhere related to your skillsets... :)))

3) The Groups will be retained for the rest of the semester. (Yup..exceptions are always there...)

4) the fun part lies in the fact that there can be an inter/ intra-group competition wherein each group will try to outwit the rest by cracking the challenges posted.

5) MAKE SURE YOU GUYS MAKE A SOFT COPY OF WHATEVER U READ / WILL PRESENT..AND MAIL ME..nsf@bits-pilani.ac.in. WE WILL UPLOAD IT ON THE WEBSITE...(GIVING U DUE CREDITS ;)) A TUTORIAL KIND OF THING FOR OTHERS.....

6) I believe you get to learn the most when you have to teach others...So some of you will be there with me when we design problems for SWORDFIZZ (hacking contest in APOGEE) , configure servers etc etc. But which ones ????. Just let me know how many of you are interested...;-)

7) Here are four more topics which you can switch with..if you dont like your assignment there can be intra-group assignment switches as well...

- 1) BASICS OF ASSEMBLY LEVEL PROGRAMMING
- 2) BASICS OF SQL
- 3) BASICS OF SHELL SCRIPTING and PERL
- 4) BASICS OF VB / PYTHON

nyway Herz the basic (:(() reading assignment for you guys...
