

Intervention outcomes for male DV offenders

Preliminary Data
Gilbert MacVaugh and Alan Rosenbaum (Unpublished)

Demographics

- N= 1,150 male DV offenders (Based on all 1999 DV arrests for whom data were available in Worcester District Court)
- Age: Mean= 32.09 Years (S.D.= 9.65)
- Race: 54% Caucasian, 19% AF-AM, 24% Hispanic, 4% Asian-AM, 2.4% Unknown origin
- Included Offenses: A&B, A&B w/ dangerous weapon, Violation of restraining order, Criminal threatening (All against female partner).

Criminal Justice System Response

- Arrest Only: n=540 (24.8%)
- Probation: n=133 (11.5%)
- Incarceration: n=164 (14.2%)
- Anger Management: n= 91 (7.9%)
- Certified BIP: n=74 (6.4%)
- Substance Abuse Eval or Tx: n=28 (2.4%)
- Other Counseling: n=19 (1.6%)
- Treatment non-completers: n=106 (9.1%)

Recidivism

- Overall Re-offense rate: 40% (Between 1999 and 2004)
- Type of re-offense
 - DV- 18%
 - Non DV- 15%
 - DV plus Non-DV- 23%

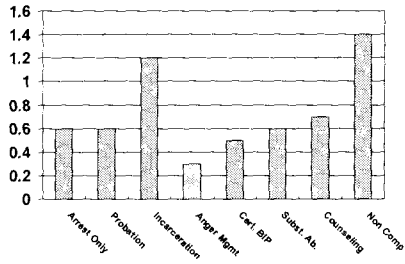

Recidivism

- Compared to the criminal justice intervention only (arrest, incarceration, etc.), offenders having any type of treatment had significantly lower rates of recidivism (31.5% vs. 41.6%) and
- Fewer number of re-offenses (0.46 compared to 0.79).

Recidivism by disposition

- | | |
|----------------------------|-------|
| ■ Arrest only | 33.2% |
| ■ Probation only | 36.1% |
| ■ Incarceration | 56.7% |
| ■ Anger Management | 22.0% |
| ■ Certified BIP | 35.1% |
| ■ Substance abuse Tx only | 42.9% |
| ■ Counseling unspecified | 47.4% |
| ■ Treatment non-completers | 67.6% |
