

Your Personality Trait Lines Comparison

(Based on the Q-Standard)

The 29 Personality Traits
(used in the Q-Standard)

● Omar
● Sarah

Based upon the Q-Standard, you SCORED on a scale of 1 thru 5 for each of the personality trait. Each SCORE corresponds to a STANDARD DESCRIPTION (mentioned on the previous page).

[ABOVE]:

The SCORES are plotted on a graph to create your Personality Trait Line (PT Line). Both of your PT Lines are plotted on the graph so you can visualize the similarities in your personalities. The closer the points are in each Personality Trait column, the greater the similarities in your views. Conversely, the further the points are in each Personality Trait column, the more divergent you are in views are for that particular trait. Please review this graph in order to understand the similarities you have with each other. Also note if you are able to compromise on your divergent views.
