

Nayet Neighbor Neighborhoods

In Sanskrit we Universal Religionist always talk about “VASUDEVA- KUTUMBAKAM”.

Which literally means world is a family. We are doing just opposite all over the world.

In name of New World Order we are destroying the world. We feel good only when we are better than our neighbor in comparison. Thought never occur to us that our neighbor should have all that what we have achieved economically, educationally or socially. That is our thinking that we want to say Nayet (no) for our neighbor. Outsiders can be active as catalyst to create self-confidence and self-reliance, but it is the neighbor who will be helping neighbor, then only neighborhood will improve.

US had spent more money to save Iraq's people from Saddam's corrupt regime, than we need to stomp world hunger all together. Then there won't be jobs created for Multi Nationals, who will get the contract to rebuilt Iraq. Some one will not get paid for free speeches, in Millions of Dollars, after retirement in order to build a legacy library.

Main purpose of this article is different, which is if we say no to our neighbor than neighborhoods cannot be improved. In broader sense this what big daddy- like super powers (USA) is doing? In new world order world is considered a one big Market Economy. That is how WTO is seen and created. Then every nation is like neighbors to each other. American Government will not give 80 Billions dollars for development of so called third world countries in one year but to save poor Iraqis from a tyrant it can spent that kind of money without even substantial proof and authorization of elected bodies and totally ignoring the popular public opinion. Or we can say personal vendetta of one father, son had to finished the job in order to save the honor, also save USA from terrorist. Which is unfortunately not finished yet and who knows how many more innocent lives had to be lost. Who needs terrorist, when we our selves can shoot more people each year in good old America, even in New York City Council under the tightest security-Code orange shooting can be done, than all terrorist had done in last ten year (we can check the statistics separately). We got the point I think which I am trying to get across. Please don't let gun manufacturer's lobby see this article otherwise their freedom to bear arm speech will be heart.

Every one loves his or her religion that is good, only addition I wish to add is that no body irrespective of his/her alliance should be hungry with in a radius of 5 K.M. from places of worships. This appeal I am making on basis of helping neighbor. If we achieve this dream fulfilled. We can rest assure that there would not be problem with improving the neighborhood eventually. Talking good about neighbor is not going to do any good unless we practice it. When we can extend this principle of good neighbor to nations, neighborhood will improve means we will live like a good neighbor and world will be a one great family and also New World Order can be achieved.

If you go on saying no to your neighbor, neighborhood will never be prosperous. Our slogan should be yes to our Neighbor, then neighborhood will improve, then countries and then World will be a better place to live.
