

VOICE

Volunteer of India for Charitable Establishments

This is a new concept, which should be expanded when, and where ever it is necessary.

In USA there is one of the many organization is known as VI (Volunteer Impact).

The main purpose of this organization is to match the volunteer with volunteering opportunities.

Many people do not have lot of time but suppose they have few hour to spare for social work there is no way they can find out how they can do it.

One way is to have a list of task Vs people available and some way to match.

That is where VOICE can play a major role and it will be beneficial for both the volunteers and charitable organizations.

For Volunteers it will be satisfying, the desire to work for a good cause.

For organizations they will get lot of volunteers for doing their job more efficiently and in timely fashion.

Summated by: (For mass Transmission)
