french and greek editions !
**Order your copy of the
coming year's edition now !**
What the people say:
"I am extremely impressed with the
wealth of information contained in the
astronomical pocket diary in such
concise form. It is surely a good
companion for anyone who is a star-
gazer as well as for other astronomical
events of significance. I will be delighted
to send for the next year's edition."
E.S.Srinivasan

* the western horizon .. one hour after sunset

* the eastern horizon .. one hour before sunrise

THE ASTRONOMICAL POCKET DIARY, Norbert Haley (Poste Restante, P.O. Wellesley St., Auckland, New Zealand, email: norb@kcbbbs.gen.nz)
FAX: +49 241 8795568 ... 112 pages, ISBN 0-4730253-9-6, \$10.00, paperbound.
This handy daily guide to the heavens offers weekly information that includes evening and morning star maps and planet positions. Daily information features lunar phases and visibility, astronomical events (meteor showers, planetary conjunctions, and eclipses, for example), and significant dates in history, with plenty of room for your own notes. *The Astronomical Pocket Diary* is available in several in-stock editions for cities around the world and in six languages. Custom editions can also be ordered in quantities of 24 or more, costing as little as \$5.00 each.
