

MECHA DICE

Longbow Research, Inc.

All Mecha below belong to this faction.
Longbow's colors are blue, gold, and white.

NEW WEAPON: PHASIC CHARGE

This weapon creates a series of explosions around the target point to reduce the effectiveness of armour. As such, all special considerations from defensive systems are downgraded one level; i.e., if the Defender rolls a system that Negates the damage, it is only partially negated; if the Defender rolls a system that partially negates the damage, it is not negated.

Any strength of Mecha can carry a Force 10 to 20 Phasic Charge.

Medium or Heavy Mecha can carry a Force 30 Phasic Charge.

Heavy Mecha can carry a Force 40 Phasic Charge.

If using an Ultra Mecha, they can carry any of the above and can also carry a Force 50 Phasic Charge. Only a Longbow Mecha can carry the Force 50 Phasic Charge.

Its symbol is a triangle of three explosions.

NEW DEFENCE: POINT DEFENCE ARMOUR (PDA)

A series of tiny shaped grenades filled with momentum-absorbing foam detonate within point blank range of the affected area. This effectively nullifies projectiles (except the mass driver, which moves at a much higher velocity than most projectiles) but is not as effective against energy weapons (except lasers, since the debris filled air weakens the light beam). It is also the only defence known to completely negate the Phasic Charge.

Negates: Phasic Charge, Auto Cannon, Club, Punch

Half Negates: Mass Driver, Blade, and Laser

Doesn't Negate: Flamer, Plasma Gun

Any strength of Mecha can carry a Force 10 to 20 PDA.

Medium or Heavy Mecha can carry a Force 30 PDA.

Heavy Mecha can carry a Force 40 PDA.

If using an Ultra Mecha, they can carry any of the above.

Its symbol is a billowing cloud.

MECHA DICE

Light Mecha

Name: Firecracker

Concept: Showcase Longbow's research and how it could apply to a light security mech. Though small, the armour-penetrating potential of the Phasic Charge should enable it to go up against heavier stuff.

- 1 Booster
- 2 Tactica
- 3 MD Phasic Charge (20)
- 4 MD Phasic Charge (20)
- 5 UL Laser (40)
- 6 MD PDA (20)
- 7 MD PDA (20)
- 8 UL Jump Jets (40)

Name: Sharpshooter

Concept: Hit once and hit hard. A pair of targeting computers gives this mecha a 25% chance to roll a critical hit with 30 point weapons, for a potential yield of 60 Force, stronger than the strongest weapon in the game! This one is meant for fire support rather than all out assault and works better when paired with a more conventionally offensive mecha.

- 1 Booster
- 2 Tactica
- 3 Targeter
- 4 Targeter
- 5 LG Laser (30)
- 6 LG Mass Driver (30)
- 7 UL Dodge (40)
- 8 UL Jump Jets (40)

Medium Mecha

Name: Crippler

Concept: On the theory that the best defence is a good offence, the Crippler bristles with tazers, giving it a 30% chance of rolling Neutralize. Low offensive power, however, makes this one best used as a support mech paired with a more offensive partner. A variant boosts one LG Armour to UL (40) and replaces the other with Repair Droids, giving it theoretically the ability to heal from damage. Further dropping one Tazer for a ME Laser, this model is a more well-rounded solo operative but less true to the concept.

"A" Variant

- 1 Booster
- 2 Tactica
- 3 Tazer
- 4 Tazer
- 5 Tazer
- 6 ME Mass Driver (20)
- 7 ME Club (20)
- 8 UL Armour (40)
- 9 LG Armour (30)
- 10 LG Armour (30)

"B" Variant

- 1 Booster
- 2 Tactica
- 3 Tazer
- 4 Tazer
- 5 ME Laser (20)
- 6 ME Mass Driver (20)
- 7 ME Club (20)
- 8 UL Armour (40)
- 9 UL Armour (40)
- 10 Repair Droids

Heavy Mecha

Name: Sixgun

Concept: Lots of little attacks to wear down the foe. Short on defence, but a 1 in 6 chance of regaining health. This mecha specializes in attacks that aren't easily negated, so it should be able to damage its target more frequently than a less diversified attacker. With a targeting computer to occasionally pack extra punch, this well-rounded mecha has become a feared sight on Longbow's testing grounds.

- 1 Booster
- 2 Tactica
- 3 Targeter
- 4 LT Punch (10)
- 5 ME Flamer (20)
- 6 ME Club (20)
- 7 ME Laser (20)
- 8 ME Mass Driver (20)
- 9 LG Armour (30)
- 10 LG Armour (30)
- 11 Repair Droids
- 12 Repair Droids
