Dear Reader:

Hello I am Zoe Place. I am a student at Albany Middle School. Next year I will be going to highschool and knowing collage is in my future, I wanted to learn more about rape culture and how to prevent rape. For my Isearch, I would like to inform you about rape culture and rape. Did you know, according to the National Organization For Women, one in five women are raped? I will show you a power point I made on how rape culture is perpetuated and how we can stop it. Also, once you have learned about rape culture I will give you a quiz.

In this website, I included several resources to inform you or rape culture and rape. There is an article on why rape occurs, date rape, and perpetuation of rape culture. Next, there is an article on a specific rape case. Then, there is a list I made that gives suggestions on preventing rape, ideas instead of raping, and a few ideas to use if someone is raped. My website is aimed to prevent rape and end the perpetuation of rape culture by people gaining knowledge on this topic.

My main focus has been answering the question, "What are the factors that perpetuate rape culture in the United States?". After reading an article on that, reading a few rape facts, and reading the glossary you will know much more about rape culture. Through these two months, I have learned a lot about rape culture. I find it interesting and important to know about. Once you learn about it you will know what perpetuates rape culture and how we can start to stop it today. This is important topic to know about because it is in your everyday life if you decide to notice it. In the future, I would like to learn more about the beginning of rape culture and how it started.

Sincerely,

Zoe Place
