Rhode Island Export-Import Directory

The **Rhode Island Export/ Import Directory** is a list of Rhode Island companies that import or export products. The list is compiled from the RIEDC Company Database. The RIEDC Company Database is a voluntary listing based on an annual mail survey of over 7,000 Rhode Island employers. The list includes contact information, employment size, percentage of products exported, export markets by country, origin of imports by country, SIC code, and a product description

This list contains business firms and selected government organizations that have reported to RIEDC that they EXPORT PRODUCTS OR SERVICES PRODUCED IN Rhode Island. **The firms are listed in alphabetical order within each sub sector of the new North American Industrial Classification System (NAICS).** This classification is replacing the Standard Industrial System (SIC) used in the past. In some cases there is not a central Rhode Island location and in those instances an out of state business address is listed. Since this list was compiled from a survey, RIEDC makes no warranty, expressed or implied, as to the accuracy of this data.

Rhode Island Export-Import Directory

STATE EXPORT ASSISTANCE PROGRAMS

To compete effectively in today's global marketplace, Rhode Island companies need to engage in exporting as a means of market expansion. Recognizing the importance of exporting to the future growth of our economy, the Rhode Island Economic Development Corporation (RIEDC) has partnered with the John H. Chafee Center for International Business at Bryant University to provide comprehensive export programs to Rhode Island companies.

Through this partnership, we offer vital introductory and developmental services to those businesses seeking to tap the external markets overseas, including programs in training and education, marketing, sales lead development, and individual counseling in the area of International Trade:

Export Trade Missions and Trade Shows: To assist Rhode Island companies to sell into international markets, RIEDC recruits companies to participate in export missions and trade shows. RIEDC develops a detailed profile of the participating company's products including technical, marketing and distribution characteristics. Based on these specific requirements, RIEDC conducts market research in the target countries and schedules customized, one-on-one business appointments. In-country logistical support, as well as pre- and post-mission services, is provided.

As principal liaison with foreign governments RIEDC hosts incoming trade delegations from other countries and provides business matches with interested Rhode Island companies.

Customized Export Management Training Programs: In partnership with the Governor's Workforce Board (GWB), the RIEDC provides funding for export training programs to qualified Rhode Island companies. International business is rapidly becoming the road to growth and prosperity for many Rhode Island companies. Through this program, eligible Rhode Island companies may obtain up to \$5,000 in matching funds to address their international training needs. Consortiums may apply for additional funding. The goal of this program is to create jobs in Rhode Island by boosting exports. Companies may implement training in the following areas: International Business Plan Development; Market Entry Strategies; Export Logistics; International Trade Mission/Show Development; Language Training.

Market Entry: The Market Entry Program administered by the international trade partnership of the Rhode Island Economic Development Corporation (RIEDC) and the United States Department of Commerce (USDOC), trains Rhode Island companies to build distribution networks in export markets. This is accomplished by identifying and scheduling meetings with qualified distributors, agents or end-users in targeted foreign markets.

Through the Market Entry Program, experienced U.S. Department of Commerce Industry Specialists, located in

American Embassies and Consulates around the world, schedule one-on-one business meetings with pre-qualified business contacts whose interests and objectives match a company's needs. They determine if demand exists for the company's products and services, screen the market, and schedule appointments in the target country with the best contacts available. The service is available in more than 70 of the world's best markets.

General Export Assistance: RIEDC's International Trade Office answers hundreds of general export questions—whether it is how to ship a product overseas, how to collect payment for foreign sales, or how to label products in foreign languages.

Import Assistance

U.S. Customs & Border Protection, an agency within the Department of Homeland Security, is responsible for enforcing the laws of the United States at the country's borders with respect to goods entering or leaving the country. Prior to shipping your first export, you should consult the customs director in your area.

International Trade Resource Directory

The International Trade Office of the RIEDC publishes a resource directory to help individuals network in the international business community. The directory includes contact information for government offices, freight forwarders, translation services, foreign company background information and many other resources. An electronic version is included in the "free publications list" on www.riedc.com

Concordia's core competency is converting
synthetic fibers into engineered yarns used
in the manufacture of technical fabrics /
textiles for the automotive industry. These
processes include twisting, texturing,
winding, commingling, heat setting, and
several proprietary techniques. Concordia
has expanded these capabilities to include
the production of specialty braided and knit
fabrics, and recently added new technology
to produce non-woven scaffolds for
medical applications.
