Sanna Fonts Info.pdf

Sanna fonts are Inuktitut Unicode syllabics fonts that conform to the Unified Canadian Aboriginal Syllabics (UCAS) encoding of the Unicode Standard. They can be used interchangeably with NunacomU, Pigiarniq and any other Unicode compliant Inuit syllabics font that conforms to the UCAS encoding. Sanna fonts work best with my Sannatitut and Aijutitut Keyboards for MacOS X and Windows 2000/XP but they do work with Nunacom Indonesian Keyboard.

The main difference of Sanna fonts from Aiju fonts is that Sanna fonts do not have the following old symbols that Aiju fonts have:

ᐃ	ᐅ	ᐇ	ᐉ	ᐋ	ᐍ	ᐏ	ᐑ	ᐓ	ᐕ	ᐗ	ᐙ	ᐛ	ᐝᐏ	ᐟᐏ
---	---	---	---	---	---	---	---	---	---	---	---	---	----	----

This makes spacing between the lines tighter in Sanna fonts allowing you to utilize space on a page more effectively.

The following Inuktitut syllabic characters are incorporated into Sanna fonts.

<u>Character</u>	<u>Unicode Value</u>
ᐃ	U+1401
ᐅ	U+1403
ᐇ	U+1404
ᐉ	U+1405
ᐋ	U+1406
ᐍ	U+140A
