

# O'-SHE

**The abbreviation O'-SHE spells like Oasis of Spirited Human Experiences. She (women) really represent the sum total of all human experiences so far happened. If you turn the pages of history you will find that at every turn she is the one who had suffered, blamed or very seldom given credit. But think about whom has the power to transfer these experiences to next generation or to stop going down only she has the power.**

**It is she who suffers maximum when there is war between two foes or friends alike, and most of the time blamed for one. Second comes land.**

**Now think about whom has power to reproduce and carry through –she.**

**But now it can be argued that human can be cloned but remember it will be carbon copy but nothing can be added or reduced easily which she can do it with her thought process during the pregnancy easily for new generation. In order to cope with new challenges of life. She can easily manifest the next generation with all the experiences she had gone through easily; hence that she is still needed.**

**As matter of fact Napoleon said rightly “Give me good mothers and I will give you a good Nation”.**

**And I wonder why throughout the history she was projected as the weaker one except in early HINDU Religion, and it was realized she is the power to deal with respect as MOTHER. And of course in some African tribe she has the respect she deserves.**
