LET'S GO GREEN

Stop the Water

By leaving water running while you brush your teeth, you waste 570 litres of water per month-that's 6,800 litres a year! Turning water off while you brush can save several gallons of water per minute. Also pay attention to this water-saving principle while shaving or washing your face.

Are you available during the week of October 5th to the 12th 2008. Can you or do you know of anyone who would make a donation whether it be monetary or in the form of a door prize?

We will need board movers, officials, & scorekeepers!! Contact any of the above if you can help out. And... there will be many more "jobs" that will come up over the course of this year.
