

## Acknowledgements

I express my sincere gratitude to my supervisor, Dr. Gautam Sengupta, for helping me to identify the research problem. I always admired his way of helping me see the problem from different angles. His spontaneity in coming up with counter-examples every time I presented my analysis before him helped me to brood over the matter more thoroughly and with better understanding.

To my co-supervisor Dr. Probal Dasgupta, I express my sincere gratitude for being a constant help and an inspiring teacher. He has always been helpful in going through my drafts very quickly and suggesting me instant solutions for difficult matters which I would not have otherwise managed to deal with.

I want to thank Dr. Miriam Butt with whom I could always discuss the compound verb constructions. She has sincerely gone through my write-ups and sent me her insightful comments.

I thank Dr. Tony Davis with whom I had many interesting and useful discussions on the HPSG part of my thesis.

Thanks Rajat da, Banani di, Krishnendu and Tinku for proof-reading my thesis.

I express my gratefulness to my parents for their kind and silent support. My sister's constant concern about my work has always been very encouraging.

Thanks to all CALTS staff, my friends, hostel-mates and juniors for making my stay at HCU memorable.
