

Schuyler Volunteer Fire Co. Holds Open House

On Saturday, October 11th, the Schuyler Volunteer Fire Co., Inc. hosted an open house at the Newport Road Firehouse, when residents were invited to stop in and chat with firefighters and EMT's.

Families were treated to cider and donuts, with the younger set receiving fireman's hats, water bottles, and an educational packet on fire safety, while parents, grandparents (and everyone else who stopped by) were afforded an opportunity to view first hand the Fire Company's modern life-saving equipment, including a newly acquired rescue boat ready for use in the event an accident should occur on the Erie Canal. A display on the History of the Fire Department provided residents with interesting information of the Fire Department's inception and growth through the last 50+ years.

The Town of Schuyler is indeed very fortunate to have such a dedicated membership of fine people who are on call at all hours of the day and night, responding year-round to accidents, fires, and other catastrophes in all kinds of weather conditions, making Schuyler a better place to live — and visit!
