To disable unneeded startup services for a safer, faster XP, use the "Services" Admin Tool (Control Panel > Administrative Tools > Services). If you are a single user of a non-networked machine, you can disable the following items, with no ill effect.

Alert

Clipboard

Computer Browser

Fast User Switching

Human Interface Access Devices

Indexing Service (Slows the hard drive down)

Messenger

Net Logon (unnecessary unless networked on a Domain)

Netmeeting Remote Desktop Sharing (disabled for extra security)

Remote Desktop Help Session Manager (disabled for extra security)

Remote Procedure Call Locator

Remote Registry (disabled for extra security)

Routing & Remote Access (disabled for extra security)

Server

SSDP Discovery Service (this is for the utterly pointless "Universal P'n'P", & leaves TCP Port 5000 wide open)

TCP/IP NetBIOS Helper

Telnet (disabled for extra security)

Universal Plug and Play Device Host

Upload Manager

Windows Time

Wireless Zero Configuration (for wireless networks)

Workstation
