LET'S GO GREEN

Save Water Indoors

A typical Canadian household uses 1300 litres of water each day. About half that-660 litres-is used indoors. Unnecessary water usage comes in the form of leaks. Fixing leaky faucets and toilets is a quick and easy way to conserve water. A steady faucet drip can waste 75 litres of water a day. Leaky toilets are even worse, wasting upward of 380 litres a day.
