SanyBond® - 6000 HS
Modified Vinyl Topcoat Finish

SPECIFICATION DATA

- **Solids Content By Volume:** SanyBond-6000 HS 34% ± 2%
- **Theoretical Coverage Rate per Gallon:**
  - SanyBond-6000 HS 13.6 m²/Lit at 25 microns
  - SanyBond-6000 HS 3.4 m²/Lit at 100 microns
- **Mixing and application losses will vary and must be taken into consideration when estimating job requirements.**
- **Volatile Organic Content (VOC) as supplied:**
  - SanyBond-6000 HS 520 Grama/L
  - May vary with color
- **Temperature Resistance:**
  - (Non-Immersion)
    - Continuous: 150 °F (66 °C)
    - Non-Continuous: 180 °F (82 °C)
- **Flexibility:**
  - Good
- **Abrasion Resistance:**
  - Good
- **Weathering:**
  - Very Good
- **Recommended Dry Film Thickness Per Coat:**
  - 4 mils (100 microns)
- **Color Standard in:**
  - Available in a variety of colors.
- **Gloss:**
  - Flat
- **Substrates:**
  - May be applied over properly prepared steel, Aluminum or others as recommended.
- **Shelf Life:**
  - 24 months when stored at 75 °F (25 °C)
- **Storage Conditions:**
  - Store indoors.
  - Temp.: 40 - 110 °F (4 - 43 °C)
  - Humidity: 0 - 100%

Topcoat Required: Normally none. Please consult the appropriate system guide, the particular job specification or your SanyChem Coatings’ Industrial Coatings Specialist for proper systems using this product. Systems must be selected considering the particular environment involved.

Specific recommendations do not topcoat directly with coatings containing strong solvents like epoxies or vinyls.

NOTE: A test patch is recommended to assure adhesion of SanyBond-6000 HS over others coatings or the adhesion of topcoats to SanyBond-6000 HS.

Compatibility with other Coatings: May be used over Vinyls, Acrylics, Chlorinated rubbers, Inorganic Zinc, or other recommended primers. A mist coat may be required when applying over others coatings or the adhesion of topcoats to SanyBond-6000 HS.

To the best of our knowledge the technical data contained herein is true and accurate on the date of publication and is subject to change without prior notice. User must contact SanyChem Company to verify correctness before specifying or ordering. No guarantee of accuracy is given or implied. We guarantee our products to conform to SanyChem quality control. We assume no responsibility for coverage, performance or injuries resulting from use. Liability, if any, is limited to replacement of products. NO OTHER WARRANTY OR GUARANTEE OF ANY KIND IS MADE BY SANYCHEM. EXPRESS OR IMPLIED, STATUTORY, BY OPERATION OF LAW, OR OTHERWISE, INCLUDING MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. APPLICATION INSTRUCTIONS

These instructions are not intended to show product recommendations for specific service. They are issued as an aid in determining correct surface preparation, mixing instructions, and application procedure. It is assumed that the proper product recommendations have been made. These instructions should be followed closely to obtain the maximum service from the materials.

Substrates & Surface Preparation

General:

All surfaces must be clean and dry prior to coating. Remove any oil or grease with clean rags soaked in SolvenSany #252 Thinner in accordance with SSPC-SP-1-82 or power wash with SanyChem MetalCleaner #100 diluted in water and rinse.

All surfaces must be sound, dry, clean, and free of oil, grease, dirt, mildew, form release agents, curing compounds, efflorescence, loose and flaking paint and other foreign substances.

NON IMMERSION SERVICE:

Steel:

Apply over clean, dry recommended primer.

Concrete: Apply over clean, dry recommended surfacer or primer.

Mixing: Power Mix to smooth consistency before thinning.

Thinning:

May be thinned up to 12% by volume with SolvenSany #268.

May be thinned up to 12% by volume with SolvenSany #250 for temperature below 60 °F (16 °C) or where rapid drying is essential.

Application Equipment

Listed below are general equipment guidelines for the application of this product. Job site conditions may require modifications to these guidelines to achieve the desired results. The following equipment has been found suitable and is available from manufacturers such as Binks, DeVilbiss and Graco.

DeVilbiss P-MBC or JGA

Binks #18 or #62

Fluid Tip: E

Air Cap: 704

I.D.: 66

Approx. 0.070” I.D.

