

Trust

No one can exist in this complex world today alone, so we have to take help of others to survive. Others does not mean our kith and kin but also whole animal and plant kingdom beside other human being. This certainly need a trust in our mind and it is one thing we need plenty in practice, unfortunately we see trust more and more in talk, which is cheap. Trust is a positive bonding., If you trust someone you get trust most of the time in return, if you doubt than certainly you don't get trust in return. Doubt is a negative connotation.

Why trust is so important part of life? As stated above without trust fundamental life won't be exist as we see in this world. Because of trust; faith, confidence, reliance, interdependence exists. Trust also refers to feeling that a person or thing will not fail in performance. Trust implies depth and assurance of such feelings, which may not be supported by proof. Where ever and when ever a trust is broken or breached problems will occur. In this way trust is something you gain in life an as many things as proven to be trust worthy.

Trust also means less intensity of feeling but frequently good evidence for being sure. Trust implies a decision to commit oneself to another and to accept the consequences in case of failure. When trust is also the commitment, not without a free choice it could be lead to dependence.

Trust is also an alliance of similar business in order to rip off its customers (clients in price gauging) then government had to have anti trust law to be in forced. We as user believe in the business to get regular supply at reasonable rate. Above type of trust is really mistrust, like we are seeing for last three years in case of gasoline products pricing at pump.

What you do when majority of rules of a country like India are based on mistrust. We should speak out freely and try to get rid of such rules or replaced them by proactive rather than unproductive rules. Otherwise lot of energy and time is wasted in following such rules and it hinders the progress of the country or communities. Here I will not go in details why such rules are there, but we are pretty sure these are based on doubt about our integrity in the system. Doubt always creates problems. We should have rules, which will proactive and take our country forward, not which stop us so any times that we become frustrated. New terminology of streamlining the rules is called re-engineering. Let us take an example that an 18 year old can vote and select MP/MLA but he cannot exist without his or her father's name. You cannot show me any Government form where this rule is not followed. Do we need this?

Whenever there is ambiguity trust won't be there. As a nation we will have to work together.

Alliance between bad vibes is enamor us where as between good virtues it is almost absent, reason being, the first are weak and need to be together, where as later are strong and can be independent. Still later is in majority but in news you hear more about the first one because the news only sells, which is associated with bad vibes. Think what good can be done in the world if the good tracts can work together and become more strong. The trust between bad tract is anti-trust not trust. Let us all work towards unifying the good tracts based on simple trust of each other irrespective of Race, Gender, Color, Creed, language, Religion, Region, because:

“God had trusted us to live together and at least we should trust that we can live together.”
