

2008 NASCAR DRIVER POOL

The entry fee is \$36.00 for the season and you may enter as many times as you wish. We will payout one place for every 8 entries. All payouts will be based on your cumulative season points at season's end. No weekly payouts. I am hoping to get at least 40 people involved this year, so invite all your race friends. Remember this is a 100% payout league, meaning all entry money is paid to the winners.

The game plan is as follows... Pick the allotted amount of drivers from each pit stall. You will pick a total of 14 drivers. If a driver for whatever reason is not driving the car you have chosen, you will be awarded the points for the car you chose, (Example: Dale Earnhardt Jr. = Car #88) All stats will be awarded based on information found on the www.NASCAR.com website.

You can make up to six changes this season anytime during the season you wish to make them. The only rule is you must replace the driver with any driver from the same stall. If you like your team and feel good about your chances, you don't have to make any changes at all. We will continue to pay out quarterly leaders again this year. The person in first place at the end of weeks 8, 16 & 24 will receive a \$100.00 payout!

Results will be posted on the my website each week: www.sammyspools.net
