

Hi, here Is a system that I have used at the casino a few times and it never failed, you will have to keep good track of every spin, and play every spin, here is how it works, its a bit like rule before the last, but you will be playing like this, first you will need seven columns this will be your tracking score card, this is what each columns will be: 1st, 1-18 2nd, odd 3rd, red, 4th, black 5th, even 6th, 19-36 these can be in any order 7th your total profit This is just for tracking purposes, you only need to track one spin before you play, and every spin after for eg you track the first spin and it was, red, high, even 36, you mark down on your score card one hit on each column which was associated with that number, look at the diagram below to get a better understanding, now we will be placing flat bets on the even money bets which have had the most hits, in our eg it is red, even and 19-36, we place the same unit on each of these even money bets,

1st, 1-18 2nd, odd 3rd, red, l 4th, black 5th, even 1 6th, 19-36 1 these can be in any order 7th your total profit second spin, is 20, black, even and 19-36, we win on two of the bets and lose on one, profit one unit (put down 3 units and now have 4units) put in profit column +1, then mark one hit on each column which is associated with the number that came up, our scorecard should now look like this:

1st, 1-18 2nd, odd 3rd, red, l 4th, black l 5th, even 1l 6th, 19-36 1l these can be in any order 7<sup>th</sup> running total profit +1, looking at our scorecard you should now know what even money bets to place your money on, you will be placing one unit on even and 19-36, as they have more hits than the others, next spin is 12, even, 1-18, red, so you break even, you lost one unit and lost the other, you wont have to mark down anything on your running profit as you are still up one unit, but remember you always have to mark down on the other column which were associated with the number that come up, you score card should now look like this:

1st, 1-18 l 2nd, odd 3rd, red, ll 4th, black l 5th, even 1ll 6th, 19-36 1l these can be in any order 7<sup>th</sup> running total profit +1, next spin we will placing one unit on even, as it has had the more hits than the other even money bets, by now you should understand how to play my system.

## Why casino executives fight mathematical gambling systems

Casino Gambling Software: Baccarat, Blackjack, Roulette, Craps, Systems, Basic Strategy

## Software for Lottery, Lotto, Pick 3 4 Lotteries, Powerball, Mega Millions, Euromillions, Keno, Horse Racing, Blackjack, Roulette, Baccarat, Sports Betting, Gambling, Probability, Odds, Statistics, Mathematics

## <u>Download the Best Software for Lottery, Gambling, Lotto, Powerball, Mega Millions,</u> <u>Euromillions, Horse Racing, Blackjack, Roulette, Sports Betting, Probability, Statistics</u>
