PATHOLOGY REPORT

PATIENT NO.: _____ S.P. NO.: S-92=70

NAME: SING KIO Age 68 Sex: M C.S. _____
(First) (Middle) (Last)

ADDRESS: _____

() OPD () IN-PATIENT WARD: OPD ROOM NO.: _____ BED NO.: _____

Date Received: _____ Date Reported: 1/14/92

Requested By: _____ SPECIMEN: Review of slide

CLINICAL DIAGNOSIS AND/OR HISTORY:

GROSS AND MICROSCOPIC DESCRIPTION:

Received 1 slide labelled "16669 A/B" I&E stained for slide review.

Section shows a malignant epithelial neoplasm arranged in solid nests. The tumor cells exhibit nuclear pleomorphism and hyperchromatism with ample cytoplasm. Individual cell keratinization and stratification of tumor cells are focally noted. Intermingling are few infiltrates of acute and chronic inflammatory cells.

DIAGNOSIS: Slide Review labelled "16669 A/B"
SQUAMOUS CELL CARCINOMA, MODERATELY DIFFERENTIATED.
