PRODUCT DATA SHEET
SanyBond® - 8000
Modified Vinyl- Alkyd Primer

SPECIFICATION DATA

- **Solids Content By Volume**: SanyBond-8000 42% ± 2%
- **Theoretical Coverage Rate per Gallon**:
  - SanyBond-8000 16.8 m²/L at 25 microns
  - 6.5 m²/L at 65 microns
- **Mixing and application losses will vary and must be taken into consideration when estimating job requirements.**
- **Volatile Organic Content (VOC) as supplied**: SanyBond-8000 517 Gram/L
  - *May vary with color*
- **Temperature Resistance**:
  - Continuous: 160 °F (71 °C)
  - Non-Continuous: 200 °F (93 °C)
- **Flexibility**: Excellent
- **Abrasion Resistance**: Good
- **Weathering**: Very Good
- **Recommended Dry Film Thickness Per Coat**: 2 - 3 mils (50 - 75 microns)
- **Color Standard in**:
  - Red, Off-White and Gray only
- **Gloss**
  - Flat
- **Substrates**:
  - May be applied over properly prepared steel, Aluminum or others as recommended.
- **Shelf Life**:
  - 24 months when stored at 75 °F (25 °C)
- **Storage Conditions**:
  - Store indoors.
  - Temp.: 40 - 110 °F (4 - 43 °C)
  - Humidity: 0 - 100%

Topcoat Required:
- May be topcoated with acrylics, Chlorinated rubbers, Vinyls, catalyzed epoxies, Alkyds or others. Please consult the appropriate system guide, the particular job specification or your SanyChem Coatings Industrial Coatings Specialist for proper systems using this product. Systems must be selected considering the particular environment involved.

Specific recommendations do not topcoat directly with coatings containing strong solvents like epoxies or vinyls.

NOTE: A test patch is recommended to assure adhesion of SanyBond-8000 over others coatings or the adhesion of topcoats to SanyBond-8000.

Compatibility with other Coatings:
- May be applied over tightly adhering vinyls, Chlorinated Rubbers, Acrylics, Alkyds, Catalyzed epoxies or other as recommended. May be use over ZinCoat-400 HS (Inorganic Zinc primers for non-immersion, atmospheric exposures.)

---

**ORDER INFORMATION:** Prices may be obtained from SanyChem Sales Representative or main Office.

APPLICATION INSTRUCTIONS

These instructions are not intended to show product recommendations for specific service. They are issued as an aid in determining correct surface preparation, mixing instructions, and application procedure. It is assumed that the proper product recommendations have been made. These instructions should be followed closely to obtain the maximum service from the materials.

Substrates & Surface Preparation

General:

All surfaces must be clean and dry prior to coating. Remove any oil or grease with clean rags soaked in SolvenSany # 252 Thinner in accordance with SSPC-SP-1-82 or power wash with SanyChem MetalCleaner # 100 diluted in water and rinse.

All surfaces must be sound, dry, clean, and free of oil, grease, dirt, mildew, form release agents, curing compounds, efflorescence, loose and flaking paint and other foreign substances.

NON IMMERSION SERVICE:

Dry abrasive blast to a Commercial Grade Finish in accordance with SSPC-SP-6-63 to a degree of cleanliness in accordance with NACE #3 to obtain a ½ to 1½ mil (12-40 microns) blast profile.

Power Tool Clean SSPC-3-82

For application over intact existing coating, the surface must be clean, dry and free of any contaminants. Loose edges should be feathered into sound coating and spot primed.

Mixing: Power Mix to smooth consistency before thinning.

Thinning: Spray:

May be thinned up to 25% by volume with SolvenSany # 276.

Brush or Roller:

May be thinned up to 25% by volume with SolvenSany # 276.

Application Equipment

Listed below are general equipment guidelines for the application of this product.

Job site conditions may require modifications to these guidelines to achieve the desired results. The following equipment has been found suitable and is available from manufacturers such as Binks, DeVilbiss and Graco.

Spray Application

Spray

Use sufficient air volume for correct operation of equipment. Use a 50% overlap with each pass of the gun. On irregular surfaces, coat the edges first, making an extra pass later.

The following spray equipment has been found suitable and is available from manufacturers such as Binks, DeVilbiss and Graco.

Conventional Spray

Use a 3/8” minimum I.D. material hose. Hold gun approximately 12-14 inches from the surface and at a right angle to the surface.

Mfr. & Gun Fluid Tip Air Cap
DeVilbiss P-MBC or JGA E 704
Binks #18 or #62 66 63 PB
I.D. Approx. 0.070” I.D.

Airless Spray

Use 3/8” minimum I.D. material hose. Hold gun approximately 18-20 inches from the surfaces and at a right angle to the surface.

Mfr. & Gun Pump
DeVilbiss JGN-502 QFA-514 or QFA-519
Binks Model 700 Mercury 5C or B8-36 37:1
Graco 200-591 President 30/1 or BullDog 30/1

Use a 0.017” - 0.021” tip with 2000 psi.

Teflon packings are recommended and available from the pump manufacturer.

Drying Time:

At 2½ mils (65 microns) and 50% R.H.

</table>

These times are based on recommended dry film thickness. Excessive film thickness or inadequate ventilating conditions after application require longer dry times and will cause premature failure in extreme cases.

APPLICATION CONDITIONS

For INDUSTRIAL USE ONLY. KEEP AWAY FROM CHILDREN. 1/2001

Brush & Roller

Use natural bristle brush. Use full strokes, avoid rebrushing. Thin up to 25% with SolvenSany # 268 Thinner in hot weather. If rolled, use short nap mohair roller with phenolic core. Avoid rerolling.

Cleanup & Safety

Cleanup

Use SolvenSany #252 in case of spillage, absorb and dispose of in accordance with local applicable regulations.

Safety

Read and follow all caution statements on this product data sheet and on the MSDS for this product. Employ normal workmanlike safety precautions. Hypersensitive persons should wear protective clothing, gloves and use protective cream on face, hands and all exposed areas.

Ventilation

When used as a tank lining or in enclosed areas, thorough air circulation must be used during and after application until the coating is cured. The ventilation system should be capable of preventing the solvent vapor concentration from reaching the lower explosion limit for the solvents used. In addition to ensuring proper ventilation, appropriate respirators must be used by all application personnel.

Caution

This product contains flammable solvents. Keep away from sparks and open flames. All electrical equipment and installations should be made and grounded in accordance with the National Electric Code. In areas where explosion hazards exist, workmen should be required to use non-ferrous tools and wear conductive and non-sparking shoes.