DeVilbiss JGN-502

Binks Model 700

Graco 205-591

Airless Spray

Use a 3/8” minimum I.D. material hose. Hold gun approximately 12-14 inches from the surface and at a right angle to the surface.

Mfr. & Gun

DeVilbiss JGN-502

Binks Model 700

Graco 205-591

Pump

QFA-34 or QFA-519

Mercury 5C or B8-36 37:1

President 30:1 or BullDog 30:1

Use a 0.017” - 0.021” tip with 2000 psi.

Teflon packings are recommended and available from the pump manufacturer.

Application Equipment

Listed below are general equipment guidelines for the application of this product. Job site conditions may require modifications to these guidelines to achieve the desired results. General guidelines:

Spray Application

Spray

Use sufficient air volume for correct operation of equipment. Use a 50% overlap with each pass of the gun. On irregular surfaces, coat the edges first, making an extra pass later.

The following spray equipment has been found suitable and is available from manufacturers such as Binks, DeVilbiss and Graco.

Conventional Spray

Use a 3/8” minimum I.D. material hose. Hold gun approximately 12-14 inches from the surface and at a right angle to the surface.

Mfr. & Gun

DeVilbiss P-MBC or JGA

Binks #18 or #62

Fluid Tip: E

Air Cap: 704

I.D.: 66

Approx. 0.070” I.D.

Airless Spray

Use a 3/8” minimum I.D. material hose. Hold gun approximately 18-20 inches from the surfaces and at a right angle to the surface.

Mfr. & Gun

DeVilbiss JGN-502

Binks Model 700

Graco 205-591

Pump

QFA-34 or QFA-519

Mercury 5C or B8-36 37:1

President 30:1 or BullDog 30:1

Use a 0.017” - 0.021” tip with 2000 psi.

Teflon packings are recommended and available from the pump manufacturer.

Drying Time:

At 4 mils (100 microns) and 50% R.H.

<table>
<thead>
<tr>
<th>Temperature</th>
<th>Recoat or to Handle</th>
</tr>
</thead>
<tbody>
<tr>
<td>40 °F(4 °C)</td>
<td>24 hours</td>
</tr>
<tr>
<td>50 °F(10 °C)</td>
<td>18 hours</td>
</tr>
<tr>
<td>60 °F(16 °C)</td>
<td>10 hours</td>
</tr>
<tr>
<td>75 °F(24 °C)</td>
<td>5 hours</td>
</tr>
<tr>
<td>90 °F(32 °C)</td>
<td>3 hours</td>
</tr>
</tbody>
</table>

These times are based on recommended dry film thickness. Excessive film thickness or inadequate ventilating conditions after application require longer dry times and will cause premature failure in extreme cases.

APPLICATION CONDITIONS

<table>
<thead>
<tr>

<td>100 °F (38 °C)</td>
<td>150 °F (66 °C)</td>
<td>120 °F (49 °C)</td>
</tr>
</tbody>
</table>

Do not apply when the surface temperature is less than 5 °F or 3 °C above the dew point.

Brush & Roller

Use natural bristle brush. Use full strokes, avoid rebrushing. Thin up to 25% with SolvenSany #268 in hot weather. If rolled, use short nap mohair roller with phenolic core. Avoid rerolling.

Cleanup & Safety

Cleanup

Use SolvenSany #252 in case of spillage, absorb and dispose of in accordance with local applicable regulations.

Safety

Read and follow all caution statements on this product data sheet and on the MSDS for this product. Employ normal workmanlike safety precautions. Hypersensitive persons should wear protective clothing, gloves and use protective cream on face, hands and all exposed areas.

Ventilation

When used as a tank lining or in enclosed areas, thorough air circulation must be used during and after application until the coating is cured. The ventilation system should be capable of preventing the solvent vapor concentration from reaching the lower explosion limit for the solvents used. In addition to ensuring proper ventilation, appropriate respirators must be used by all application personnel.

This product contains flammable solvents. Keep away from sparks and open flames. All electrical equipment and installations should be made and grounded in accordance with the National Electric Code. In areas where explosion hazards exist, workmen should be required to use non-ferrous tools and wear conductive and non-sparking shoes.

FOR INDUSTRIAL USE ONLY. KEEP AWAY FROM CHILDREN. 1/2001
