

Who Is Eric Bruton, Jr.

Eric has studied “World Scriptures” for over 40 years. He has noticed many references that seem to be evidence of a basis for peaceful coexistence. This is slightly different from the comparison of religions.

He is fortunate to have studied with Dr. Jenny Yates, PhD in Religion and a Jungian analyst who studied in Zurich at the Jung Institute. Eric’s masters degree in

liberal studies, from the University of North Carolina – Wilmington, centered upon Jungian ideas relating to the spiritual nature of disorders of the psyche. The relationship of symbols, mythology and common spiritual concerns is a real basis for examining the prospects for peaceful coexistence.

He is a Master Mariner having been responsible for ships, crews and passengers around the world. He has a charming lighthearted southern style and ability to boil complicated ideas down into simple components. Originally from Ocracoke Island and as the child of a military family Eric experienced a broad view of cultures through out the eastern United States.

What Is Sempiternal Harmony

The concept of Sempiternal Harmony is that there is one Divine Power who has caused everything known, unknown yet knowable, as well as things inconceivable to have sprung into being. The creator of the universe has set all beings into existence through the natural divine laws. Some of these laws are revealed to the understanding of human kind and are called laws of physics, chemistry, human nature

As creatures of the universe it is our nature to love and worship God at the level of our understanding. This level of understanding is different for all people, yet is constantly changing because we become more aware every moment of our life. The key to Sempiternal Harmony worship is respect and honor for all that we experience.

We believe that all people have the tools necessary to find the right spiritual path for themselves. Spiritual discussions are important learning tools, yet no individual has exclusive knowledge of the one true path for all of us. The great religious individuals like Jesus, Buddha, Krishna, and many others who showed us a path were brothers of the Divine Family, you are their brother or sister too. There is something divine in you.

Presented as a service of Sempiternal Harmony

New Ideas About Peaceful Coexistence

*Cross Cultural Spiritual Values
And Prospects
For Peaceful Coexistence*

**A proposed seminar for your group
With Eric Bruton, BSBA, MALS**

Is Peaceful Coexistence

A Possibility?

The short answer is, yes! The truth of this answer is found throughout the humanities in anthropology, religion, psychology, mythology, history and in medical sciences. The evidence is hidden before our eyes, not in some sinister secret hiding place. It is our own failure to see the commonalities and the divine attributes we all share that makes our family of human kind difficult to appreciate.

Each of us possesses the ability to be compassionate. The purpose of the Prospects for Peaceful Coexistence seminars is to help us regain our child like ability for compassion while clarifying our deeper vision of the human family.

The Seminar

Events longer than one hour begin with a brief “get acquainted” reception where the participants are

encouraged to share their initial thoughts in a one on one setting.

Eric demonstrates the staggering number of people required for us to be here and shows how the family of human kind is truly one.

Scriptural evidence is presented to show our spiritual potential for peaceful coexistence. Every religious philosophy has the rule of reciprocity as well as scripture that can be considered to show tolerance and compassion. Some of these passages will be presented and discussed in an open forum.

Evidence is presented of the common psychic threads of Soul and Spirit. There truly is a basis of commonality in our psyche. Jungian psychology as well as modern brain research has shown a biological connection to a real soul and spirit. Studies have shown that we have the capacity for sympathy and compassion. This is a God given trait that is as much a part of human beings as intelligence or language. It is in us all no matter which name we use for God. What might happen if we follow the compassionate way and live a life of respect for others.

We hold many symbols of faith in common. Whether we have an eastern or western heritage there are cultural symbols that have real meaning and are evidence of our common concerns. How might these values work to bring about peaceful coexistence?

In the seminars lasting more than two hours, Eric will discuss calming meditation. The practice of meditation can bring a personal inner peace that extends outwardly to all who interact with us. Personal peaceful coexistence

between the inner and outer self is the first step in peaceful relationships with other people.

How might it be if we attempt peaceful coexistence with two people whom we are in conflict with.

Living peacefully is a life choice. It is neither a right nor an obligation. This seminar attempts to reinforce a person's decision to live peacefully.

Cost of the Seminar

There is no fee for the one hour informational meeting. However, most churches and other nonprofit organizations will seek a love offering from the participants. The purpose of this love offering is to cover the cost of materials and travel expenses.

For the half day and one day seminars Eric's fee is \$300 and \$500 respectfully. In addition, travel expenses will be added to the cost of the seminar. Eric will accept the hospitality of the seminar host which will make the event more affordable. The importance of the concept of peaceful coexistence should not be underestimated. Because of the importance of this topic, economic considerations should not deter booking a seminar. Contact Eric for alternative compensation ideas.
