

SIMS_SIMZ

Tutorial: Making Simple Por

Hello and welcome to the [Sims Simz](#) tutorial. In this tutorial we will learn how to make a simple picture for hanging onto your Sims' walls. If you are especially pleased with your work, submit it to the [Sims Simz](#) website and share it with other users!

There are a few programs you require to do this tutorial, well I say a few, really it is just 1: The Sims Art Studio:

http://thesims.ea.com/downloads/getfile_pri.php?filename=SimsArtStudio.exe.

1) Skip this step if you have the image you wish to put in the picture.

When you have downloaded this tool and installed it, go to a search engine, in this tutorial I will use [Google](#), and select image search.

Type in the name of the image you wish to search for and press enter. When you have found the image you want, right click on it and select *Save Image as..*

Save the image in a folder where you know where it is, then exit the internet.

2)

Load up the Sims art studio by double clicking its desktop icon.

3)

Then, when the main interface loads up, click on the start button.

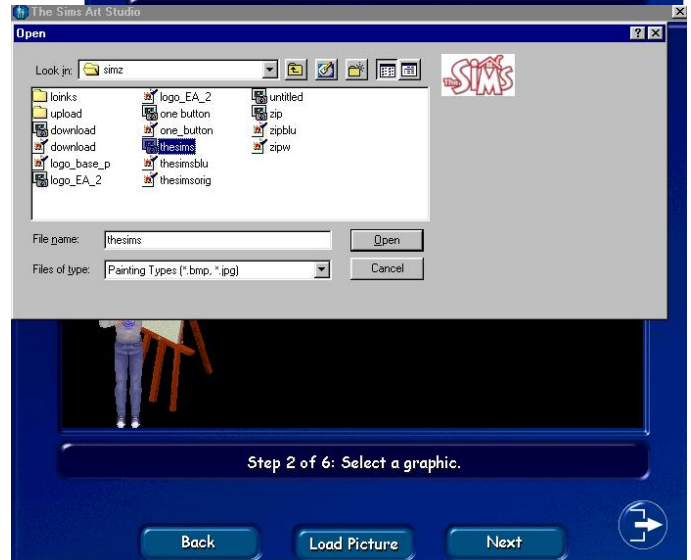

2

4)

Here, you can select what shape and size you want your portrait to be. I have chosen a straightforward rectangular design. When you have chosen, click next.

5)

On the next screen you can choose the image to go into the picture. Click Load Image at the bottom of the screen and browse to find the image you downloaded, here, I will use the Sims Logo. Then click next.

6)

On this screen, you select which part of the image you want in the picture, you can spend some time playing around with the controls to suit your needs, when you are done, click on next.

3

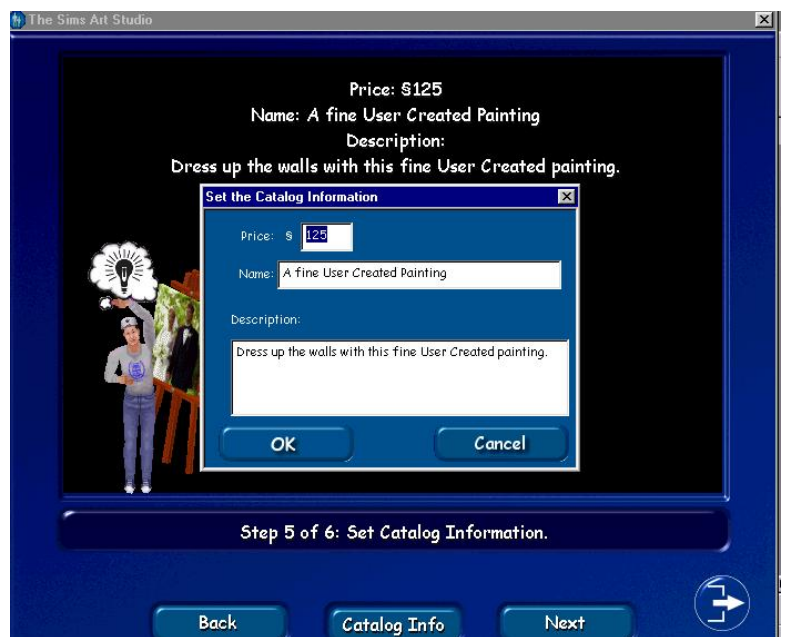

7)

Almost finished, here, select your frame type and texture and click Next.

8)

Finally, set the price and description which will appear in the catalogue, then click next and save the object. Well done, you have completed the tutorial.
