Dear Mr Dwivedi,

Thank you for your letter dated November 16, 2004. I am happy to note of your interest in physics at this young age. If you have not done so already, I would very strongly advise you to read the three volumes of lectures in physics by R.P. Feynman. You will find these in the BHU library. These volumes will help you formulate the basic concepts of physics better.

With best wishes,

Yours sincerely,

J.V. Narlikar
